MODULE 1

Lesson 0: Introduction 5
Pronunciation Guide 6
Consonant Clusters 10
Syllabic Structure 11
Stress Patterns 12
Orthography & Spelling 13
Diacritics 18
Morphological Processes 20

Lesson 1: Greetings, Honorifics & Endearments
Common Greetings (with Response Particles “sab”, “sad”, “pod”) 22
Honorifics & Endearments 23
Occasional Greetings 25
Linker: “nga” 26

Lesson 2: Nominative Markers
Case Markers 28
Interrogatives: “Who?” & “What?” 29
Existentials: Neutral “May” & Negative “Wala” 29
Vocabulary: Parts of the Body 31
Vocabulary: Body Organs, Fluids & Discharge 32

Lesson 3: Nominative Pronouns & Demonstratives
Pronouns 33
Demonstratives 35
Interrogative: What? “Unsa?”
Personal & Nonpersonal 3rd Person(s) 38
Negative: Predicative “Dilì” 39
Vocabulary: Animals & Insects 40

Lesson 4: Basic Adjectives & Particularizers
Quantitative Adjectives 41
Qualitative Adjectives 43
Particularizers 45
Vocabulary: Fruits 47
Vocabulary: Vegetables 48

Lesson 5: More Basic and Exclamatory Adjectives & Numbers
Basic Adjectives: Antonyms 49
Exclamatory Adjectives: “Pagkadakoa!” 50
Degree Interrogative: “Unsa kadako?” 50
Numbers 51
Vocabulary: Rice 55

Unedit Twelve

Lesson 6: Existentials & Locatives
Existentials 56
Locatives 59
Negatives: “Walâ” & “Dilì” 60
Interrogative: Where? 61
Vocabulary: Food & Cooking 62

Lesson 7: Prepositions, Directions & Temporals
Prepositions 63
Directions 63
Temporals 64
Interrogative: “When?” 66
Vocabulary: Kitchen 68

Lesson 8: Agent Voice Verbs : Punctual & Durative (mu- & mag-)
Austronesian Alignment 69
Punctual Set 70
Progressive vs. Habitual 71
Mu- vs. Mag- 71
Durative Set 72
Vocabulary: Body Movements 74

Lesson 9: Genitive, Oblique, & Locative Markers
Genitive Case Markers 76
Oblique Case Markers 77
Locative Marker 78
Negatives 78
Interrogatives: “Whose?”, “By Whom?” & “To/For Whom?” 78
Pronouns & Demonstratives Tables 79
Vocabulary: Mouth & Teeth 82
Vocabulary: “One” 82

Lesson 10: Transitivity & Verbal Substitution (mu-, mag- & maN-)
Transitivity 83
Punctual vs. Durative 83
Distributive Set 84
Punctual vs. Durative vs. Distributive 85
Verbal Substitution 86
Verbal Negatives: Past “Walâ” & Nonpast “Dilì” 87
Vocabulary: Kinship 89

preptwelve

Lesson 11: Agent Voice: Stative (ma-, maka- & makag-)
Stative Set 90
Potential: Punctual Compatible 90
Potential: Durative Compatible 91
Verbal Substitution 91
Conversation: Meeting Someone on the Street 93
Vocabulary: Knowing & Seeing 94

Lesson 12: Genitive Pronouns & Demonstratives
Pronouns 95
Demonstratives 96
Temporals 97
Conversation: Exiting A Party 98
Vocabulary: Parts of the House 99

Lesson 13: Oblique Pronouns & Allatives
Pronouns 100
Allatives 101
Conversation: Ordering Food 102

Lesson 14: Patient Voice (Punctual & Durative)
Punctual vs. Durative 103
Progressive vs. Habitual 104
Agent vs. Patient 105
Adverbial Interrogative: “How to do?” 105
Conversation: Asking Permisison from Parents 105
Vocabulary: House Chores 106

Lesson 15: Patient Voice (Distributive & Potential)
Distributive Set 107
Potential Set. 108
Agent vs. Patient 109
Conversation: Asking for Directions 109
Vocabulary: House Chores & Group Activities 110

Lesson 16: Referent Voice (Punctual & Durative)
Punctual vs. Durative 111
Progressive vs. Habitual 112
Agent vs. Patient 113
Conversation: Inviting a Friend for Dinner 113
Vocabulary: Speech & Voice 114

Hneptwelve

Lesson 17: Referent Voice (Distributive, Potential & Reason)
Distributive Set 115
Potential Set 116
Reason Set 116
Agent vs. Patient 118
Conversation: Commuting by Jeepney 118
Vocabulary: Hygiene & Grooming 119

Lesson 18: Assistant Voice (Punctual & Durative)
Punctual & Durative Sets 120
Agent vs. Patient 121
Progressive vs. Habitual 121
Conversation: Looking for an Apartment 122
Vocabulary: Personal Qualities 123

Lesson 19: Assistant Voice (Distributive & Potential)
Distributive Set 124
Potential Set 125
Reason Set 125
Agent vs. Patient 127
Conversation: Going to the Doctor 127
Vocabulary: Nature & Topography. 128

Lesson 20: Experiential Verbs
Durative, Distributive & Potential Sets 129
gi- & gipaN- Set 130
gi–an & gipaN–an Set 131
na- & na–an Set 132
Conversation: Visiting a Friend's House 133

- **INTRODUCTION**

"Visayan", "Bisaya", "Binisaya", "Sinugboanon", "Cebuano", "Sinibwano"
All names for the same language!

Cebuano is a Visayan language spoken by more than 20 million people or approximately 22% of the Philippine population. Comparatively, Tagalog is spoken by around 25 million first-language speakers. Cebuano is the second most spoken language in the Philippines and is used as a lingua franca in many parts of the southern Philippines. It has slightly more speakers than Norwegian, Swedish, and Danish combined.

Cebuano is part of the extensive Austronesian language family, which shares common ancestry with languages such as Tagalog, Malaysian, Indonesian, Maori, Hawaiian, and Malagasy. It is very similar to other Visayan languages such as Waray-waray (Samarnon/Samareño) and Ilonggo (Hiligaynon). Due to Spain's colonization of the Philippines which spanned 333 years, there are many Spanish loan words. The pronunciation of these loan words tend to be slightly different from the Spanish and they may have experienced meaning change over the centuries.

Different areas of the Cebuano speaking world have their own unique accents and innovations which can be recognizable to speakers from other regions. It is similar to the difference in accents from the different regions of the USA or the UK. For this class, we will primarily use the South Cebu dialect for spelling which is hailed as the standard by many language organizations including The Philippine Bibles Society which distributes copies of the Cebuano Bible in the region. This dialect is considered to be more conservative and lacks the notorious "shortcuts" of the Cebu City (North Cebu) dialect and is used widely throughout the southern Philippines. It is also the preferred dialect in generally formal, religious and political settings.

There can be marked differences in pronunciation among the different social classes. Those with a high level of education and/or social class may switch in and out of English frequently, even in the same sentence. "I don't know kung nganong ingon ana na siyá." (I don't know why he's like that.) Cebuano as spoken in the countryside (in "the province" as it is here called) and among the poorer classes tends to be "rougher" sounding and there is much less English mixed into the language. They also may use words considered "deep" by the social elites of the Visayan world.

The language's variety in names is mainly because of technically overlapping definitions that lead to ambiguity. Many have been proposing names but most are not truly widely accepted considering the resistance of the other speakers outside of Cebu. Native speakers have been normally calling the language "Bisaya" or "Binisaya" (literally "the Visayan manner") in the native tongue which translates to English as "Bisayan" or "Visayan". The terms "Cebuano", "Sinibwano", "Sinugboanon" (literally "of the Cebuano manner") are formally used to distinguish it from the other Visayan languages in the Visayas group of islands which also had a history of calling themselves and their native tongues "Bisaya" or "Binisaya". The Cebuan group has been historically the most numerous among the Visayans and when the use of these terms died down in the others, they became associated with the Cebuan group especially in mainstream and social media and in the younger generations who were not able to witness a time when all of the Visayans identified as Visayan.

- PRONUNCIATION GUIDE

VOWELS

Cebuano has only 3 vowels /a/, /i/, and /u/. The additional two /e/ and /o/ are found in loanwords and are allophones of /i/ and /u/. In spelling, /e/ and /o/ are typed out but are pronounced more “hardly” than its original Spanish & English pronunciations. “Low”, “mid” and “high” indicate tongue height whereas “front”, “central”, “back” indicate the portion of the tongue that is raised.

Initial	Medial	Final
1. /a/ − low central unrounded		
asó (smoke)	bálik (go back)	duhá (two)
ádlaw (sun, day)	páspas (fast)	tínda (sell)
asúkal (sugar)	buláwan (gold)	simána (week)
2. /i/ − high front unrounded		
ikáw (you)	kílid (side)	kiní (this)
ítlog (egg, testicle)	bísbis (to water plants)	ábli (open)
igsúon (sibling)	silíngan (neighbor)	atulí (earwax)
3. /u/ − high back rounded		
usá (one)	túlog (sleep)	líso (seed)
únlan (pillow)	búntod (hill)	pásko (christmas)
ulahí (last, late)	dalúgdog (thunder)	aníno (shadow)
4. /e/ − mid front unrounded		
éstar (stay, reside)	maéstro (male teacher)	párte (part)
espého (mirror)	pétsa (date)	kárne (meat)
ehémplo (example)	pwéde (can, able)	syéte (seven)
5. /o/ − mid back rounded		
óras (hour)	pólo (polo)	kwárto (room)
ótso (eight)	tóno (tone)	swéldo (salary)
óbra (work)	módo (mood)	gásto (expenses)

thirtytwelve

DIPHTHONGS

1. /ay/

baláy (house)	hayáhay (relaxing)	tráynta (thirty)
páypay (hand fan)	dagáyday (trickle)	báynte (twenty)

2. /uy/

káhoy (tree, wood)	huyúhoy (breeze)	húygo (gambling)
lúyloy (droop, hang)	tútoy (breast)	búynas (luck)

3. /aw/

uháw (thirsty)	tagáwtaw (talk nonsense)	hāwd (skillful)
sáwsaw (dunk into liquid)	pagáw (hoarse)	lāwt (gooey liquid)

4. /iw/

báliw (divine punishment)	talíwtiw (pointy nose)
síwsiw (for blood to flow profusely)	kiwíkiw (to wag the tail)

CONSONANTS

Cebuano has 16 consonants including 2 semivowels. They are further classified with articulatory and acoustic descriptions. Articulatory description is all about describing the place of articulation in the mouth. Acoustic description describes how the sound is produced in the mouth.

Articulatory:

Labial (lips)	p, b, m
Alveolar (alveolar ridge)	t, d, n, r, l, s
Palatal (palate)	y
Velar (back of the mouth)	k, g, ng, w
Glottal (glottis)	h, -

Acoustic:

Voiced	made with vibration of the vocal cords
Nasal	made with the airstream passing through the nose
Continuant	made with incomplete closure in the oral cavity
Lateral	made with the lateral flow of air on both sides of the tongue
Sibilant	made with a groove along the tongue's centerline
Aspirated	made with the ejection of an extra puff of air

theptwelve

Initial	Medial	Final

1. voiceless unaspirated stops /p/, /t/, /k/

palít (buy)	apíl (join)	hanáp (blurry)
tanán (all)	bítbit (carry)	sulát (write)
káwat (steal)	bukóg (bone)	búlak (flower)

2. voiced unaspirated stops /b/, /d/, /g/

básа (read)	báboy (pig)	usáb (redo, again, too)
dáwat (receive)	padúlong (going to)	limód (deny)
gútom (hungry)	ságing (banana)	línog (earthquake)

Contrast:

puláw (stay late at night)	buláw (blonde, goldish)
lipát (mistake for another)	libát (cross-eyed)
súpsop (suck)	súbsob (frequent)

The /d/ sound remains a /d/ when it is initial in its root and only becomes medial when conjugated with a prefix. If it's a final in its root and conjugated with a suffix the /d/ becomes an /r/ intervocalically.

dúgtong - idúgtong (conjoin)	língkod - lingkóran (chair)
dalá - padalá (delivery)	hubad - hubáron (translate)

3. voiced nasal continuants /m/, /n/, /ng/

manók (chicken)	ámo (boss)	itóm (black)
nipís (thin)	súnog (burn)	dáhon (leaf)

Practice: singing ~ inging ~ nging

ngípon (teeth)	sangá (branch)	áping (cheek)
ngálan (name)	língin (sphere, globe)	tábang (help)
ngítngit (dark)	bungól (deaf)	lípong (dizzy)

Contrast: /n/ and /ng/

na (already)	nga (linker)
hunáw (wash the hands)	hungáw (for air to leak out)
búlan (moon)	búlang (cockfight)

theptwelve

4. voiced lateral continuant /l/

lángit (sky, heaven)	bálos (retribute)	súgal (gambling)

5. voiced spirant /r/

ra (merely)	parát (salty)	butár (vote)

6. voiceless spirant /s/

sálig (trust)	úsig (bark)	láwas (body)

7. glottal spirant /h/

hulám (borrow)	báhaw (cold leftover rice)

8. semivowels /w/, /y/

wáli (preach)	áway (quarrel)	húgaw (dirty)
yáno (simple)	páyong (umbrella)	suláy (try)

9. glottal stop /?/

Practice: uh-oh (a-ow), button (be-en), sentence (se-ens)

anák (child)	maáyo (good)	walâ (none, nothing)
ínit (hot, warm)	tiíl (foot)	pilì (choose)
útan (vegetable)	duól (near)	hubô (bare, naked)

bâ-bà (mouth)	lî-lì (peep)
tû-tò (bruise the lip)	kû-kò (shrink back)

Contrast: with and without glottal stop

tábang (help)	táb-ang (tasteless)
bága (ember)	bagà (lungs)
walá (left)	walâ (none/nothing)

theptwelve

CONSONANT CLUSTERS

1. /pw/, /py/, /pr/, /pl/

pwísto (place, position, slot)	prísko (fresh)
pyáno (piano)	pláto (plate)

2. /bw/, /by/, /br/, /bl/

bwílo (momentum)	bráso (arm)
byáhe (trip)	blángko (blank)

3. /tw/, /ty/, /tr/, /ts/

twágsik (scatter liquid)	trapó (wipe cloth)
tyábaw (cry out loud)	tsinílas (slippers)

4. /dw/, /dy/, /dr/

dwínde (dwarf) dyótay (few, small) drāyb (drive)

5. /kw/, /ky/, /kr/, /kl/

kwárta (money)	krúdo (crude oil)
kyúgpos (cross arms)	kláse (class)

6. /gw/, /gy/, /gr/

gwápa (beautiful) gyápon (still) grípo (faucet)

7. /mw/, /my/

mwíbles (furniture) myirkulés (wednesday)

8. /nw/, /ny/

nwíbe (nine) nyíbe (snow)

9. /sw/, /sy/

swírte (luck, fortune) syágit (shout)

10. /hw/

hwíbes (thursday)

thirtwelve

- SYLLABIC STRUCTURE

The most common syllable structures in Cebuano are CV and CVC. The less common ones are CCV, CCVC, and CVCC while the rarest one is CCVCC which are all found mostly in loanwords. Just for this section we will use the letter /q/ to represent the glottal stop on the right and the usual dash symbol /-/ on the left (excluding initial position). The interpunct /·/ symbol is used to divide each syllable. Keep in mind that glottal stops are consonants. The following are examples of different combinations of syllables in a word.

úna (first) - qu·na (CV·CV)
abó (ash) - qa·bo (CV·CV)
tái (feces) - ta·qi (CV·CV)
walâ (left) - wa·la (CV·CV)

ísog (brave) - qi·sog (CV·CVC)
ukáy (stir) - qu·kay (CV·CVC)
kalág (soul, spirit) - ka·lag (CV·CVC)
paíg (totally burnt) - pa·qig (CV·CVC)

unyà (later) - qun·yaq (CVC·CVC)
áslom (sour) - qas·lom (CVC·CVC)
bág-ang (molar) - bag·qaŋ (CVC·CVC)
lúng-ag (cook rice) - luŋ·qag (CVC·CVC)

tágsa (one each) - tag·sa (CVC·CV)
bún-i (ringworm) - bun·qi (CVC·CV)
húlma (mold, shape) - hul·ma (CVC·CV)
údto (noon) - qud·to (CVC·CV)

plíma (phlegm) - pli·ma (CCV·CV)
byúda (widow) - byu·da (CCV·CV)
pyáit (shriek) - pya·it (CCV·CV)
gwápo (handsome) - gwa·po (CCV·CV)

syágit (shout) - sya·git (CCV·CVC)
syákoy (a tidbit) - sya·koy (CCV·CVC)
tyábaw (wail) - tya·baw (CCV·CVC)
prubár (probe) - pru·bar (CCV·CVC)

sástre (tailor) - sas·tre (CVC·CCV)
íntra (enter, join) - qin·tra (CVC·CCV)
ángkla (achor) - qaŋ·kla (CVC·CCV)
tímpla (mixture taste) - tim·pla (CVC·CCV)

prímyo (prize) - prim·yo (CCVC·CV)
swíldo (salary) - swil·do (CCVC·CV)
plántsa (flat iron) - plan·tsa (CCVC·CCV)
plástik (plastic) - plas·tik (CCVC·CVC)

trángka (door lock) - traŋ·ka (CCVC·CV)
dráybir (driver) - dray·bir (CCVC·CVC)
práybit (private) - pray·bit (CCVC·CVC)

tándway (tanduay) - tan·dway (CVC·CCVC)
íntsik (Chinese) - in·tsik (CVC·CCVC)
bískwit (biscuit) - bis·kwit (CVC·CCVC)

grádwar (graduate) - grad·war (CCVC·CVC)
támbling (cartwheel) - tam·bliŋ (CVC·CCVC)

kargadór (loader) - kar·ga·dor (CVC·CV·CVC)
disgrásya (accident) - dis·gras·ya (CVC·CCVC·CV)
isudyánte (student) - is·tu·dyan·te (CVC·CV·CCVC·CV)
rihistrádo (registered) - ri·his·tra·do (CV·CVC·CCV·CV)

blāws (blouse) - blaws (CCVCC)
grāwt (grout) - grawt (CCVCC)
tráynta (thirty) - trayn·ta (CCVCC·CV)
bráwn-awt (brown out) - brawn·qawt (CCVCC·CVCC)

- STRESS PATTERNS

1. In Cebuano, a closed penultimate syllable means the stress is 99% always there. The remaining 1% would be those that become ultimate-stressed in fast colloquial speech.

Normal Speech	Fast Speech
lísta (list)	unyà ~ unyâ (later)
bányo (bathroom)	ugmà ~ ugmâ (tomorrow)
hinlo (clean, tidy)	untà ~ untâ (hopefully)
tukmà (exact, correct)	únsa ~ unsá (what)
páypay (hand fan)	kínsa ~ kinsá (who)
tánglad (lemon grass)	dághan ~ daghán (many, plenty)
baligyà (to sell)	dídto ~ didtó (there far)
salímbong (covering)	básta ~ bastá (as long as)
dalúgdog (thunder)	hángtod ~ hangtód (as long as, until)

2. Even some open penultimate-stressed syllables become ultimate-stressed in fast speech.

dilì (no/not)	dilî
ámong (our)	amóng
bísan (even if)	bisán
básin (possibility particle)	basín
pára (for, so that)	pará
péro (but)	peró

3. Monosyllabic words tend to be lengthened except in particles. Likewise, in the Cebuano dialects that have the L-elision, shortened words (which are mostly monosyllabic) increase vowel length.

dōs (two)	blāws (blouse)
dyīp (jeep)	gās (kerosene)
drāyb (drive)	pān (bread)

4. Stress placement once conjugated

básа ~ basáhon (to read)	pusíl ~ pusilón (to shoot, to gun down)
káon ~ kaónon (to eat)	hulám ~ hulamón (to borrow)
dáwat ~ dawáton (to accept)	palít ~ palitón (to buy)

5. Stress placement once syncopated

kálot ~ kalóton ~ kálton (to scratch an itch)	basâ ~ basaón ~ bás-on (to wetten)
pálong ~ palóngon ~ pálngon (to turn off)	lakáw ~ lakawón ~ lákwon (to walk)

theptwelve

- ORTHOGRAPHY & SPELLING

The Spanish and English and letters C, F, LL, Ñ, PH, Q, V, X, Z are not found in the Cebuano-Visayan alphabet except in proper nouns especially in Filipino names. The first names are usually in English while the surnames are mostly of Spanish origin.

J is used only in the Bol-anon variety of Cebuano. Otherwise, the /dʒ/ sound in Cebuano is represented by the letters DY. On the same note, the English /tʃ/ sound in “chair” is expressed as TS in Cebuano while the /ʃ/ sound in “ship” is expressed as SY.

dyīs (ten)	dyīp (jeepney)
sadyà (lively, joyous)	hudyakà (noisy merriment)
búdyong (helmet shells)	tádyaw (large jar)
kudyapì (stringed instrument)	bádyang (a kind of tuberous plant)
tsa (tea)	kutsára (spoon)
tsinilas (slippers)	hitsúra (face, appearance)
syudád (city)	bísyo (vice)
syágit (shout)	búsyad (sticking-out stomach)

All three (DY, TS, and SY) are not always pronounced like the English pronunciation. Older folks tend to pronounce them as they are written.

SPANISH & CEBUANO ORTHOGRAPHY

The Spanish left a lot of loanwords in Cebuano. Aside from this, traces of their orthography are still evident today. It is handy to be acquainted with the way sounds are symbolized in the Spanish orthography for you to be able to read someone’s surname, the name of a town, or a dish.

Each Spanish spelling is demonstrated below and their modern Cebuano equivalents are given after. There hasn’t been a universally accepted standard orthography in Cebuano despite many attempts. An “official” one assisted by the government is used in MTB-MLE (Mother Tongue Based - Multilingual Education), a subject taught in elementary schools from the 1st to the 3rd grade. Choices and preferences of the said orthography as well as the ones used in this book are discussed below.

1. I and Y (front

The /i/ sound at the beginning of a word or after a glottal stop was written as I or Y interchangeably. In modern Cebuano, this is consistently spelled as I except when it is after the semivowel Y.

yngon - ingón (say/tell)	ysda - isdà (fish)
ytlog - ítlog (egg)	ybog - íbog (attract, desire)

2. O and U

The /o/ sound, wherever it is or how many of it is in a word, was written as O or U interchangeably. Sometimes both are used in a single word or just one used twice.

ogma - ugmà (tomorrow)	osa - usá (one)
obus - úbos (consume entirely)	onod - unód (meat, flesh)

In modern Cebuano, many speakers still interchange between the two but the rule observed in formal and/or academic settings is this: use U anywhere in the root word except in the final syllable where it is replaced with an O. Once conjugated, the suffixes will all use O not U. The only exception to this rule where an O is used initially is in the word “og” (a grammatical marker) which is used to distinguish it from “ug”, a conjunction that means “and”.

In earlier attempts for a standard orthography, the E and O are utilized in loanwords to stay true to their original spellings from the language they were loaned from. This is still true today but many have started nativizing the spelling of these loanwords. In this book, loanwords are nativized but the vowel in their final syllables should end with /e/ or /o/. An exception to this is “Oktubre” where we would expect a more nativized spelling “Uktubre”.

Enero - Iniro (January)	Octobre - Oktúbre (October)
primero - primiro (primarily)	ocho - útso

3. AI/AY or AO

The diphthongs similar to those in English “lie” and “how” were written as “ai/ay” and “ao”. In modern Cebuano, they are written as AY and AW respectively.

balai - baláy (house)	lotao - lutáw (float)
paholay - pahúlay (rest)	talao - tálaw (coward)

4. EY

This is still pronounced like the previous AI/AY but for some reason Spanish writers occassionally used this for the same sound.

mey - may (there is)	bugsey - búgsay (oar, paddle)
sodley - súdlay (comb)	bodley - búdlay (tiring, exhausting)

5. IA

This diphthong has 2 pronunciations similar to those in English “yarn” or “Liam”. This is written as YA or IYA in modern Cebuano.

lumpia - lumpyà (spring roll)	ia - íya (his/hers)
hugiao - húgyaw (crowd roar)	tian - tiyán (stomach)

thetwelve

6. YE

This is pronounced very similarly to the English “ye” (2nd person plural) but not as open which is why some speakers today write it as YI. However, the Spaniards had always written it as “ye”. This is the one used in this book.

babáye - babaye (woman)	dáyeg - dayeg (praise, adore)

7. IO

This diphthong also has 2 pronunciations similar to those in English “ew” (as in “yuck”) or “theo”. This is written as IW or YO in modern Cebuano.

ngiongio - ngíwngiw (grass owl)	sapiot - sápyot (flat buttocks)
lagio - lágiw (flee, escape)	lagio - lagyò (far plural)

8. OA/UA and OO/UO

These diphthongs are pronounced similarly to those In English “what”, “when” and “won”. They are now written as WA and WO in Cebuano.

uala - walâ (left)	tauo - táwo (man)
oay - uwáy (rattan)	naoong - náwong (face)

9. OI/OY/UI/UY

These diphthongs can be 2 sounds but are spelled similarly. It could be the English “toy” or “wheel”. The latter is usually spelled as UI in the Spanish orthography but WI in modern Cebuano. The other one is spelled as OY in modern Cebuano and is used throughout this book.

sonoi - sunóy (rooster)	hiuid- híwid (stretch the body)
babuy - báboy (pig)	auit - áwit (to sing, song)

10. GUI and QUI

These are pronounced like the English “geese” and “keys” minus the /s/. In the modern Cebuano alphabet they are written as GI and KI respectively.

guinoo - ginóo (lord)	quilat - kílat (lightning)
guiloc - gilók (tickly)	quisao - kísaw (soft rustling sound)

thirtytwelve

11. C

The hard “c” letter is read as /k/ which is how it’s represented in modern Cebuano orthography.

caon - káon (eat)	coha - kuhà (get, take)
catul - katól (itchy)	cuiog - kúyog (go along)

12. G or J

These are both pronounced as /h/. It only happens to G when it is followed by an /e/ or /i/ but for J it’s always /h/ regardless of its position within a word.

Geronimó	Jángit
Gigánte	Júlian

13. D and R

These letters were interchanged in representing two sounds in Cebuano − the voiced alveolar plosive such as in English “dance” and the voiced (post)alveolar trill or tap such as in Spanish “perro” (dog) or the second “t” in American English “potato”.

arlao - ádlaw (sun, day)	buquir - búkid (mountain)
padre - pádre (priestly father)	cadon - karón (now)

In modern Cebuano, it’s always spelled and pronounced as “d” (plosive) in initial and final positions as well as in front of a cluster. Behind a cluster it’s spelled as “d” if it’s a plosive sound or “r” if it’s a trill or a tap. Intervocalically, it’s always an “r” except in loanwords that already had a “d” earlier on. This intervocalic “r” still applies when the vowel in front is a semivowel /y/ or /w/. The final “d” becomes an “r” in non-syncopated suffixed words as the pronunciation also shifts from a plosive to a trill or tap.

báyad + -an = bayáran ~ báyran (pay for)	pidál (pedal)
lawód + ka--an = kalaworán ~ kaláwran (ocean)	algudón (cotton)

14. DIA, DIE, DIO

The /j/ sound was spelled as DIA, DIE, or DIO in the Spanish orthography. Now, it’s written as DY in modern Cebuano.

Dios - Dyos/Diyós (God)	diario - dyáryo (newspaper)
diez - dyīs (ten)	diamante - dyamánte (diamond)

15. CIA, CIE, CIO

The /sh/ sound was spelled as CIA, CIE, or CIO in the Spanish orthography. Now, it's written as SY in modern Cebuano.

anciano - ansyáno (church elder)	poblacion - publasyón (town)
Deciembre - Disyímbre (December)	nacion - nasyón (nation)

16. LL

The Spanish LL both its spelling and sound became LY in Philippine Spanish which was then adopted to the local languages. Some words were not affected by this change as shown in a few examples below.

semilla - simílya (semen)	caballo - kabayò (horse)
toalla - tuálya (towel)	cebollas - sibúyas (onion)
cuchillo - kutsílyo (knife)	silla - siya (chair)

17. Ñ

The use of NY for Ñ is also a Philippine orthographic convention after the Spanish orthography was dropped.

años - ányos (years)	señor - sínyor/sinyór (senior)
iño - ínyo (your/yours)	campaña - kampánya (campaign)

18. (-)

The Spanish language has no glottal stop. This is reflected in their alphabet because they have no character or letter to represent the sound. Because of this, they spelled words that have the glottal stops the same way as those that do not.

tábang (help)	táb-ang (tasteless)
bágo (a kind of plant)	bág-o (new)

The opposite happened to the intervocalic glottal stop. Instead of leaving it blank they added an "h". The most common example of this is "Bohol" which was originally pronounced as "Bo-ol". In this book, we utilize the dash symbol to represent the glottal stop after a consonant. We leave it unrepresented in between two vowels (semivowels are included).

túg-an (to admit)	háit (sharp, not dull)	láw-oy (vegetable stew)
líg-on (sturdy)	duól (near)	báy-og (to shake, rock)

thepotwelve

19. MGA

The Spanish made use of the then newly innovated tilde to contract words. They mainly used this on native words that have the /ng/ sound. They shorten the word and then put the tilde on top of the g to make g̃. “Mga” used to be “mangá” as it was written in the native abugida script called Badlit. It was then spelled as “mg̃a” before it dropped the tilde. This book utilizes “mga” as the contracted form of “mangá”.

Drills: Repetition

Judilla (Hudílya)	Abellana (Abelyána)	Cabachete (Kabachéte)
Jacol (Hakól)	Aquino (Akíno)	Claudia (Kláwja)
Jimenez (Himénes)	Acepcion (Asepshón)	Castillo (Kastílyo)
Joaquin (Wakín)	Aguilar (Agilár)	Cuenca (Kwéngka)
Eugenio (Yuhényo)	Fuentes (Fwéntes)	Garcia (Garsíya)
Eraño (Erányo)	Florencio (Florénsho)	Gracia (Grásha)
Enriquez (Enríkes)	Falcon (Fálkon)	Gallegos (Galyégos)
Erojo (Eróho)	Fulgencio (Fulhénsho)	Genoguin (Henógin)

- DIACRITICS

To be able to identify the pronunciation of words in text, we introduce this diacritic system as your guide.

1. acute accent
    a. stress on the penultimate syllable, no glottal stop

máma (mom)	baláan (holy)
pápa (dad)	kawáyan (bamboo)
súso (breast)	igsúon (sibling, brother/sister)

    b. acute accent (stress on the ultimate syllable, no glottal stop)

usá (one)	daotán (bad, evil)
duhá (two)	butakál (male pig)
tuló (three)	putión (whitish)

2. grave accent
    a. stress on the penultimate, glottal stop at the ultimate)

batà (child, kid)	patakà (guesswork)
dulà (to play, game)	kaligò (to take a bath)
tulì (to circumcise)	pulikì (busy)

theptwelve

3. circumflex accent
    a. stress and glottal stop at the ultimate

bulâ (bubble)	mabasâ (become wet)
pitâ (muddy ground)	maputî (white)
likî (crack)	dugô (blood)
pilô (to fold)	bisayâ (Visayan)

4. circumflex and grave accents
    a. stress and glottal stop on the penultimate plus another glottal stop at the ultimate

bâbà (mouth)	talûtò (house lizard)
lîlì (peep)	hingîkì (pick one's teeth)
bûbò (pour)	lagâlà (vocally boastful)

    b. word reduplication with glottal stops, stress on the penultimate

pilô-pilò (foldable)
basâ-basà (somewhat wet)
banâ-banà (estimate)
sukô-sukò (be angry in a somewhat pretentious manner)

5. double circumflex accent
    a. word reduplication with glottal stops, stress on the ultimate

yagâ-yagâ (teasing)	dalî-dalî (quickly)
dakô-dakô (somewhat bigger)	pitî-pitî (crackling sounds)
putî-putî (somewhat white)	pulô-pulô (ten each)

6. macron (with L-elision and semivowel gliding)
    a. long vowels without glottal stop

dalá ~ dā (bring)	lalóm ~ lāwm (deep)
húlog ~ hūg (drop)	sálom ~ sāwm (swim/dive down)
óo ~ ō (yes/yeah)	nawóng ~ nāwng (face)
sulód ~ sūd (in/inside)	babáye ~ babāy (woman/female)

7. macron (with apostrophe)
    a. long vowels with proceeding glottal stop

walâ ~ wā' (none/nothing)	talûtò ~ tāw'tò (house lizard)
dilì ~ dī' (no/will not)	
salâ ~ sā' (sin/fault)	

thetwelve

- MORPHOLOGICAL PROCESSES

1. Deletion (Syncopation)

Deletion is the loss of one or more sounds within the interior of a word. This usually happens to vowels.

basâ (to wetten)	basaón ~ bas-on	dugang (to add)	dugangan ~ dugngan
ibót (to pull out)	ibotón ~ ibton	kapót (to hold)	kapotán ~ kaptan

2. Assimilation

Assimilation is the change in sound of some phonemes adjusting to its neighboring sounds in which they become similar or identical to one another. The most common cases of assimilation in Cebuano occurs with the prefix “paN-” because of “N” which is also found in other prefixes.

paN-	+	b, p, m	=	pam-
paN-	+	t, d, n, s	=	pan-
paN-	+	k, q, vowel	=	pang-
paN-	+	g, h, w, y	=	pangC-
paN-	+	l, r	=	pan(g)C-

The letter q represents the glottal stop and the letter C means initial consonant of the word. On the right are the assimilated prefixes attached to the rest of the word.

baylo (to borrow) ~ pamaylo	umá (to farm) ~ pangumá
sulti (to speak) ~ panulti	hawid (to hold) ~ panghawid
kawat (to steal) ~ pangawat	lakáw (to walk) ~ panglakáw ~ panlakáw

Similarly, the morphophonemic rules observed in N are also applicable to ng in the examples below (except for k, q, and vowel sounds). In dialectal Cebuano where L-elision occurs, the “ngl” cluster becomes an “ng”.

sangpit ~ sampit (to call on)	danglog ~ danlog (slippery)
tangdò ~ tandò (to nod)	sanghid ~ sanghid (to ask permission)
tanglad ~ tangad (lemon grass)	danglog ~ dangog (slippery)
sanglag ~ sangag (to fry rice)	sunglog ~ sungog (to tease)

Another example is the assimilation of D either D itself or from an R or from its reflex L after adjoining with a consonant.

palong (to turn off)	palongon ~ palngon ~ padngon ~ pagngon
irók (to squeeze lice)	irokón ~ irkon ~ idkon ~ igkon

theotwelve

3. Metathesis

Metathesis is the transposition of sounds in a word. In Cebuano, this usually happens after the vowel gets deleted. In the first example below, we utilize once more the letter q to represent the glottal stop and we will utilize it once again throughout this book when necessary.

kaon (to eat)	kaqonon ~ kaqnon ~ kanqon (kan-on)
inóm (to drink)	inomón ~ inmon ~ imnon
iháp (to count)	ihapón ~ ihpon ~ iphon
hurót (to totally consume)	hurotón ~ hudton ~ hutdon

4. Epenthesis

Epenthesis is the insertion of a vowel usually between consonants that aren't allowed to stand together by rules that determine the possible sound sequences of a language; although in Cebuano tolerance for nonnative clusters have become increasingly normalized.

trapo ~ tarapo (wipe cloth)	planggana ~ palanggana
trabaho ~ tar(a)baho (work)	score ~ iskor

5. Alternation

Alternation is a variation in the form and/or sound of a word or word part. In most cases the change happens in suffixation and an alternate form occurs.

When D becomes intervocalic after suffixation, it becomes an R as already discussed a couple of times above. For D or any of its reflexes, R and L, when they adjoin a consonant, the resulting sound would be D in all cases.

palad (palm) ~ palaron (be fortunate, lucky)
dilì (no/not) ~ dilian ~ dil-an ~ did-an (not permitted)

When a word ends in a glottal stop, N or NG, the proceeding encliticized word absorbs the aforementioned.

atò (our)	+ nga	= atong		lang (only)	+ og	= lag	
karón (now)	+ -y	= karóy		man (particle)	+ -y	= may	

6. Intervening Consonants

Vowel sequences aren't allowed without intervening consonants. The rule of thumb is that they are in the form of an H if the preceding sound is a vowel or a glottal stop (q) if it is a consonant. There are, however, exceptions.

basa + ()on ~ basahon	dalá + ()on ~ dalaqón ~ dadqon
pulá + ()on ~ pulahón	limá + ()on ~ limaqón

thepowerve

LESSON 1: Greetings, Honorifics & Endearments

COMMON GREETINGS

Uy!	Hey!
Maayong adlaw. Maayong adlaw sab.	Good day. Good day too.
Maayong buntag sa tanan. Maayong buntag sab.	Good morning, everyone. Good morning too.
Maayong udto, Juan. Maayong udto sad, Pedro.	Good noon, Juan. Good noon too, Pedro.
Maayong hapon, Pedro. Maayong hapon pod, Juan.	Good afternoon, Pedro. Good afternoon too, Juan.
Maayong gabii, Polano. Maayong gabii pod, Polana.	Good evening, Polano. Good evening too, Polana.
Kumusta (ka)? Maayo man, salamat. Walay sapayán.	How are you? Fine, thank you. You're welcome. (It doesn't matter.)
Diín ka gikan? Asa ka padulong?	Where have you been? Where are you going?
Uná na ko. Sigé, amping. Ikáw sab. Ayo-ayo.	I will now go ahead. Okay, take care. You too. Best regards.

"Huy" can be quite offensive sounding if it's said with a blunt intonation. "Huy" as "hey" is usually said with a hint of joy or surprise especially in unexpected meetups.

"Sab", "sad" and "pod" are response particles. They mean "too", "also", or "as well". "Man" has many functions depending on the context and the intonation of your voice. Most of the time it gives an explanation or it introduces new information but in this case it acts as a softener.

On the second to the last bit, don't be surprised if Filipinos whom you don't know ask questions which might seem a bit personal such as asking your whereabouts. These are simply another way to say "hello", much as Americans say "what's up" without really expecting a long answer. It is okay to simply give a vague answer like "over there".

thepotwelve

Drills: Response

Maayong adlaw, Maria.	Good day, Mary.
_____, ____.	_____, ____.
Maayong gabii, Mark.	Good evening, Mark.
_____, ____.	_____, ____.
Kumusta ka, Don?	How are you, Don?
_____, ____.	_____, ____.
Salamat, Dana.	Thank you, Dana.
_____.	_____.

HONORIFICS & ENDEARMENTS

1. Friends, Acquaintances, Strangers
    a. Males
        i. Same age - Bay, Dô (Undò), Migo, Chuy, Brad (Brother), Brô, Bos, Boy
        ii. Older - Ya (Kuya), Noy (Manoy), Nong (Manong)
        iii. Younger - Toy (Intoy), Ting (Titing), Dong (Dodong), Doy (Undoy)
    b. Females
        i. Same age - Day (Inday), Miga, Sis, Girl
        ii. Older - Te (Ate), Nang (Manang)
        iii. Younger - Day (Inday)

Friend 1:	Bay!	Bro!
Friend 2:	Maayong buntag, bay.	Good morning, bro.
Friend 1:	Maayong buntag sab, bay.	Good morning too, bro
Older Sister:	Dong, mangaon ta!	Dong, let's eat!
Younger Sibling:	Sigé lang, te.	It's okay, *te*.
Younger Sister:	Timô usà, noy.	Have a snack, noy.
Older Brother:	Busóg pa ko, day. Salamat.	I'm still full, *day*. Thanks.

2. Parents
    a. Males - Pa (Papa), Tay (Itáy/Tatay)
    b. Females - Ma (Mama), Nay (Ináy/Nanay)

3. Aunts/Uncles
    a. Males - Kol (Angkol), Yô (Tiyô)
    b. Females - Ante, Yâ (Tiyâ)

threetwelve

4. Grandparents
    a. Males - Lo (Lolo), Tay (Itáy/Tatay)
    b. Females - La (Lola), Nay (Ináy/Nanay)

Son/Daughter:	Ma, asa ka?	Mom, where are you going?
Mother:	Sa imong Angkol Dito.	To your Uncle Dito.
Mother:	Tay, muarí na ko.	Father, I'll go now.

Grandkid:	La, naa kay piso?	Grandma, do you have a peso?
Grandmother:	Para sa unsa, doy?	What for, *doy*?
Grandkid:	Ipalít og pān ila Tiyâ Darna.	To buy bread there at Aunt Darna's.

5. Siblings
    a. Males - Ya (Kuya), Noy (Manoy/Manóy), Nong (Manong/Manóng)
    b. Females - Te (Ate), Na (Mana/Maná), Nang (Manang/Manáng)

6. Cousins - Gaw/Agáw (Ig-agaw)
7. Namesake - Ngay (Sangáy)
8. Gay Men - Yot (Bayót/Bayót)
9. Partner - Gâ (Langgà)

10. Son/Daughter - Nak (Anák)

Spouse 1:	Gâ, natulog na si Bibi?	Hon, is Bibi asleep already?
Spouse 2:	Walâ pa, gâ.	Not yet, hon.
Spouse 1:	Nganong matá pa man ka, nak?	Why are you still awake, son?
Kid:	Gihadlok ko ni Kuya.	Kuya scared me.

Drills: Substitution (Use the English translations as your guide.)

A: Dong, kaon na.	*Dong*, you eat now.
B: Sigé, _____.	Okay, Mom.
A: ___, mikaon na si ____?	Grandma, did *(older sister)* eat already?
B: Walâ pa, _____.	Not yet, *(your nickname)*.

A: ___, hain si Mama?	Dad, where's Mommy?
B: Ngano man, ____?	Why, son?
A: Gipangità siyá ni _____.	Grandpa is looking for him.
B: Unsa kaháy tuyò ni _____.	I wonder what *Father's* intention is.

A: _____, matulog na ta.	Babe, let's sleep now.
B: Naghulát pa ko kang ____ Bebe.	I'm still waiting for Aunt Bebe.
A: Kinsa nga ____ Bebe?	Which Aunt Bebe?
B: Ang asawa ni ____ Lino.	Uncle Lino's wife.

thirtwelve

OCCASIONAL GREETINGS

These are the native equivalents of occasional greetings in Cebuano. They are not commonly used compared to the English greetings because most of these are new cultural concepts not observed in “pre-modern” Cebuano. “Maayo” (good) is sometimes used over “malipayon” (happy).

1. Happy Birthday!

Malipayong adlawng natawhan!	Maayong adlawng natawhan!
Malipayong kaadlawan!	Maayong kaadlawan!

2. Happy Anniversary!

Malipayong kasumaran!	Maayong kasumaran!

3. Happy Valentine’s Day!

Malipayong adlaw sa kasingkasing! *(Happy heart’s day!)*	Maayong adlaw sa kasingkasing!

4. Merry Christmas!

Malipayong pasko!	Maayong pasko!

5. Happy New Year!

Malipayong bag-ong tuig!	Maayong bag-ong tuig!

6. Happy Independence Day!

Malipayong adlaw sa kagawasan!	Maayong adlaw sa kagawasan!
Malipayong adlaw sa kaugalingnan!	Maayong adlaw sa kaugalingnan!

7. Congratulations!

Pahalipay! *(Felicitations!)*	Kunggrats!

8. Condolences.

Pahasubô.	Kundulíns.
Pahanubô.	Kunduléns.

theptwelve

Drills: Response & Substitution

Malipayong kaadlawan, ____!	Happy birthday, Mom!
Salamat, ____,	Thank you, *my child*.
Malipayong Pasko, _____!	Merry Christmas *(older friend)*!
Malipayong Pasko sab, _____.	Merry Christmas to you too, *friend*.
_____, ___!	Happy new year, bro!
_____, ___.	Happy new year too, bro.
_____, ___!	Happy new year, sis!
_____, ___.	Happy new year too, sis.
_____ sa bag-ong kasál!	Congrats to the newly wed!
Malipayong _____ sa inyong kasál!	Happy wedding anniversary!

LINKER: nga

If the preceding word ends with an /n/, it can be cliticized in the form of "-g". If the preceding word ends with a vowel or a semivowel /w/ or /y/, it can be cliticized in the form of "-ng". Otherwise, it remains a separate word.

1. "Nga" is a linker which acts like the English "that" or "which". This is usually after the nominative pronouns and the nouns marked by the nominative case.

Siyá **nga** misulti.	He **who** spoke.
Ang tanóm **nga** mikatay.	The plant **that** climbed.
Ang tindahan **nga** atbang sa karsada.	The store **which** is in front of the road.

2. It is also an adjective linker.

Putión **nga** bola ~ Putión**g** bola	Whitish ball
Bola **nga** putión ~ Bola**ng** putión	Ball **that** is whitish
Hugaw **nga** baláy ~ Hugaw**ng** baláy	Dirty house
Baláy **nga** hugaw ~ Balay**ng** hugaw	House **that** is dirty

3. It also follows after interrogatives, demonstratives, genitive and oblique pronouns even if there are particles before it.

Unsa **nga** adlaw?	What day?
Unsa**ng** adlawa?	What *(particular)* day?
Kiní **nga** baboy	This pig
Kiní**ng** baboya	This *(particular)* pig

Amò **nga** abaga ~ Amo**ng** abaga	Our shoulders.
Abaga namò **nga** duhá ~ Abaga namo**ng** duhá.	Shoulders of the two of us.
Amò **nga** gipalít ~ Amo**ng** gipalít	We bought (*it)*.
Gipalít namò **nga** duhá ~ Gipalít namo**ng** duhá.	The two of us bought *(it)*.
Kanamò **nga** duhá ~ Kanamo**ng** duhá	For the both of us.
Sa amò **nga** tanán ~ Sa amo**ng** tanán	To all of us.

The particularizer "-a" is to be discussed in Lesson 4 of this book.

4. It acts like the conjunction "when" meaning "considering that".

   Dakô gihapon ang iyang tiyán **nga** sige man siyá og *jogging*.
   (His belly is still big **considering** he jogs regularly.)

   Nganong sa gawás man gyud **nga** puydi ra man sa sulód?
   (Why does it need to be outside **when** it can be done inside?)

5. It links between a word that expresses manner or mode and a verb that follows it.

Kinahanglan ko**ng** mugawás.	I need to go out.
Gusto siyá**ng** muinóm.	He wants to drink.
Paspas siyá**ng** mudalagan.	She runs fast.
Mahimò ka**ng** matulog.	You may sleep.

6. Preceding the goal of the verb.

Nagpabilin**g** masulub-on.	Remained sad.
Nagpabilin akó**ng** masulub-on.	I remained sad.
Giisip **nga** daw ila.	Was treated like theirs.
Giisip siyá **nga** daw ila.	He was treated like theirs.

7. It shows intense repeated action. It is usually not cliticized in this usage.

   kaon **nga** kaon (eat intensively)
   lakáw **nga** lakáw (walk without ceasing)
   hatag **nga** hatag (constantly giving)

8. It is partnered with "dako" *(literally "big")* to emphasize the essence or the "thingness of a thing" being described or that it lives up to its name, is true-blue, or full-blooded with regard to the context of the conversation.

adlawan**g** dakô	broad daylight
Pinóy **nga** dakô	true blooded Pinoy
babaye**ng** dakô	true-blue woman

thetwelve

LESSON 2: Nominative Markers

CASE MARKERS

Singular	Plural	
si	silá	personal
ang	ang mga	general specific
ing ~ -y	ing ~ -y mga	general nonspecific

The nominative case markers indicate that the proceeding noun is the focus in the sentence. The personal set marks personal names while the general set marks general or common nouns. The general nonspecific set can't be placed at the start of a phrase, clause or sentence. Since the nominative case markers mark the focus, which is always specific, the nonspecific set cannot be used exactly as the other sets. It is only used along with the existentials to mean that "a thing exists".

"Ing" is already obsolete in modern Cebuano. What survived is its suffix form "-y" which is still very productive today, but just like "ing" it cannot be placed at the beginning.

Si Asa.	Asa.
Si Dodong.	Dodong.
Si Asa ug si Dodong.	Asa and Dodong.
Silá Asa.	Asa and the others.
Silá Dodong.	Dodong and company.
Silá Asa ug Dodong.	Asa and Dodong (and company).
Ang lalaki.	The man.
Ang babaye.	The woman.
Ang mga lalaki.	The men.
Ang mga babaye.	The women.
Ang lalaki ug babaye.	The man and woman.
Ang mga lalaki ug babaye.	The men and women.

Contrast: Grammatical incompatibility of the general indefinite set.

Ing lalaki. ×	A man.
Ing babaye. ×	A woman.
Ing lalaki ug babaye. ×	A man and woman.

To express a singular nominative noun in the initial position, we now use the number "one" (usá) or the neutral existential "may".

Usá ka lalaki.	**A** man.
May **usá** ka lalaki.	There's **a** man.

LESSON 3: Nominative Pronouns & Demonstratives

PRONOUNS

akó ~ ko	1st person singular
kamí ~ mi	1st person plural exclusive
kitá ~ ta	1st person plural inclusive
ikáw ~ ka	2nd person singular
kamó ~ mo	2nd person plural
siyá ~ sya	3rd person singular
silá	3rd person plural

The nominative pronouns act as subjects or “in focus” in a sentence in place of personal names. They can be shortened but only when they are not in the beginning of a clause or sentence or when they’re used in equational sentences such as the ones below.

Akó ang anák.	I am the child.
Ang anák akó.	The child is me.
Akó ang misinggit.	I am the who screamed.
Ang misinggit akó.	The one who screamed was me.

The nominative personal marker “si” is constant regardless of the pronoun whether it’s singular or plural. It is ungrammatical to say “kami sila”, “kita sila”, “kamo sila”, or “sila silá.”

First Person	Second Person	Third Person
akó si	ikáw si	siyá si
kamí si	kamó si	silá si
kitá si		

INDEFINITE -Y

If the interrogative “Who?” and the pronouns are followed by “ang”, the “ang” turns into a suffix “-y.” If there’s a particle between them and “ang”, then it’s the particle that is suffixed with “-y.”

Kinsa ang anák.	Who is the child?
Kinsay anák.	Who is the child?
Kinsa gyod ang anák.	Who is actually the child?
Kinsa gyoy anák.	Who is actually the child?

Akó ang anák.	I am the child.
Akoy anák.	I am the child.
Akó gyod ang anák.	I am actually the child.
Akó gyoy anák.	I am actually the child.

thepwelve

1. **akó ~ ko** (1st person singular)

Kinsa ko?		Who am I?
Akó si Juan.	Si Juan ko.	I am Juan.
Akó si Juan?	Si Juan ko?	Am I Juan?

2. **kamí ~ mi** (1st person plural exclusive)

Kinsa mi?		Who are we?
Kamí si Juan ug Pedro.	Si Juan ug Pedro mi.	We are Juan and Pedro.
Kamí si Juan ug Pedro?	Si Juan ug Pedro mi?	Are we Juan and Pedro?

3. **kitá ~ ta** (1st person plural inclusive)

Kinsa ta?		Who are we?
Kitá si Juan ug Pedro.	Si Juan ug Pedro ta.	We are Juan and Pedro.
Kitá si Juan ug Pedro?	Si Juan ug Pedro ta?	Are we Juan and Pedro?

4. **ikáw ~ ka** (2nd person singular)

Kinsa ka?		Who are you?
Ikáw si Pedro.	Si Pedro ka.	You are Pedro.
Ikáw si Pedro?	Si Pedro ka?	Are you Pedro?

5. **kamó ~ mo** (2nd person plural)

Kinsa mo?		Who are you?
Kamó si Juan ug Pedro.	Si Juan ug Pedro mo.	You are Juan and Pedro.
Kamó si Juan ug Pedro?	Si Juan ug Pedro mo?	Are you Juan and Pedro?

6. **siyá ~ sya** (3rd person singular)

Kinsa siyá?		Who is he/she?
Siyá si Polano.	Si Polano siyá.	He is Polano.
Siyá si Polano?	Si Polano siyá?	Is he Polano?

7. **silá** (3rd person plural)

Kinsa silá?		Who are they?
Silá si Polano ug Polana.	Si Polano ug Polana silá.	They're Polano and Polana.
Silá si Polano ug Polana?	Si Polano ug Polana silá?	Are they Polano & Polana?

theptwelve

Drills: Response

For the following drill, let us be consistent with the characters as if they are actual speakers talking with each other. I picked out gender-neutral names. You, the student, are named Ariel. I, the one you are talking to, am Charlie. I ask the questions and you answer. The English equivalents on the right are your guide.

A: Kinsa ko?	Who am I?
B: _____ si Charlie.	You are Charlie.
A: Kinsa ka?	Who are you?
B: _____ si Ariel.	I am Ariel.
A: Kinsa siyá?	Who is he/she?
B: _____ si Kai.	He/She is Kai.
A: Kinsa ta?	Who are we? (inclusive)
B: _____ si Charlie ug Ariel.	We are Charlie and Ariel.
A: Kinsa mi?	Who are we? (exclusive)
B: _____ si Charlie ug Kai.	You are Charlie and Kai.
A: Kinsa mo?	Who are you? (plural)
B: _____ si Ariel ug Kai.	We are Ariel and Kai.
A: Kinsa silá?	Who are they?
B: _____ si Kai ug Jesse.	They are Kai and Jesse.

DEMONSTRATIVES

karón ~ ron	presential (this now)
karí/kirí ~ ri	proximal (this nearest to speaker)
kaní/kiní ~ ni	medial (this near both speaker & addressee)
kanâ ~ nâ	mesioproximal (that near addressee)
kadto ~ to	distal (that far from both)

The nominative demonstratives refer to things being pointed out (an idea, situation, concept) and show where they are relative to the speaker which can refer to a physical or psychological distance. They are also only shortened when they are not used as predicates.

In modern Cebuano the distinction between proximal and medial is no longer strictly observed. One could say that “medial” as a deictic concept is not distinguished anymore. Instead, both forms “-ri” and -ni” are now used as proximals depending on the speaker’s preference with the latter being much more common.

theptwelve

INTERROGATIVE

Unsa?	What? (singular)
Unsa-unsa?	What? (traditional plural)
Mga unsa?	What? (modern plural)

Likewise if the interrogative “What?” and the demonstratives are followed by “ang”, the “ang” turns into a suffix “-y.” If there’s a particle between them, then it’s the particle that is suffixed with “-y.”

Unsa ang sunód?	What’s next? What’s the next one?
Unsay sunód?	What’s next? What’s the next one?
Unsa gyod ang sunód?	What’s really next? What’s really the next one?
Unsa gyoy sunód?	What’s really next? What’s really the next one?
Kiní ang sunód.	I am the child.
Kiniy sunód.	I am the child.
Kiní gyod ang sunód.	I am actually the child.
Kiní gyoy sunód.	I am actually the child.

1. **karí/kirí ~ ri** (this - nearest to speaker)

Kinsa ri?		Who is this?
Karí si Juan.	Si Juan ri.	This is Juan.
Unsa ri?		What is this?
Karí dulaan.	Dulaan ri.	This is a toy.
Karí ang dulaan.	Ang dulaan ri.	This is the toy.

2. **kaní/kiní ~ ni** (this - near both speaker & addressee)

Kinsa ni?		Who is this?
Kiní si Pedro.	Si Pedro ni.	This is Pedro.
Unsa ni?		What is this?
Kiní baláy.	Baláy ni.	This is a house.
Kiní ang baláy.	Ang baláy ni.	This is the house.

3. **kanâ ~ nâ** (that - near addressee)

Kinsa nâ?		Who is that?
Kanâ si Polano.	Si Polano kanâ.	That is Polano.
Unsa nâ?		What is that?
Kanâ tanóm.	Tanom nâ.	That is a plant.
Kanâ ang tanóm.	Ang tanóm nâ.	That is the plant.

theptwelve

4. **kadto ~ to** (that - far from both)

Kinsa to?		Who is that?
Kadto si Juliana.	Si Juliana to.	That is Juliana.
Unsa to?		What is that?
Kadto irô.	Irô to.	That is a dog.
Kadto ang irô.	Ang irô to.	That is the dog.

Drills: Substitution

Unsa ___?	What is this? (near speaker)
Iro ___.	This is a dog.
Ang iro ___.	This is the dog.
Unsa ___?	What is this? (near both)
Iro ___.	This is a dog.
Ang iro ___.	This is the dog.
Unsa ___?	What is that? (near)
Iring ___.	That is a cat.
Ang iring ___.	That is the cat.
Unsa ___?	What is that? (far)
Manok ___.	That is a pig.
Ang manok ___.	That is the pig.
Kinsa ___?	What is this? (near speaker)
_____.	This is Paulo.
_____.	This is Paulo (and company).
Kinsa ___?	What is this? (near both)
_____.	This is Celia.
_____.	This is Celia (and company).
Kinsa ___?	What is that? (near)
_____.	That is Tony.
_____.	That is Tony (and company).
Kinsa ___?	What is that? (far)
_____.	That is Riza.
_____.	That is Riza (and company).

thepotwelve

PERSONAL & NONPERSONAL 3RD PERSON(S)

Karí siyá	This (one)	Karí silá	These (ones)
Kiní siyá	This (one)	Kiní silá	These (ones)
Kanâ siyá	That (one)	Kanâ silá	Those (ones)
Kadto siyá	That (one)	Kadto silá	Those (ones)

The pronouns “siyá” and “silá” are also used for nonpersons. It can either be an object, a thought or an idea. These are mostly partnered with the demonstratives and are placed after them. Together, in personal use, they specify which person; and in nonpersonal use, they treat the object as if it were a person.

Personal:

Buotan kiní siyáng bataa.	He (this child) is kind.
Engineer na ‘ni siyá.	He (this one) is now an engineer.

Nonpersonal:

Paspas kiní siyáng silpona.	This phone is fast.
Mahál ‘ni siyá.	This is expensive.

In English, a perfect example of this nonpersonal demonstrative + 3rd person pronoun is:

Bag-o ‘ni silá.	They (these ones) are brand new.

There are also other combination sets. The following are combinations of the demonstratives and the present locatives.

Kariria (karí + dia)	This one here
Kininia (kiní + nia)	This one here
Kananaa (kanâ + naa)	That one there
Kadtutua (kadto + tua)	That one there

Contrast: Nuance between those with and without the “nga” linker.

Karí nga dia ~ Karíng dia	This one that is here
Kiní nga nia ~ Kiníng nia	This one that is here
Kanâ nga naa ~ Kanáng naa	That one that is there
Kadto nga tua ~ Kadtong tua	That one that is there
Karíng mga dia	These ones that are here
Kiníng mga nia	These ones that are here
Kanáng mga naa	Those ones that are there
Kadtong mga tua	Those ones that are there

thirteenth

NEGATIVE

Dilì akó.	Not I/me.
Dilì kamí.	Not we/us. (exclusive)
Dilì kitá.	Not we/us. (inclusive)
Dilì ikáw.	Not you. (singular)
Dilì kamó.	Not you. (plural)
Dilì siyá.	Not he/she/him/her.
Dilì silá.	Not they/them.
Dilì karón.	Not now.
Dilì karí.	Not this. (proximal)
Dilì kiní.	Not this. (medial)
Dilì kanâ.	Not that. (mesioproximal)
Dilì kadto.	Not that. (distal)

Drills:

Tawo.	Person.	Pulá.	Red.
_____.	Not a person.	_____.	Not red.
_____.	This is a person.	_____.	This is red.
_____.	This is not a person.	_____.	This is not red.

Yes (Oo) or No (Dilì)

Tawo __?	Are you a human?	Pulá __?	Is this red?
___.	Yes.	___.	Yes.
___, _____.	Yes, I am a human.	___, _____.	Yes, this is red.
___.	No.	___.	No.
_____.	No, I am not a human.	_____.	No, this is not red.

Correct (Sakto) or Incorrect (Sayóp)

<u>Si</u> irô himos.	The dog is cute.
<u>Ang</u> Pedro taás.	Pedro is tall.
<u>Ang</u> baláy dakô ug putî.	The house is big and white.
<u>Si</u> mga batà malipayon.	The kids are happy.
<u>Si</u> Ana gwapa ug buotan.	Ana is beautiful and kind.
<u>Ang</u> Liza maayo mukanta.	Liza sings well.
<u>Si</u> baláy karaan.	The house is old.
<u>Ako</u> dilì buotan.	I am not kind.
<u>Siyá</u> taás ug gwapo.	He/She is tall and handsome.
<u>Siyá</u> maayo mutudlò.	He/She teaches well.
Kugihán <u>silá</u> Tatay ug Nanay.	Tatay and Nanay are hard-working.
Mga dagkò <u>silá</u> nga irô.	They are big dogs.

PARTICULARIZERS

On top of the usual pronouns, demonstratives and locatives, we have the particularizers with the suffix “-a” attached to the noun. The same thing can be expressed with the use of “nga”.

1. Pronouns

Kinsang Tonyo**ha**?	Which (kind of) Tonyo?
Kinsa nga Tonyo?	
Siyáng Tonyo**ha**.	Him. *(The “him” kind of Tonyo.)*
Siyá nga Tonyo.	
Ang dakô og agtang.	The one with a big forehead.
Kinsang babay**hana**?	Which woman?
Kinsa nga babaye?	
Ikawng babay**hana**.	You.
Ikaw nga babaye.	
Ang lupyak og ilóng.	The flat-nosed.

2. Demonstratives

Kinsang bata**a**?	Which particular child?
Kinsa nga batà?	
Kadtong bata**a**.	That particular child.
Kadto nga batà.	
Kadtong gamáy og tiíl.	That one with small feet.
Unsang tanom**a**?	What particular plant?
Unsa nga tanom?	
Kiníng tanom**a**.	This particular plant.
Kiní nga tanóm.	
Kiníng pulá og gihay.	This one with red petals.

3. Locatives

Haing dapit**a**?	Which area?
Hain nga dapít?	
Diháng dapit**a**.	That area.
Dihâ nga dapít.	
Dihâ sa ngitngit.	There in the dark.
Diíng lungsor**a**?	Which town?
Diín nga lungsod?	
Diríng lungsor**a**.	Here in this town.
Dirí nga lungsod.	
Dirí sa banhà.	Here where it’s noisy.

lychee	(litchi chinensis)	litsiyas
mandarin orange	(citrus clementina)	kyat-kyat
mango	(mangifera indica)	mangga
mangosteen	(garcinia mangostana)	manggostan
melon/cantaloupe	(cucumis melo var. cantalupensis)	melon
green orange	(citrus x sinensis)	sangkis
orange	(citrus x sinensis)	kahíl, urinj/urins
papaya	(carica papaya)	kapayas
pear	(pyrus communis)	peras
pineapple	(ananas comosus)	pinya
plantain	(musa paradisiaca)	tindok
pomelo	(citrus maxima)	buongón
rambutan	(nephelium lappaceum)	rambután
rose apple	(syzygium jambos)	tambis
sapodilla	(manilkara zapota)	chiko
sour cucumber	(averrhoa bilimbi)	ibà
soursop	(annona muricata)	abaná, sabaná
spanish plum	(spondias purpurea)	siriguylas, siniguylas
star apple	(chrysophyllum cainito)	kaymito
star fruit	(averrhoa carambola)	balingbing
sugar apple	(annona squamosa)	atis
sweet plantain	(musa sapientum var. compressa)	sab-a/saba
tamarind	(tamarindus indica)	sambag, tamarindo
tangerine	(citrus reticulata)	ukban
young coconut	(cocos nucifera)	butóng
watermelon	(citrullus lanatus)	pakwan
wax apple	(syzygium samarangense)	makupa

Vocabulary: Vegetables, Spices & Rootcrops (Mga Utanón, Lamás ug Lagutmon)

asparagus	(asparagus officinalis)	asparagós
bitter melon	(momordica)	paliyá, mariguso
broccoli	(brassica oleracea var. italica)	brukoli
cabbage	(brassica oleracea var. capitata)	ripulyo
calabash	(lagenaria leucantha)	balantiyong
camote	(ipomoea batatas)	kamuti, galay (camote tops)
carrots	(daucus carota subsp. sativus)	karots
cassava	(manihot esculenta)	balanghoy
cauliflower	(brassica oleracea var. botrytis)	kuliplawer
chayote	(sechium edule)	sayuti
chinese cabbage	(brassica rapa subsp. pekinensis)	pitsay/pichay
chinese okra	(luffa acutangula)	patola/patolà
corn	(zea mays)	maís
cucumber	(cucumis sativus)	pipino
eggplant	(solanum melongena)	talóng
garlic	(allium sativum)	ahos, lasuná, bawang
jicama	(pachyrhizus erosus)	singkamás
lettuce	(lactuca sativa)	litsugas
lemon grass	(cymbopogon)	tanglad
malabar spinach	(basellia alba “rubra”)	alugbati
moringa	(moringa oleifera)	kalamunggay, kamalunggay
mug bean	(vigna radiata)	munggos, tawgi (sprouts)
okra	(abelmoschus esculentus)	ukra
onion bulbs	(allium cepa)	sibuyas bumbay
onion leaves	(allium cepa)	sibuyas dahon(an)
peanut	(arachis hypogaea)	maní
pepper	(capsicum spp.)	sili
pepper (tiny, hot)	(capsicum frutescens)	kulikót
pepper (bell)	(capsicum annuum)	kagû-kò
pepper (long)	(capsicum annuum var. longum)	ispada
potato	(solanum tuberosum)	patatas
purple yam	(dioscorea alata)	ubi
radish	(raphanus sativus)	labanós
sea moss	(eucheuma cottonii)	gusô
seaweed	(caulerpa lentillifera)	latô
squash	(cucurbita maxima)	kalabasà/kalbasà
string bean	(vigna sesquipedialis)	balatong
taro	(colocasia esculenta)	gabi
tomato	(solanum lycopersicum)	kamatis
turmeric	(curcoma longa)	duláw
water spinach	(ipomoea aquatica)	tangkong, kangkong
wax gourd	(benincasa hispida)	kundol

LESSON 5: More Basic and Exclamatory Adjectives & Numbers

- BASIC ADJECTIVES: Antonyms

una (first)	ulahí (last)
sinugdanan (beginning)	kataposan (ending)
bag-o (new)	daan, karaan (old)
hinóg (ripe)	hiláw (unripe, uncooked)
batà (young)	tigulang (adult)
hingkod (mature)	linghod (immature)
nindot (nice, amazing)	batî (ugly, poor quality)
kugihán (diligent)	tapolán (lazy)
kusog (loud volume)	hinay (low volume)
hinlò (clean)	hugaw (dirty)
buhì (alive)	patáy (dead)
ugá, malá (dry)	basâ (wet)
humok (soft)	gahì (hard)
lingáw (amusing)	laay (boring)
sadyà (lively, merry)	mingaw (lonely)
tul-id (straight)	kulóng, kulót (curly)
tarong (straight, right, just)	hiwî (crooked)
barato (cheap)	mahál (expensive)
datò (rich)	pobre, kabós (poor)
isog (brave)	talaw (coward)
brayt, utokán (smart)	bulók, bugò (dull/dumb)
pariha/pariho, sama (same)	lahî, lain (different)
swirte (lucky)	dimalas (unlucky, unfortunate)
tupong, patas (equal, even)	bungkig (odd)
tukmà (correct, exact)	sayóp (wrong, incorrect)
tin-aw (clear)	hanáp (blurry)
hamis (smooth)	sapnot (rough)
punô (full)	haw-ang (empty)
busóg (full, satiated)	gutóm (hungry)
kumplito, sangkap (complete)	kulang (lacking)
matá (awake)	tulóg (asleep)
abri, bukás (open)	sirado (closed)
buotan (good, kind, well-behaved)	sipát, siáw (mischievous, naughty)
hawód (skillful)	bangâ, balâ (noob, unskilled)
tibuók (whole, entirety)	tagsa (each, apiece)
tinuod (true, truthful)	bakák (untruthful, false)
simple, yano (simple)	arte (snottily finicky, extra dramatic)
prisko, lab-as (fresh)	bahaw (stale), dubók (spoiled)

theptwelve

EXCLAMATORY

pagka-(-a) ka-(-a) ~ -a

Exclamatory adjectives include exclamatory affixes. The four above are all used and are interchangeable. The full forms (the ones on the left) are usually heard from adults but it's not surprising if younger people use them as well, especially to express more intensity. However, it is very typical for younger people to use the ones on the right, especially the very last one, in day to day speech.

Pagkadakoa!	How big!	Kadalî!	How quick!
Pagkagamaya!	How small!	Kadugay!	How long *(time)*!
Pagkaparata!	How salty!	Kaduól!	How near!
Pagkaasloma!	How sour!	Kalayô!	How far!
Pagkasayón!	How big!	Gamaya!	How few!
Pagkalisód!	How small!	Daghana!	How plenty!
Pagkahinay!	How low/slow!	Laaya!	How boring!
Pagkakusóg!	How fast/loud/strong!	Lingawa!	How amusing!

DEGREE INTERROGATIVE

In expressing what degree or how *(adjective)* something is, Cebuano uses "unsa" plus a prefix "ka-" on the adjective, sometimes suffixed with "-a".

Unsa kadakô?	Unsa kadakoá?	How big?
Unsa kagamáy?	Unsa kagamayá?	How small?
Unsa kataás?	Unsa kataasá?	How long?
Unsa kamubô?	Unsa kamuboá?	How short?

Drills:

Ka_____ sa bugás!	How expensive the rice is!
Ka_____ sa bulak!	How fragrant the flower is!
Ka_____ sa prutas!	How sweet the fruit is!
Ka_____ sa signal!	How slow the signa isl!
Ka_____ sa mga rambután!	How small the rambutans are!
Ka_____ sa mga lamisa!	How wide the tables are!
Ka_____ sa mga itik!	How black the chicks are!
Ka_____ sa mga dahon!	How green the leaves are!
Ka_____ nimo og aping.	How red you cheeks are!
Ka_____ ninyo og kaon!	How big are your appetites!
Ka_____ niya og bâ-bà!	How stinky your mouth is!
Ka_____ nila og grado!	How low their grades are!
Unsa ka _____ ang igsam?	How easy was the exam?
Unsa ka _____ ang igsam?	How difficult was the exam?
Unsa ka _____ ang mga manók?	How big are the chickens?
Unsa ka _____ ang mga manók?	How small are the chickens?

NUMBERS

The native numbers are used from 1-10. The rest are in Spanish except for multiples of 100 and 1000. This is the usual way of doing it but the native and Spanish numbers are also used in the other cases but only in rare occasions. The English numbers have become increasingly preferred by the younger generations. It's been joked a lot that when a vendor uses the Spanish numbers the young customer would just stare and suddenly fail to function. The cardinal numbers answer the question "How many?" (Pila?). The pluralizer "manga" is not required.

1. Cardinal

	Native Cebuano	Spanish-derived	English-derived
1	usá	uno	wan
2	duhá	dōs	tu
3	tuló	trīs	tri
4	upát	kwatro	por
5	limá	singko	payb
6	unóm	sāys	siks
7	pitó	syiti ~ siti	sibin
8	waló	utso	eyt ~ it
9	siyám	nuybi	nayn
10	napulò	dyīs	ten ~ tin
20	kaluhaán	baynte	twinti
30	katuloán ~ katloan	traynta	tirti ~ tarti
40	kaupatán ~ kap-atan	kwarinta	purti
50	kalimaán ~ kalim-an	singkwinta	pipti
60	kaunomán ~ kan-uman	saysinta	siksti
70	kapitoán	syitinta ~ sitinta	sibinti
80	kawaloán	utsinta	eyti ~ iti
90	kasiyamán	nubinta	naynti
10^2	usá ka gatós	syin ~ sin	wan hanrid
10^3	usá ka libo	mil	wan tawsan
10^4	usá ka laksà, napulò ka libo	dyis mil	tin tawsan
10^5	usá ka dalan, gatós ka libo	s(y)into mil	hanrid tawsan
10^6	usá ka yukót, usá ka milyon	milyon	wan milyon
10^7	usá ka bilyon	bilyon	wan bilyon ~ wam bilyon

"Ka" is a linker used in expressing how *(quantity/quality)* something is. It is used with numbers and adjectives. Notice how it is obligatorily used in the big numbers that are multiples of one hundred. Additionally, "buok" is used to mean "a piece" or "a single one".

usá ka libro (one book) duhá ka buók (two pieces)
napulò ka bayabas (ten guavas) tuló ka buók tinapay (three *pieces of* bread)

theptwelve

Like Spanish and English, Cebuano utilizes the word “and” in connecting the numbers but it’s usually omitted in American English which has a huge influence on the Philippines.

In the examples below, notice how the Spanish and English numerals are often conjoined into words with regard to where the pause occurs in pronunciation. The English numbers are always nativized in pronunciation but are seldom nativized in spelling; but when they are they’re usually written in this manner.

11	napulò ug usá	unsi	ilibin
25	kaluhaán ug limá	bayntisingko ~ bayntsingko	twintipayb
347	tuló ka gatós kap-atan ug pitó	trisyintos kwarintay syiti	trihanrid purtisibin
4,968	upát ka libo siyám ka gatós kan-uman ug waló	kwatro mil nuybi sintos saysintay utso	purtawsan naynhanrid sikstiit

2. Frequential

The frequential numbers answer the question “How many times?” (Kapila?). The base of the numbers in the cardinal set above still apply here but now a prefix is used.

kausá (once)	kabaynti (five times)
kaduhá (twice)	katuhanrid (two hundred times)
katuló (thrice)	katutawsan (two thousand times)
kanapulò (ten times)	kawanmilyon (a million times)
kagatós (a hundred times)	katinmilyon (ten millon times)
kalibo (a thousand times)	kawanbilyon (a billion times)

3. Distributive

The distributive numbers answer the question “How many/much each?” (Tagpila? or Tagpila-pila?). This is usually used when distributing something equally to many people or when asking the cost of each product. When talking about money, the Spanish numbers are always used. Take note of the stress placement on the penultimate syllable.

tag-usa (one each)	tagpiso (one peso each)
tagduha (two each)	tagdyīs (ten pesos each)
tagtulo (three each)	tagdosyintos (two hundred pesos each)
tagnapulò (ten each)	tagwantawsan (one thousand pesos each)
taggatos (a hundred each)	tagsingkomíl (five thousand pesos each)
taglibo (a thousand each)	tagtinmilyon (ten million pesos each)

The word for “half” in Cebuano is “katungâ”. The “ka-” is omittable in cases other than just expressing the value “half” (of something).

katungâ (half of something)	tungâ sa litro (half of a liter)
usá ug tungâ (one and a half)	tungâ-tungâ (half each)

theotwelve

The big native numbers are almost, if not always attached with “usa ka” like how big English numbers are preceded with “a”. So forms like the ones below are very common. The other numbers in this sequence follow the same structure.

tag-usa ka gatos (a hundred each)	tagduha ka gatos (two hundred each)
tag-usa ka libo (a thousand each)	tagtulo ka libo (three thousand each)
tag-usa ka milyon (a million each)	tag-upat ka milyon (four million each)
tag-usa ka bilyon (a billion each)	taglima ka bilyon (five billion each)

Oftentimes, to distinguish between “How many each?” and “How much each?” reduplication is used for the former and the latter remains as is. Take note of the stress placement on the ultimate syllable.

tag-usá-usá (one each)	tagduhá-duhá ka gatos (two hundred each)
tagpulô-pulô (ten each)	tagtuló-tuló ka libo (three thousand each)
taggatós-gatós (a hundred each)	tagupát-upát ka milyon (four million each)
taglibó-libó (a thousand each)	taglimá-limá ka bilyon (five billion each)

The distributive numeral prefix “tag-” also works for actions done regularly or “each time”.

tagsayo (early each time)	tag-alás-syiti (at 7 o’clock each time)
tagdugáy (late each time)	taggabií (in the evening each time)

4. Ordinal

The ordinal numbers answer the question “In what place/order?” (Ikapila?) a number is in the sequence. This set is also used in expressing fractions (and decimals) as it is in English but since Cebuano isn’t officially recognized and intellectually in academic institutions, fractions and decimals are still expressed directly in English.

una (first)	ikabaynti (twentieth)
ikaduha (second)	ikatuhanrid (two hundredth)
ikatulo (third)	ikatutawsan (two thousandth)
ika(na)pulo (tenth)	ikawanmilyon (millionth)
ikagatos (hundredth)	ikatinmilyon (ten millionth)
ikalibo (thousandth)	ikawanbilyon (billionth)

The Spanish-derived conjunction “primiro” or the more nativized “pilmiro” are also occasionally used to mean “first” instead of “una”. Contrary to the common misconception, “una” is native and not a Spanish loanword. The Spanish ordinals below are only used when talking about vehicular gears.

primira (first)	trisira ~ tirsira (third)
sigunda (second)	kwarta (fourth)

Drills:

____ nay imong idád?	What is your age?
_____ na ko.	I'm already _____.
____ na ka ka tuig?	How many years are you?
_____ na ko ka tuig.	I'm already _____ years *(old)*.
_____ ka bulan.	One month.
_____ ka tawo.	Eighty-one persons.
_____ ka baboy.	Fifty-three pigs.
_____ ka salampati.	Sixty-eight doves.
Dilì _____ sintabos.	Not twenty five centavos.
Dilì _____ (pisos).	Not three thousand five hundred *(pesos)*.
Dilì _____.	Not a hundred fifty.
Dilì _____.	Not two hundred thirty six.
May _____ ka mangga.	There are 7 mangos.
May _____ ka lubí.	There are 15 coconut trees.
May _____ ka lapis.	There are 29 pencils.
May _____ ka tudlò.	There are 10 fingers.
May _____ ko ka bulpin.	I have 36 pens.
May _____ ka ka sininà.	You have 41 clothes.
May _____ siyá ka bag-ang.	He/She has 4 molars.
May _____ silá ka dulaan.	They have 12 toys.
_____ ko maligò.	I take a bath twice.
_____ ka nagbalikbalik.	You repeated three times.
_____ siyá mikaon.	He/She ate ten times.
_____ silá manghunáw.	They wash their hands once.
_____ si Jose ug Primo og silpon.	Jose and Primo have 2 phones each.
_____ silá og papíl.	They have 50 papers each.
_____ inyong nakuhà.	You all got P75 each.
_____ ilang nadawat.	They received P200 each.
_____ ko matulog.	I regularly sleep early.
Dilì ko _____ matulog.	I don't regularly sleep late.
Sa ____ ta kang nakità.	When I first saw you.
Ang _____ adlaw sa simana.	The seventh day of the week.
_____ siyá sa lumbà.	He/She was 3rd in the race.
Mihatag silá sa ilang _____.	They gave their tithes.

theptwelve

Vocabulary: Rice

humáy	planted rice
tipasî/pasî	unhusked rice
bugás	dehusked, uncooked rice
bukbokón	weevil-infested rice
dinung-ag	rice being cooked
kan-on, lutò	cooked rice
lugitók	half-cooked rice
bahaw	leftover cold cooked rice
bungkag	non-sticky cooked rice
mumho	little particles of cooked rice
dukót	burnt rice
sinanglag	fried rice
pan-os	spoiled cooked rice
pilít	glutinous/sticky rice
binlod	finely grounded rice
tapól	dark violet rice
tahóp	rice chaff/husk
uhót, dagami	rice straw
ampaw	rice crispy
bitì	rice pops
bingka/bibingka	rice cake
lugaw	rice porridge
pilapil, basák	rice field
bugasán	rice mill, granary
pilipig	roasted young rice grains
kilís	to wash rice
buyok	to cook rice by pouring into water boiled beforehand
karawi	upland rice
kabisdak	an old variety of paddy rice with long, white grains
kawasdak	white rice with long, fine grains
lubang	an upland rice with big, round, reddish grains which ripens in 5 months
pita	an ordinary variety of rice with white grains
sangguwar	a kind of white, somewhat round-grained rice
wagwag	a variety of white paddy rice with strong panicles maturing late

thetwelve

LESSON 6: Existentials & Locatives

EXISTENTIALS

aduna ~ duna	presential (have now), general (have)
adia ~ dia	proximal (have here nearest to speaker)
ania ~ nia	medial (have here near to both)
anaa ~ naa	mesioproximal (have there near addressee)
atua ~ tua	distal (have there far from both)

Like the demonstratives, the existentials are connected to the object's location. "Aduna" is "general" in the sense that it isn't specific to a particular location. In colloquial speech, "naa" has become the "universal" existential for the reason that regardless of location it's the go-to preference and because of that further use of specific locatives is usually required to clarify the ambiguity.

Dunay paglaom.	There's hope (now).
Diay manók.	There's a/some chicken (here).
Niay mga bisita.	There are (some) visitors (here).
Naay luhà.	There's a/some teardrop(s) (there).
Tuay mainóm.	There are (some) drinks (there).

Naay paglaom.	There's hope.
Naay manók.	There's a/some chicken.
Naay mga bisita.	There are (some) visitors.
Naay luhà.	There's a/some teardrop(s).
Naay mainóm.	There's a/some drink(s).

Naa karóy paglaom.	There's hope (now).
Naa diríy manók.	There's a/some chicken (here).
Naa dinhiy mga bisita.	There are (some) visitors (here).
Naa diháy luhà.	There's a/some teardrop(s) (there).
Naa didtoy mainóm.	There are (some) drinks (there).

Contrast: Pronoun placement with "may" neutral existential.

May paglaom.	There's hope.
May manók.	There's a/some chicken.
May mga bisita.	There are (some) visitors.
May luhà.	There's a/some teardrop(s).
May mainóm.	There are (some) drinks.

Unlike the deictic existentials, "may" isn't location oriented making it "neutral" because it isn't bound to any space like "naa" except that "naa" requires "-y" if it has a <u>nonspecific</u> object.

The following are the construction of existentials with <u>specific</u> objects.

theptwelve

Duna ang paglaom.	The hope is here (now).
Dia ang manók.	The chicken is here.
Nia ang mga bisita.	The visitors are here.
Naa ang luhà.	The teardrops are there.
Tua ang mainóm.	The drinks are there.

Naa ang paglaom.	The hope is here/there (now).
Naa ang manók.	The chicken is here/there.
Naa ang mga bisita.	The visitors are here/there.
Naa ang luhà.	The teardrops are here/there.
Naa ang mainóm.	The drinks are here/there.

Naa karón* ang paglaom.	The hope is here/there (now).
Naa dirí ang manók.	The chicken is here.
Naa dinhi ang mga bisita.	The visitors are here.
Naa dihá ang luhà.	The teardrops are there.
Naa didto ang mainóm.	The drinks are there.

*For some reason, the locative “dirón” (this place now) didn’t survive into modern Cebuano.

The use of “ang” to indicate the existence of a specific object is ungrammatical with “may”.

May ang paglaom. ×	There’s hope.
May ang manók. ×	There’s a/some chicken.
May ang mga bisita. ×	There are (some) visitors.
May ang luhà. ×	There’s a/some teardrop(s).
May ang mainóm. ×	There are (some) drinks.

Using the pronouns and demonstratives, here are the sentence structures.

Duna koy paglaom.	I have hope (now).
Dia koy manók.	I have here a chicken.
Nia tay mga bisita.	We have here visitors.
Naa kay luhà.	You have there a teardrop.
Tua siláy mainóm.	They have there some drinks.

Again, with the “universal” but ambiguous “naa” and the need for a locative to compensate.

Naa koy paglaom.	I have hope.
Naa koy manók.	I have (here) a chicken.
Naa tay mga bisita.	We have (here) visitors.
Naa kay luhà.	You have (there) a teardrop.
Naa siláy mainóm.	They have (there) some drinks.
Naa ko karóy paglaom.	I have hope (now).

theotwelve

Naa ko diríy manók.	I have here a chicken.
Naa ta dinhiy mga bisita.	We have here visitors.
Naa ka diháy luhà.	You have there a teardrop.
Naa silá didtoy mainóm.	They have there some drinks.

Contrast: Pronoun placement with “may” neutral existential.

May paglaom ko.	I have hope.
May manók ko.	I have a chicken.
May mga bisita ta.	We have visitors.
May luhà ka.	You have a teardrop.
May mainóm silá.	They have some drinks.

Drills: Substitution

May papíl ko.	I have some paper.
___ papíl ___.	We (excl.) have some paper.
___ papíl ___.	We (incl.) have some paper.
___ papíl ___.	You (sng.) have some paper.
___ papíl ___.	You (pl.) have some paper.
___ papíl ___.	He/She has some paper.
___ papíl ___.	They have some paper.

Duna koy papíl.	I have some paper.
___ ___ papíl.	We (excl.) have here some paper.
___ ___ papíl.	We (incl.) have here some paper.
___ ___ papíl.	You (sng.) have there some paper.
___ ___ papíl.	You (pl.) have there some paper.
___ ___ papíl.	He/She has there some paper.
___ ___ papíl.	They have there some paper.

Walâ koy papíl.	I don’t have any paper.
___ ___ papíl.	We (excl.) don’t have any paper.
___ ___ papíl.	We (incl.) don’t have any paper.
___ ___ papíl.	You (sng.) don’t have any paper.
___ ___ papíl.	You (pl.) don’t have any paper.
___ ___ papíl.	He/She doesn’t have any paper.
___ ___ papíl.	They don’t have any paper.

_____ papíl.	There’s paper (now).	____ ang papíl.	The paper is here/there (now).
_____ papíl.	There’s paper (here).	____ ang papíl.	The paper is here.
_____ papíl.	There’s paper (here).	____ ang papíl.	The paper is here.
_____ papíl.	There’s paper (there).	____ ang papíl.	The paper is there.
_____ papíl.	There’s paper (there).	____ ang papíl.	The paper is there.

theptwelve

LOCATIVES

Past	Present	Future	
dirí	adia	arí	proximal (here nearest to speaker)
dinhi	ania	anhi	medial (here near to both)
dinhà ~ dihâ	anaa	anhà	mesioproximal (there near addressee)
didto	atua	adto	distal (there far from both)

The locatives are time dependent but the past set is the default or general set for the reason that optionally, especially for emphasis, the past set is also paired with the present and future sets as shown below. However, some dialects use the future set as the default. Also, the present set is exactly the same as the existentials.

General/Past	Present	Future
dirí	adia (dirí)	ari (dirí)
dinhi	ania (dinhi)	anhi (dinhi)
dinhà ~ dihâ	anaa (dinhà)	anhà (dinhà)
didto	atua (didto)	adto (didto)

Some linguistic papers call the “di-” forms as “oblique” because of its nature of being able to be used in different functions as the default locative regardless of tense.

Dirí si Manding.	Manding was here.
Dinhi siyá.	She was here.
Dinhà si Manding ug Duday.	Manding and Duday were there.
Didto silá.	They were there.
Dia (dirí) si Manding.	Manding is here.
Nia siyá (dinhi).	She is here.
Naa (dinhà) si Manding ug Duday.	Manding and Duday are there.
Tua silá (didto).	They are there.
Arí (dirí) si Manding *unyà*.	Manding will be here *later*.
Anhi siyá (dinhi) *unyà*.	She will be here *later*.
Anhà (dinhà) si Manding ug Duday *ugmà*.	Manding and Duday will be there *tomorrow*.
Adto silá (didto) *ugmà*.	They will be there *tomorrow*.

The future locatives usually depend on future temporals and verbs as shown below.

Arí mukaon si Manding *unyà*.	Manding will eat here *later*.
Anhi siyá mukaon *unyà*.	She will eat here *later*.
Anhà mangaon silá Manding ug Duday *ugmà*.	Manding and Duday will eat there *tomorrow*.
Adto silá mangaon *ugmà*.	They will eat there *tomorrow*.

NEGATIVES

Existential:	Walâ dirí	Was/is not here
	Walâ dinhi	Was/is not here
	Walâ dinhà	Was/is not there
	Walâ didto	Was/is not there
Predicative:	Dilì dirí	Not here
	Dilì dinhi	Not here
	Dilì dinhà	Not there
	Dilì didto	Not there

Drills:

_____ si Pasíng.	Pasing is not here.
____ si Pasíng _____.	Pasing is not there (near).
_____ si Philip.	Philip is not here.
____ si Philip _____.	Philip is not there (near).
_____ silá Britney ug Ace.	Britney and Ace are not here.
____ silá Britney ug Ace _____.	Britney and Ace are not there (far).
_____ silá Ináy ug Itáy.	Inay and Itay are not here.
____ silá Inay ug Itay _____.	Inay and Itay are not there (far).
____ siyá _____.	He/She is not here.
____ mi _____.	We are not there.
____ silá _____.	They are not here.
____ ka _____.	You are not there.
____ si Pasíng mukaon _____.	Pasing will not eat here (nearest).
____ siyá mukaon _____.	He will not eat here (near both).
____ si Lily mukaon _____.	Lily will not eat there (near).
____ siyá mukaon _____.	She will not eat there (far).
_____ matulog silá Britney.	Britney *(& company)* won't sleep here (nearest).
____ silá ____ matulog.	They won't sleep here (near both).
_____ matulog silá Payan.	Payan *(& company)* won't sleep there (near).
____ silá ____ matulog.	They won't sleep there (far).
____ mutambay ang tawo.	The man will hang around here.
____ mutambay _____ ang bisita.	The visitor will not hang around there.
____ muhapít si Miyor _____.	Mayor will not stop by here.
____ muhapít _____ silá Kapitán.	*Kapitan* will not stop by there.

theptiveive

INTERROGATIVES: Where?

Universal	Dialectal	
Diín?	Dis-a?	Where? (past)
Hain?	Sain?	Where? (present), which?
Asa?	Aha?	Where? (future)

The “Where?” interrogatives are also time-specific but in modern Cebuano, the most commonly used or “universal” are “asa” or “aha”. Nevertheless, there are many dialects that still use the other forms and still observe the time-distinction. There are also shortcuts in some dialects such as “ā” for “aha” and “hai/hay” for “hain”.

In conservative Cebuano, the locatives including their interrogatives use the subjunctive form of the verb which is more or less similar to the nonpast forms.

Traditional	Modern (Casual)	
Diín ka magdakô?	Asa ka nagdakô?	Where **did** you grow up?
Hain mo igabutáng?	Asa nimo ginabutáng?	Where **do** you put *it*?
Asa palitá?	Asa palitón?	Where **will** *it* be bought?

The traditional ones use the subjunctive verbs, the bottom two being “passives” (instrument and patient voices respectively), while in modern construction the verbs depend on the aspect used plus the tendency of using “asa” as the default.

Drills: Substitution

Diín siyá gikan?	Where did he come from?
____ ko nagpalít.	I bought *(something)* here.
____ ka natulog.	You slept here.
____ mi nangaon.	We ate there.
____ ta nangisdà.	We went fishing there.
Hain ka karón?	Where are you now?
____ ko sa among baláy.	I am here in our house.
____ ka sa Cebu.	You are here in Cebu.
____ mo sa baybay.	You are there at the seashore.
____ siyá sa Bohol.	She is there in Bohol.
Asa ka padulong?	Where will you be?
____ ko mukaon.	I will eat here.
____ ka mamasko.	You will spend Christmas here.
____ siyá ugmà.	He’ll be there tomorrow.
____ silá sunód simana.	They’ll be there next week.

theptwelve

Vocabulary: Food & Cooking (Pagkaon ug Pangluto)

tunô, gatâ	coconut milk
tinunoán, ginat-an	anything mainly cooked with coconut milk
bulád	dried fish
pinirito	anything fried, usually fish and chicken
law-oy	vegetable soup without fish, meat or fat
utan	any vegetable stir fried or cooked in coconut milk
tula	stew fish or chicken
paksiw, inun-onan	stew fish or meat in vinegar
adobo	meat (chicken, pork or beef) marinated in vinegar, soy sauce, garlic, & other spices, slowly cooked until it becomes tender and flavorful
kaldirita	stew goat meat & spices
humbà	dish made of pork hocks, feet & fat cooked long in a sauce of salt, vinegar, and condiments to soften and preserve it
lumpyà	egg roll with either meat or vegetable inside
(chicken) kari	chicken cooked in curry powder
linagà	meat boiled in water, also eggs
kinilaw	fish or seafood eaten raw, sometimes added w/ coconut milk & spices
sinugba	fish broiled over hot coals
iskabitsi	escabeche, fried fish with sour sauce
atsal/atsar	pickles made of shredded green papaya and various other vegetables cut in slivers, also the name given to various varieties of large peppers
arús kaldo	arroz caldo, rice porridge with chicken and with few vegetable chunks
paklay	dish made from goats' or dogs' entrails, cut up and sauteed w/ spices
dinugoán	dish prepared from the blood and the innards of a pig
sisig	made from pork jowl and ears (maskara), pork belly, and chicken liver, which is usually seasoned with calamansi, onions, and chili peppers
balbakuwa	dish mainly composed of beef or carabao skin and sometimes legs, tails, and ears stewed with bones and with spices
lapwa/laswa	to put something in boiling water, to sterilize, or for further cooking
dung-ag	to boil rice or any cereal or carbohydrate until cooked or dry
lugaw	rice porridge
samporado	rice porridge with chocolate and sugar
binignit	sweet soup made of root crops and bananas cooked in coconut milk together with various other starchy ingredients, jackfruits and flavoring and is usually cooked during Holy Week
puto	any cake made of steamed starches, coconut, and other ingredients
bingka/bibingka	rice cake made from finely grounded rice mixed w/ coconut milk, sugar
budbod, suman	sweet delicacy prepared from crushed ingredients (rice, corn, pili nut, millet, etc.) formed into sticks, wrapped in banana leaves, & steamed
shakoy	tidbit made of flour, and optionally eggs, formed into long slender pieces & deep fried in fat
dinangdang	plantains broiled over hot coals

LESSON 7: Prepositions, Directions, & Temporals

PREPOSITIONS

left	walá	above	itaás
right	tuó	under	ilalóm
front	atubangan	atop	ibabáw
back	likód	beneath	ubós
behind	luyó	upstairs	taas
beside	kilid	downstairs	silong
edge	daplin	inside, within	sulód
next to	tupád, tapad	outside	gawás
between	tungâ	near	dapít

When describing a location, the locative marker “sa” is used but if a preposition is used, it is not necessarily needed. The second “sa” in the examples below are not locative but temporal and will be discussed in detail in future lessons.

Sa luyó sa Ayala.	Behind Ayala.
Sa kilid sa UP Cebu.	Beside UP Cebu.
Sa atubangan sa simbahan.	In front of the church.
Sa gawás sa syudád.	Outside the city.

DIRECTIONS

<u>Land/Sea</u>: upstream, mountainward - ilaya
downstream, seaward - ilawód

<u>Cardinal</u>: North - Amihanán, Norte
South - Habagatán
East - Sidlakán, Silangan
West - Kasadpan

<u>Wind</u>:

North wind - Amihan	Northeast wind - Kabunghan
Easterly wind - Dumagsà	Northwest wind - Kanaway sa Amihan
South wind - Salatan	Southeast wind - Timog
West wind - Kanaway	Southwest wind - Habagat

Drills:

Sa akong _____.	On/To my left.	_____ sa Sugbò.	North of Cebu.
Sa imong _____.	On/To your right.	_____ sa Bohól.	South of Bohol
_____ sa tindahan.	In front of the store.	_____ sa lamisa.	On top of the table.
_____ sa SM.	At the back of SM.	_____ sa lingkoran.	Below the chair.

TEMPORALS

1. Fixed Time Division

   a. Hour (Oras) - Time-related numbers are in Spanish & “and” is written as “i” or “-y”.

alá una (1:00 - one o’clock)	alás trīs i midya (3:30)
alás dusi (12:00 - twelve o’clock)	alás dyīs kwarintay singko (10:45)

   b. Day (Adlaw)

Common		Less Used	
kaadlawon	dawn	kabuntagon	morning (as phase)
adlaw	day	kaudtohon	noontime (as phase)
buntag	morning	kahaponon	afternoon (as phase)
udto	noon	kagabhion	evening (as phase)
udtong tutok/larok	high noon	banagbanag	daybreak
palís	early afternoon	subáng	sunrise
hapon	late afternoon	salop	sunset
gabii	evening/night	salumsom	twilight
tungáng gabii	midnight	kilomkilom	dusk

   c. Week (Simana)

Dominggo (Duminggo)	Sunday	Hwebes (Huybis)	Thursday
Lunes (Lunis)	Monday	Byernes (Birnis)	Friday
Martes (Martis)	Tuesday	Sabadó	Saturday
Myerkules (Mirkulis)	Wednesday		

   d. Month (Bulan)

Enero (Iniro)	January	Hulyo	July
Pebrero (Pibriro)	February	Agosto (Agusto)	August
Marso	March	Septembre (Siptimre)	September
Abril	April	Oktobre (Oktubre)	October
Mayo	May	Nobembre (Nubimre)	November
Hunyo	June	Desembre (Disimre)	December

   e. Year (Tuig)

English	year twenty twenty four
English borrowing	yir twinti twinti por
Spanish borrowing	anyo dos mil baynti kwatro
Native equivalent	tuig duhá ka libo kaluhaán ug upát

threetwelve

2. Relative

karón	now	unyà	later
kaganina/kaganiha	earlier	ugmà	tomorrow
kagabii	last night	sunód ugmà	the next morrow
kagahapon	yesterday	sunód adlaw	the next day
kadtong usá ka adlaw	the other day	sunód	next
kasanghapon	ereyesterday	damlag	future, overmorrow
kadiyót	shortly	taodtaód	a while
dayon	immediately	kaniadto, sa una	before
bag-o(hay) pa/ra	recently	puhón	someday, in God's time
sa/niadtong miagi	last (time)	sa umalabot	in the coming (time)

• Karón - This (Present/Future)

karóng panahón - this time
karóng adlaw - this day, today
karóng buntag - this morning
karóng udto - this noon
karóng hapon - this afternoon
karóng gabii - this evening/night, tonight
karóng simana - this week
karóng bulan - this month
karóng tuig - this year
karóng Huybis - this Thursday
karóng Agosto - this August

karóng panahona - this time, nowadays
karóng adlawa - this particular day, today
karóng buntaga - this particular morning
karóng udtoha - this particular noon
karóng hapona - this particular afternoon
karóng gabhiona - this particular evening/night
karóng simanaha - this particular week
karóng bulana - this particular month
karóng tuiga - this particular year
karóng Huybisa - this particular Thursday
karóng Agostoha - this particular August

• Niadto/Kadto - That (Past)

(k)adtong adlaw - that day, today
(k)adtong buntag - that morning
(k)adtong udto - that noon
(k)adtong hapon - that afternoon
(k)adtong gabii - that evening/night
(k)adtong simana - that week
(k)adtong bulan - that month
(k)adtong tuig - that year
(k)adtong Huybis - that Thursday
(k)adtong Agosto - that August

(k)adtong adlawa - that particular day, today
(k)adtong buntaga - that particular morning
(k)adtong udtoha - that particular noon
(k)adtong hapona - that particular afternoon
(k)adtong gabhiona - that particular evening/night
(k)adtong simanaha - that particular week
(k)adtong bulana - that particular month
(k)adtong tuiga - that particular year
(k)adtong Huybis - that particular Thursday
(k)adtong Agostoha - that particular August

karón dayon - immediately right now
karóng taód-taód - later after a while

(k)adtong tungora - that particular moment
(k)adtong higayona - that particular instance

Inceptive

Along with “niadto/kadto,” the word “miagi” (went/pass by) is also used to refer to a past time or event. It is always suffixed with “-ng” which is the ligature “nga.” But when it is used, the particularizer “-a” can no longer be used.

(k)adtong miaging adlaw - that past day
(k)adtong miaging buntag - that past morning
(k)adtong miaging udto - that past noon
(k)adtong miaging hapon - that past afternoon
(k)adtong miaging gabii - that past evening/night
(k)adtong miaging simana - that past week
(k)adtong miaging bulan - that past month
(k)adtong miaging tuig - that past year
(k)adtong miaging Agosto - that past August
(k)adtong miaging Duminggo - that past Sunday

The word following “sunód” cannot be suffixed with the particularizer “-a” because “sunód” is not a demonstrative pronoun. For this phrasing, the complete form is “sa sunód nga …” but it’s often shortened as “sunód …”

sunód (panahón) - next time
sunód adlaw - next day, overmorrow
sunód buntag - next morning
sunód udto - next noon
sunód hapon - next afternoon
sunód gabii - next evening/night, tonight
sunód higayón - next instance, chance
sunód simana - next week
sunód bulan - next month
sunód tuig - next year
sunód Agosto - next August
sunód Duminggo - next Sunday

When referring to a particular in the future without the use of the demonstratives “karon” or “niadto/kadto” the temporal marker “sa” should be used.

sa alás dōs - at two o’clock
sa Sabadó - on Saturday
sa Disyimbre - in December
sa Pasko - on Christmas
sa sunód pista - on the next festival celebraion
sa sunód ting-ulán - in the next rainy season
sa sunód piniliáy - in the next election
sa sunód liga - in the next season of a league

INTERROGATIVE: When?

Kanus-a?	When? (past)
Anus-a?	When? (nonpast)

Like “Where?”, the interrogative “When?” is time based. Although, this distinction isn’t observed anymore by the majority of Cebuano speakers.

Kanus-a milinog?	When did the earthquake happen?
Kagabii.	Last night.
Kanus-a namatáy?	When did he/she/they/it die?
Karón.	Today.
Anus-a ang abri sa klase?	When is the opening of classes?
Sa Lunis.	On Monday.

Drills:

_____ ka miulî?	When did you come home?
_____ ka muulî?	When will you come home?
_____.	This Sunday.
_____.	Earlier this afternoon.
_____.	Later this evening.
_____ _____ _____.	Last Friday.
_____ _____.	Next week.
_____ sa _____.	Yesterday noon.
_____ sa _____.	Tomorrow morning.
Alá _____ sa _____.	One in the morning *(dawn).*
Alás _____ i _____ ko miulî.	I went home at 5:30 o'clock.
Alás _____ magsugod among klase.	Our classes start at seven o'clock.
_____ __ ko nahumán og kaon.	I just finished eating.
Pagkahilom sa _____.	How quiet is the evening.
_____ sa _____.	Early in the morning
Hapit na ang _____.	Midnight is nearing.
_____ lang.	Just a minute. (not literal)
Natawo ko sa tuig _____.	I was born in the year 2001.
_____ _____ sa _____.	Eighth month of the year.
_____ __ ____ nga _____ sa _____.	Twelfth day of the month.

_____, _____.	Not now, next week.
_____, _____.	Not yesterday, today.
_____, _____.	Not tonight, tomorrow night.
_____, _____.	Not this morning, this afternoon.
_____, _____.	Not at 12 o'clock, later at 5 pm.
_____, _____.	Not last year, next year.
_____, _____.	Not next month, this month.
_____, _____.	Not today, this Friday.
_____, _____.	Not on Monday, on Wednesday.
_____, _____.	Not in June, in July.
_____, _____.	Not later at noon, this midnight.

LESSON 8: Agent Voice Verbs (Punctual & Durative)

AUSTRONESIAN ALIGNMENT

Cebuano is a Philippine-type Austronesian language which means that it retained the four-voiced alignment unlike other Austronesian languages such as Malay, Maori or Hawaiian. Austronesian alignment differs from the morphosyntactic alignment in other languages such as English. English follows a nominative-accusative alignment where the subject of an intransitive verb is marked similarly to the agent of a transitive verb. In an ergative-accusative alignment the subject of the intransitive verb and the object of a transitive verb are both identified by the same marker.

	Nominative-Accusative	Ergative-Absolutive
Inransitive:	**She** saw.	**She** saw.
Transitive:	**She** saw ***him***.	***Her*** saw **he**.
	SUB-INT = SUB-TRA	SUB-INT = OBJ=TRA

The Austronesian alignment has a mix of both and more. It has 1 active (agent) and 3 passives (patient, referent and assistent). These four are usually called either “focus” or “voice”. The verb is conjugated with an affix that tells the role of the focused noun in a particular voice. And each voice has its own sets of affixes depending on the aspect and mood.

- AGENT VOICE
- PATIENT VOICE
- REFERENT VOICE
- ASSISTENT VOICE
    - Punctual
    - Durative
    - Distributive
    - Collective
    - Stative
    - Potential
    - Petitive
    - Social
        - ★ Completive
        - ★ Progressive
        - ★ Contemplative
        - ★ Infinitive
        - ★ Imperative
        - ★ Subjunctive
            - ➢ Singular
            - ➢ Plural

Plus, more affixes that can be stacked on top of all of them:
~ Causative
~ Mirative
~ Intensive
~ Reciprocal
~ Respective

And more fossilized affixes which are no longer productive but survived in use in some words.

theptwelve

For example, the “-i” suffix is a referent voice singular punctual imperative. Yes, one affix can carry this much information. In this lesson, we will be learning about the first two sets of the agent voice conjugation – the **punctual** and the **durative**.

PUNCTUAL SET

Traditional	Modern	
min-	mi-	past/completive
mina-	mi- ~ ga-	present/progressive
mu-	mu-	future/contemplative, habitual
-um-	mu-	infinitive, instructive, adverbial

Cebuano’s aspect system has been crumbling since the past/completive and present/progressive have merged in most dialects, but it hasn’t been totally reduced down to a merged system because the present/progressive forms in some sets are still distinctively used from the past/completive forms although their frequency varies in each dialect. Mostly those in Negros Oriental, South Cebu and Mindanao use them more often than the others (the rest of the Cebuano dialects in Visayas). Because of this conflation, some sets no longer have their distinct forms for the present/progressive from the past/completive. An example of this is the punctual set where the present/progressive borrows from the durative set “ga-”. Otherwise, an older convention is used by using “mi-” for both but the latter needs the help of a particle “pa” which indicates that an action continues to take place in the present.

1. **mi(n)-/ming- ~ mi-** (past/completive) - Other variations are “ni(ng)-” and “hing-”.

Mingkaon si Papa.	Dad ate.
Mikaon siyá.	He ate.
Ninghigdà si Mama.	Mom lay down.
Nihigdà siyá.	She lay down.

2. **mina- ~ mi- ~ ga--** (present/progressive)

Mikaon pa si Papa.	Dad eats. (Father is eating.)
Gakaón siyá.	He eats. (He is eating.)
Mihigdà pa si Mama.	Mother lies down. (Mother is lying down.)
Gahigdà siyá.	She lies down. (She is lying down.)

3. **mu-** (future/contemplative, habitual)

Mukaon si Papa.	Dad will eat.
Mukaon siyá.	He will eat.
Muhigdà si Mama.	Mom lies down. (habitual)
Muhigdà siyá.	She lies down. (habitual)

4. **-um- ~ mu-** (infinitive, conditional, instructive, adverbial)

Kamaó siyá mukaon.	He/She knows how to eat.
Kon mukaon ka…	If you eat…
Kumaon ka.	You eat.
Gusto ka muhigdà?	Do you want to lie down?
Dugay muhigdà.	Takes a long time to lie down. (adverbial)
Dalî ra muhigdà.	Just quick to lie down. (adverbial)

PROGRESSIVE VS. HABITUAL

Originally, the progressive aspect and the habitual mood are expressed by the same set of affixes. When the conflation of the past/completive and present/progressive aspects started in favor for the former, the reduced usage of the latter led to an almost 2-aspect system (past/present and future) which made way for the selection of a new habitual-expressing affix, that is the future/contemplative set of affixes. The dialects that retained the present/progressive affixes still use them as habituals. The dialects that didn't use the future/contemplative as habituals.

And as already mentioned above, the lost progressive affix for the agent voice punctual set had to borrow from the agent voice durative "ga-" so "ga-" is both present/progressive and habitual and "mu-" is both future/contemplative and habitual.

	Progressive/Habitual
Gakaón siyá og baboy.	She eats pork.
Gainóm siyá og tubâ.	He drinks palm wine.
Dilì silá gasimba.	They don't go to church.
Dilì silá gahikay iníg Pasko.	They don't prepare *(food)* on Christmas.

	Habitual	Future/Contemplative
Mukaon siyá og baboy.	She eats pork.	She will eat pork.
Muinóm siyá og tubâ.	He drinks palm wine.	He will drink palm wine.
Dilì silá musimba.	They don't go to church.	They will not go to church.
Dilì silá muhikay iníg Pasko.	They don't prepare *(food)* on Christmas.	They will not prepare *(food)* on Christmas.

MU- VS. MAG-

There have been many back and forths regarding the difference between these two sets in most Philippine-type Austronesian languages. Some verbs only take one over the other and some take both. The prevailing argument is that the former is "punctual" and the latter is "durative". The punctual is seen as a one-time single event while the durative is seen as a series of events. Others also propose that the punctual is more about tense than the durative which is aspect leaning while others argue for transitivity which we'll discuss later on in future lessons.

Milakát ko.	I walked.	Naglakát ko.	I was walking.
Galakát ko.	I walk.	Nag(a)lakát ko.	I am walking.
Mulakát ko.	I will walk.	Mag(a)lakát ko.	I will be walking.

DURATIVE SET

Traditional	Modern	
nag-	nag-	past, completive
nagá-	nag-/ga-	present, progressive
magá-	mag-	future, contemplative, habitual
mag-	mag-	infinitive, conditional, instructive, adverbial

In the durative sets, the present/progressive is distinguished from the past/completive usually with the use of the infix "-a-". This is commonly dropped for two main reasons: (1) because of the conflation between the past/completive and present/progressive; and (2) because it makes the verb one syllable lengthier. Cebuano is notorious for its shortcuts and for being "lazy" (which is the probable reason why the syllabic verbal reduplication became obsolete) & this one is no exception.

1. **nag-** (past/completive)

Nagsulát si Tatay.	Father was writing.
Nagsulát siyá.	He was writing.
Naglutò si Nanay.	Mom was cooking.
Naglutò siyá.	She was cooking.

2. **nagá- ~ nag-/ga-** (present/progressive)

Nagasulát si Tatay.	Father is writing.
Gasulát siyá.	He is writing.
Nagalutò si Nanay.	Mother is cooking.
Naglutò siyá.	She is cooking.

3. **magá- ~ mag-** (future/contemplative, habitual)

Magasulát si Tatay.	Father will be writing.
Magsulát siyá.	He will be writing.
Maglutò si Nanay.	Mother cooks. (habitual)
Maglutò siyá.	She cooks. (habitual)

4. **mag-** (infinitive, conditional, instructive, adverbial)

Kinahanglan siyá magdalî.	He/She needs to hurry.
Gusto ka magparì?	Do you want to be a priest?
Kon magdulà ka…	If you play…
Magpalít ka og asín.	You buy some salt.
Dugay magkaón.	Takes too long to eat. (adverbial)
Bakô magtindog.	Hunched over when standing. (adverbial)

Body (crouch down)	hupô
Body (bend over)	yukô
Body (bend backward)	liad
Body (brood, idle)	ugtok
Body (climb up)	kalatkat
Body (dance)	sayaw
Body (dive)	salom
Body (dodge)	liháy
Body (get up from lying position)	bakod/bangon
Body (keep still in deep thought)	hinuktok
Body (shake in electrocution)	kirig
Body (shake in cold/nervousness)	kurog
Body (shake s.o. emotionally upset)	siging
Body (shrink/curl oneself)	tikû-kò/lukò
Body (stand up)	tindog/baróg
Body (swim)	langóy
Body (walk away with speed)	supót
Body (wallow)	lunang
Buttocks (sticking out)	tuwád
Buttocks (twerk)	igwad
Buttocks (wriggle)	kibot
Cheeks (swat hands on)	hinampilíng
Ear (stick out)	tangkag
Eyes (open)	buklat
Eyes (open wide)	lurát
Eyes (close)	piyóng
Eyes (glance)	siplat
Eyes (glare wide open)	siga
Eyes (look up w/o moving head)	yahát
Eyes (movement closed)	pitók
Eyes (movement close-open)	pirát
Eyes (wink)	kidhat
Eyebrows (raise)	kundat
Eyelids (draw down, make face)	pikát
Face (chuckle)	agik-ik
Face (grimace)	kusmaot
Face (grin)	ngilít
Face (laugh)	katawa
Face (laugh boisterously)	buhakhak
Face (pout, frown)	musgot
Face (scowl)	mugtok
Face (unsmiling)	mug-ot
Face/Lips (smile showing teeth)	ngisi
Face/Lips (smile uglily)	ngislit
Face/Lips (smile w/o showing teeth)	hiyóm
Feet (propel)	sikad
Feet (kick)	patid
Feet (kick with the sole)	banyak
Feet (shuffle against surface)	sagudsod
Feet (step foot in)	tamak
Feet (step on)	tunob
Feet (step on forcefully)	yatak
Feet (stomp)	undak
Feet (tiptoe)	kinto
Fingers/toes (twitch)	kitoy
Fingers (crack knuckles)	lutô
Fingers (flick)	pitík
Fingers (knock)	tuktok
Fingers (pinch off tiny portion)	kusnit

Fingers (pinch to hurt)	kusî/kunot
Fingers (press)	pislit
Fingers (press forcefully)	duót
Fingers (scratch an itch)	kalot
Fingers (snap)	litík
Fingers (sprinkle with a flick)	witík
Fingers (squeeze lice w/ thumbnail)	tirós/irók
Fingers (stretch to measure)	dangaw
Fingers (tap)	tuplok
Fist (punch, box)	sumbag
Hands (close, clench)	kumò
Hands (open)	buklad
Hands (massage)	hilot
Hands (massage gently)	hapyod
Hands (pin behind back)	himaklid
Hands (rap someone's head)	dukól
Hands (rumple/rub to wash)	kusokuso
Hands (signal to come)	kampay
Hands (slap)	dapóg/laparo
Hands (squeeze, put pressure)	pisil
Hands (stroke gently)	hapuhap
Hands (wave)	kawáy
Head (bow)	dukô
Head (nod)	tangdò
Head (shake left and right)	lingô
Head (shrink down into the neck)	uklò
Head (turn sideways)	lingì
Head (turn up to glance)	yanghag
Head (turn upwards)	hangád
Hips (sway)	kiay
Knees (kneel)	luhód
Legs (bowlegged)	bakáng
Legs (crossed on knees)	hinambid
Legs (knock-kneed)	kimpì
Legs (spread apart)	tikangkang
Legs (spread wide open)	bikâ-kà
Legs (straighten)	tuy-od
Legs (stride, step across)	lakang
Legs (tread)	taak
Legs (wade)	ubog
Legs (walk apart)	kaang
Legs (walk with jerking motion)	ingka-ingka
Lips (mumble rapidly)	kutib
Lips (point)	kimod
Lips (sneer)	yam-id
Lower body (sit)	lingkod
Lower body (thrust)	kiyód
Lower body (squat)	pungkò
Lower body (lay on the ground)	yakâ/lubóg
Mouth (open)	ngangá
Mouth (close)	tak-om
Mouth (chew)	usap
Mouth (breathe heavily)	hangos
Mouth (gargle)	limugmog
Mouth (pant for breath)	hangak
Mouth (put on edge of glass to drink)	tungab
Mouth (sigh)	hupaw
Mouth (sip)	higop
Mouth (suck in)	suyop
Mouth (suck off)	supsop
Mouth (spit/eject)	luwâ
Mouth (whisper on one's ear)	hunghong
Mouth (whisper when speaking)	hagawhaw
Mouth (whistle)	taghoy
Mouth (yawn)	huy-ab
Mouth/Nose (breathe)	ginhawa
Mouth/Nose (sneeze)	hatsing
Neck (to crane up)	tuyhakaw
Nose (become large)	lisngag
Nose (sticking out)	taluytoy
Nose (sniff)	simhot
Nose (sniffle)	hingos
Nose (snort out in displeasure)	kusmo
Nose (blow)	sikma
Stomach (pull in)	hiyák
Stomach (stick out)	busyad
Tail (waggle)	kuyakoy
Teeth (bite to hurt)	paak
Teeth (bite to snap)	pang-it
Teeth (bite, hold, drag away)	tangag
Teeth (bite on stalk)	pang-os
Teeth (hissing call)	sitsit
Throat (belch)	dug-ab
Throat (clear)	igham
Throat (swallow solids)	tulón/lamóy
Throat (swallow liquids)	lad-ok
Tongue (lick)	tilap/tilà
Tongue (clack)	taklà
Tongue (click in admonition)	tagû-tò
Tongue (stick out)	diwal

Preliminary

LESSON 9: Genitive, Oblique & Locative Markers

GENITIVE CASE MARKERS

SINGULAR		PLURAL		
Preposed	Postposed	Preposed	Postposed	
kang	ni	kanila ~ ila	nila	personal
sa*	sa	sa mga*	sa mga	general specific
og*	og	og mga*	og mga	general nonspecific

The genitive markers indicate that the proceeding noun is the agent, possessor or close associate of the subject or the focused noun. The personal set marks personal names while the general set marks general or common nouns. The preposed general sets aren't common except when you're responding to a question that seeks confirmation or clarification.

Kang Ansa	Ansa's
Kang Doming	Doming's
Kanila Ansa ug Doming	Ansa and Doming's
Ila Ansa ug Doming	Ansa and Doming's
Kang Ansa nga iríng	Ansa's cat
Kang Doming nga iríng	Dodong's cat
Kanila Ansa ug Doming nga iríng	Ansa and Doming's cat
Ila Ansa ug Dodong nga iríng	Ansa and Doming's cat
Iríng ni Ansa	Ansa's cat
Iríng ni Doming	Dodong's cat
Iríng nila Ansa ug Doming	Ansa and Dodong's cat
Sa lalaki	Of the man's
Sa babaye	Of the woman's
Sa lalaki ug babaye	Of the man and woman's
Sa mga lalaki ug babaye	Of the men and women's
Sa lalaki nga irô	Of the man's dog
Sa babayi nga irô	Of the woman's dog
Sa lalaki ug babaye nga irô	Of the man and woman's dog
Sa mga lalaki ug babaye nga irô	Of the men and women's dog
Irô sa lalaki	Dog of the man
Irô sa babaye	Dog of the woman
Irô sa lalaki ug babaye	Dog of the man and woman
Irô sa mga lalaki ug babaye	Dog of the men and women

theptwelve

OBLIQUE CASE MARKERS

Singular	Plural	
kang	kanila ~ (sa) ila	personal
sa	sa mga	general specific
og	og mga	general nonspecific

The oblique case markers indicate that the proceeding noun is the recipient of the action. The personal set marks personal names while the general set marks general or common nouns. Their English equivalents are the prepositions “to”, “for”, “on”, “about”. The prepositions “for” and “about” are usually preceded by conjunctions “alang/para” and “mahitungod/bahin”.

Kang Ansa	To/for/on/about Ansa
Kang Dodong	To/for/on/about Dodong
Kanila Ansa ug Dodong	To/for/on/about Ansa and Dodong
(Sa) ila Ansa ug Dodong	To/for/on/about Ansa and Dodong
Kang Ansa nga iríng	To/for/on/about Ansa’s cat
Kang Dodong nga iríng	To/for/on/about Dodong’s cat
Kanila Ansa ug Dodong nga iríng	To/for/on/about Ansa and Dodong’s cat
Ila Ansa ug Dodong nga iríng	To/for/on/about Ansa and Dodong’s cat
Para kang Ansa nga iríng	For Ansa’s cat
Bahin kang Dodong nga iríng	About Dodong’s cat
Para kang Ansa ug Dodong nga iríng	For Ansa and Dodong’s cat
Bahin kang Ansa ug Dodong nga iríng	About Ansa and Dodong’s cat
Sa lalaki	To/for/on/about the man
Sa babaye	To/for/on/about the woman
Sa lalaki ug babaye	To/for/on/about the man and woman
Sa mga lalaki ug babaye	To/for/on/about the men and women
Sa lalaki nga irô	To/for/on/about the man’s dog
Sa babayi nga irô	To/for/on/about the woman’s dog
Sa lalaki ug babaye nga irô	To/for/on/about the man and woman’s dog
Sa mga lalaki ug babaye nga irô	To/for/on/about the men and women’s dog
Para sa iríng <u>ni</u> Asa.	For the cat of Ansa
Bahin sa iríng <u>nila</u> Ansa ug Dodong	About the cat of Ansa and Dodong
Para sa iríng <u>sa</u> lalaki	For the cat of the man
Bahin sa iríng <u>sa</u> lalaki ug babaye	About the cat of the man and woman
Bahin sa iríng <u>sa</u> mga lalaki ug babaye	About the cat of the men and women

The <u>underlined</u> words in are not oblique but genitive markers as noticeably translated as “of”.

thepotwelve

LOCATIVE MARKER

The locative marker is “sa”. It must be obvious by now that there are so many kinds of “sa” in the Cebuano language. Even as native speakers it sometimes gets confusing, but context helps a lot. Reusing the examples in Lesson 6, the locative marker adds specific information to the locative deictics.

Dirí si Manding sa baláy.	Manding was here in the house.
Dinhi siyá sa baryo.	She was here in the barrio.
Dinhà si Manding ug Duday sa Metro Manila.	Manding and Duday were there in Metro Manila.
Didto silá sa baybayon.	They were there at the beach.
Dia si Manding sa baláy.	Manding is here in the house.
Nia siyá sa baryo.	She is here in the barrio.
Naa si Manding ug Duday. sa Metro Manila.	Manding and Duday are there. in Metro Manila.
Tua silá sa baybayon.	They are there at the beach.
Arí si Manding sa baláy *unya*.	Manding will be here in the house *later*.
Anhi siyá sa baryo *unya*.	She will be here in the barrio *later*.
Anhà si Manding ug Duday sa Metro Manila *ugma.*	Manding and Duday will be there in Metro Manila *tomorrow*.
Adto silá sa baybayon *ugma*.	They will be there at the beach *tomorrow*.

NEGATIVES

Existential:	Walâ dirí sa balay.	Was/is not here in the house.
	Walâ dinhi sa baryo.	Was/is not here in the barrio.
	Walâ dinhà sa Metro Manila.	Was/is not there in Metro Manila.
	Walâ didto sa baybayon.	Was/is not there at the beach.
Predicatiive:	Dilì dirí sa balay.	Not here in the house.
	Dilì dinhi sa baryo.	Not here in the barrio.
	Dilì dinhà sa Metro Manila.	Not there in Metro Manila.
	Dilì didto sa baybayon	Not there at the beach.

INTERROGATIVES

TRADITIONAL		MODERN		
Singular	Plural	Singular	Plural	
Ninsa?	Nainsa?	Ni kinsa?	Nila kinsa?	Whose? (postposed)
Kaninsa?	Kainsa?	Kang kinsa?	(Sa) ila kinsa?	Whose? (preposed), To/for whom?
Sa unsa?	Sa mga unsa?	Sa unsa?	Sa mga unsa?	Of/by what? (specific), To/for what?
Og unsa?	Og mga unsa?	Og unsa?	Og mga unsa?	Of/by what? (nonspecific), To/for what?

thesotweive

The traditional or “old” forms are always included in this book especially in the pronouns and demonstratives because in old Cebuano, there was always a consistent pattern with the markers attached to functor roots. And it is imperative that the learner should be exposed to both forms as part of their learning of the language because not everything has to be in casual speech nor in formal/dated speech at all times. In reality it’s a mix of both. As a summary, refer to the tables below.

Singular	Plural	
si	sa	nominative/absolutive
ni	na	genitive/ergative
kang	ka	oblique

CEBUANO PRONOUNS						
NOMINATIVE		GENITIVE		OBLIQUE		Person
OLD	MODERN	OLD	MODERN	OLD	MODERN	
akó	akó ~ ko	(n)akò, ko, ta	(n)akò, ko, ta	kanakò	‘nakò, sa akò	1ps sng.
kamí	kamí ~ mi	(n)amò	(n)amò	kanamò	‘namò, sa amò	1ps pl. excl.
kitá	kitá ~ ta	(n)atò, ta	(n)atò	kanatò	‘natò, sa atò	1ps pl. incl.
ikáw ~ ka	ikáw ~ ka	(n)imo, mo	(n)imo	kanimo	‘nimo, sa imo	2ps sng.
kamó	kamó ~ mo	(n)inyo	(n)inyo	kaninyo	‘ninyo, sa inyo	2ps pl.
siyá	siyá ~ sya	(n)iya, na	(n)iya	kaniya	‘niya, sa iya	3ps sng.
silá	silá	(n)ila	(n)ila	kanila	‘nila, sa ila	3ps pl.

CEBUANO DEMONSTRATIVES						
NOMINATIVE		GENITIVE		OBLIQUE		Location
OLD	MODERN	OLD	MODERN	OLD	MODERN	
siarí (sng.) saarí (pl.)	kirí/karí	niari (sng.) naari (pl.)	(ni)iri/ari	kan-ari (sng.) kaari (pl.)	(ni)iri/ari	proximal
siiní (sng.) sainí (pl.)	kiní/kaní	niini (sng.) naini (pl.)	(ni)ini/ani	kan-ini (sng.) kaini (pl.)	(ni)ini/ani	medial
sianâ (sng.) saanâ (pl.)	kanâ	nianà (sng.) naanà (pl.)	(ni)anà	kan-anà (sng.) kaanà (pl.)	(ni)anà	mesio-proximal
siadto (sng.) saadto (pl.)	kadto kató	niadto (sng.) naadto (pl.)	(ni)adto (ni)ato	kan-adto (sng.) kaadto (pl.)	(ni)adto (ni)ato	distal

Personal GENITIVE: Proposed “Whose?”

Kaninsang anák?	Whose child?
Kang kinsang anák?	
Kang Birting nga anák.	Birting’s child.

Personal GENITIVE: Postposed “Whose?”

Anák ninsa?	Child of whom?
Anák ni kinsa?	
Anák ni Birting.	Child of Birting.

Personal OBLIQUE: “To/For/On/About/Regarding Whom?”

Ngadto kaninsa?	To whom?
Para kaninsa?	For whom?
Bahin kaninsa?	About whom?
Ngadto kang Birting.	To Birting.
Para kang Birting.	For Birting.
Bahin kang Birting.	About Birting.

The non-Spanish derived word for “for” is “alang” but it’s not common in day to day speech. Other words related to “about”, “regarding” or “pertaining” are “mahitungod” and “parte/parti”.

General GENITIVE: Specific “Of/By What?”

Anák sa unsa?	Child of the what?
Anák sa parì.	Child of a priest. (The priest’s child.)

General GENITIVE: Nonspecific “Of/By What?”

Anák og unsa?	Child of a what?
Anák og parì.	Child of a priest. (A priest’s child.)

General OBLIQUE: “To/For/On/About/Regarding What?”

Ngadto sa unsa?	To (the) what?
Para sa unsa?	For (the) what?
Bahin sa unsa?	About (the) what?
Ngadto sa parì.	To the priest.
Para sa parì.	For the priest.
Bahin sa parì.	About the priest.

Vocabulary: Mouth & Teeth

ngipon	tooth
tigpod	brittle tooth
busngì	buck-toothed
tangó	canine tooth
hingò	loose tooth
bag-ang	molar tooth
pangág	lacking teeth
salangasag	having overlapping teeth
unto	any of the four front teeth
basngag	toothless
lungág	cavity
alingagngag	upper part of throat
dilà	tongue
lagós	gum
luás, sungáw	gum sore
kî-kì	food particle in teeth
ginhawa	breath

Vocabulary: “One”

usá	one
usa	group into one
usahay	sometimes
usá ug usá (usá’g usá)	each and every one
hiusa	unite
inusara	be alone, by oneself
kausá/kas-a	once
tag-usa, usá-usá	one each
tagsa	each/apiece
talagsa	seldom
talagsaón	rare
tinagsa	one at a time
igtagsa	first cousin
magtagsa	first cousins
ulusahon	unique
kausâ/kag-usâ	first time ever or in a long time

theptwelve

LESSON 10: Transitivity & Verbal Substitution

TRANSITIVITY

Transitivity is a grammatical property of verbs where a verb needs a direct object in *transition*. Therefore, a transitive verb has an agent and a patient (or non-agent) involved. An intransitive verb only needs one role - the agent. It does not need a patient for the action to be actualized. This is called "unergative", an intransitive verb that lacks an object or patient. However, there are also intransitive verbs that lack a subject or agent patient. These are called "unaccusative" or also known as "change-of-state" verbs. Some verbs are inherently intransitive or transitive, some can be both.

Another thing to take note of is that Cebuano is mainly a VSO (Verb Subject Object) language compared to English being mainly an SVO (Subject Verb Object) language.

(Ergative Intransitive)	**Mina** ate.	Mikaon **si Mina**.
(Accusative Intransitive)	*Mina* got fat.	Mitambok *si Mina*.
(Transitive)	**Mina** ate *bread*.	Mikaon **si Mina** *og tinapay.*

Bold: agent Underlined: subject/focus *Italicized*: patient/object

Ergative Intransitive:	"Mina" is both the **agent** and subject. There is no *patient*.
Accusative Intransitive:	There is no **agent**. "Mina" is both the subject and *patient*.
Transitive:	"Mina" is both the **agent** and subject. "Tinapay" is the *patient*.

MU- VS. MAG-

Another noted difference between the mi- and mag-, aside from being punctual or durative respectively, is transitivity. Both mi- and mag- can take both transitive and intransitive verbs but for verbs that are incompatible with either one or the other the difference is evident and it becomes apparent in their implied meanings.

Verb	Intransitive	Transitive	Verb	Intransitive	Transitive
mulakáw	to walk	∅	maglakáw	to be walking	to walk s.t.
mubalik	to return	∅	magbalik	∅	to return s.t.
mutumba	∅	to fall s.t. over	magtumba	∅	to fall s.t. over
mudamgo	∅	∅	magdamgo	∅	to dream s.t.
mukaon	to eat	to eat s.t.	magkaón	to be eating	to eat s.t.
muinóm	to drink	to drink s.t.	mag-inóm	to be drinking	to drink s.t.
mulabay	to throw	to throw s.t.	maglabay	∅	to throw s.t.
musulód	to enter	∅	magsulód	∅	to put s.t. in
mugawás	to exit	∅	maggawás	∅	to bring s.t. out
muampò	to pray	to pray for s.t.	mag-ampò	to be praying	to pray for s.t.
mutan-aw	to watch	to watch s.t.	magtan-aw	to be watching	to watch s.t.

thepotwelve

DISTRIBUTIVE SET

Traditional	Modern	
naN-, nagpaN-	naN-	past, completive
naN-, nagapaN-	naN-, gapaN-	present, progressive
maN-, magapaN-	maN-	future, contemplative, habitual
maN-, magpaN-	maN-	infinitive, conditional, instructive, adverbial

Many of the aspects and mood already merged in old Cebuano and this is evident in sets like this one here in the distributive. Like any living language, speakers are always able to devise ways to make distinctions for something ambiguous. They combined the distributive with the durative and the result are those on the right (under the traditional forms) to compensate for the loss of aspectual reduplication. In modern Cebuano, only the present/progressive form “gapaN-” is still used to some degree. Some are occasionally used but with a new intensive (and/or successive) connotation and are usually stressed on the ultimate (except in closed penultimates), unlike those uncombined which are purely distributive.

nagpanukád (be on foothold)	nagpangayô (be asking in desperation)
nagpaniláp (be licking in anticipation)	nagpangilát (for lightning to be intensive)
nagpangitâ (be looking everywhere)	nagpanlad-ok (be gulping down saliva)
nagpanawág (be calling with eagerness)	nagpangligî (be turning the head here & there)

1. **naN-** (past/completive)

Nangawat si Dimna.	Dimna was stealing. (Dimna stole something.)
Nangawat siyá.	She was stealing. (She stole something.)
Namista si Dimna.	Dimna attended a feast day celebration.
Namista siyá.	She attended a feast day celebration.

2. **naN-, gapaN-** (present/progressive)

Nanablig si Glaiza.	Glaiza is splashing water (on herself).
Gapanablig siyá.	She is splashing water (on herself).
Nanghugas si Glaiza.	Glaiza was washing dishes.
Gapanghugas siyá.	She was washing dishes.

3. **maN-** (future/contemplative, habitual)

Mangayam kó unyà.	I will be hunting later.
Manghayhay siyá karón.	He/She will hang clothes now.
Mananóm mi sa umá.	We plant at the farm. (habitual)
Manilhig ba ka?	Do you sweep? (habitual)

4. **maN-** (infinitive, conditional, instructive, adverbial)

Kinahanglan siyáng manghulám.	He/She needs to borrow.
Gusto ka mananghid?	Do you want to ask permission?
Kon manawag ka…	If you call…
Mamalong ka og sugâ.	You turn off the light(s).
Tagdugáy mamisbis.	Takes too long to water plants. (adverbial)
Tapolán mangità.	Lazy to search. (adverbial)

MU- VS. MAG- VS. MAN-

Some verbs are not compatible with all three or at least not as commonly used in one or two than the other affix(es).

Volitive - with intention	Stative - state of the focus	Plurative - multiple agents
Punctual - single event	Durative - series of events	Distributive - multiple objects

MU-	MAG-	MAN-
Volitive	Stative	Plurative
Punctual	Durative	Distributive

- <u>MU-</u>
  Volitive mudalagan (to willfully run)
  Punctual mudalagan (to run briefly)
  Habitual mudalagan (to run habitually/tendencially)

- <u>MAG-</u>
  Stative magdalagán (to be in a running state)
  Durative magdalagán (to be running for some time)
  Habitual magdalagán (to be habitually running)

- <u>MAN-</u>
  Plurative manalagan (to run including multiple agents)
  Distributive manalagan (to run multiple objects/patients)
  Habitual manalagan (to run habitually including multiple agents/patients)

The mag- forms with the meaning “to be verbing” or “to be in a verbing state” (most of the time gerunds ending in -ing) tend to be stressed at the ultimate as opposed to the other two sets.

mikaon	magkaón	mangaon
migukod	maggukód	manggukod
misiga	magsigá	maniga
mikalayo	magkalayó	mangalayo

VERBAL SUBSTITUTION

Verbal substitution is the replacement of the actual verb with the object as its substitute. Most of the time, if not always, this happens in the durative and distributive sets.

Musayaw og kuratsa.	(Will/To) be dancing curacha.
Mukuratsa.	(Will/To) curacha.
Mutan-aw og sini.	(Will/To) watch cinema.
Musini.	(Will/To) cinema.
Mukaon og nukos.	Eats squid.
Munukos.	(Eats) squid.
Magdulà og ML.	(Will/To) be playing Mobile Legends.
MagML.	(Will/To) be MLing.
Magbasa-basa sa Facebook.	(Will/To) be scrolling through Facebook.
MagFacebook.	(Will/To) be Facebooking.
Maglutò og pansit.	(Will/To) be cooking *pansit*.
Magpansit.	(Will/To) be having *pansit*.
Magsul-ob og putî.	(Will/To) be wearing white.
Magputî.	(Will/To) be in white.
Magsakáy og dyīp.	(Will/To) be riding on a jeepney.
Magdyīp.	(Will/To) be on a jeepney.
Manakóp og isdà.	(Will/To) be catching fish.
Mangisdà.	(Will/To) be fishing.
Mangalot og kamote.	(Will/To) be digging sweet potato.
Mangamote.	(Will/To) be sweet potato-gathering.
Manulong og pista.	(Will/To) be “invading” a feast celebration.
Mamista.	(Will/To) be going to a feast celebration.
Manguhà og butóng.	(Will/To) be getting young coconut fruits.
Mamutóng.	(Will/To) be having young coconuts fruits.s
Manghidhid og pulbo.	(Will/To) be applying face powder.
Mamulbo.	(Will/To) be wearing face powder.

theptwelve

VERBAL NEGATIVES

Past:	Walâ mutubág.	Did not answer.
	Walâ magpalít.	Did not buy or Was not buying.
	Walâ manalod.	Did not catch or Was not catching falling water.
Present:	Walâ gatubág.	Does not answer.
	Walâ gapalít.	Does not buy or Is not buying.
	Walâ gapanalod.	Does not catch or Is not catching falling water.
Future:	Dilì mutubág.	Will not answer.
	Dilì magpalít.	Will not buy or Will not be buying.
	Dilì manalod.	Will not catch or Will not be catching falling water.

As pointed out previously, in conservative form the past verbal negative is partnered with what's supposedly a nonpast verb. In modern Cebuano, speakers tend to use the actual past/completive forms to partner with the past verbal negative.

Traditional/Conservative	Modern/Colloquial	English
Walâ mugawás.	Walâ nigawás.	Did not answer.
Walâ mutuo.	Walâ nituo.	Did not believe.
Walâ mubalik.	Walâ nibalik.	Did not come back.
Walâ mubayad.	Walâ nibayad.	Did not pay.
Walâ muadto.	Walâ niadto.	Did not go (there).
Walâ maghulát.	Walâ naghulát.	Did not wait.
Walâ magsugod.	Walâ nagsugod.	Did not start.
Walâ magtan-aw.	Walâ nagtan-aw.	Did not look.
Walâ mag-ilis.	Walâ nag-ilis.	Did not change clothes.
Walâ magdung-ag.	Walâ nagdung-ag.	Did not cook rice.
Walâ magbagá.	Walâ nagbagá.	Was not
Walâ magsapatós.	Walâ nagsapatós.	Was not wearing shoes.
Walâ magsunód.	Walâ nagsunód.	Was not following.
Walâ magtubód.	Walâ nagtubód.	Was not leaking.
Walâ maggukód.	Walâ naggukód.	Was not chasing.
Walâ manalod.	Walâ nanalod.	Did not
Walâ mananghid.	Walâ nananghid.	Did not ask permission.
Walâ maminaw.	Walâ naminaw.	Did not listen.
Walâ manghugas.	Walâ nanghugas.	Did not wash dishes.
Walâ mamisbis.	Walâ namisbis.	Did not water plants.

LESSON 11: Agent Voice (Stative & Potential)

Stative	Potential	
na-	naka-	past, completive
na-	naka-	present, progressive
ma-	maka-	future, contemplative, habitual
ma-	maka-	infinitive, conditional, instructive, adverbial

STATIVE

The stative verb from its name describes a state. “To verb” using a stative conjugation is “to be in a particular state”. There are two kinds of statives - volitional and nonvolitional. The first three below can be both. The rest are purely nonvolitional. Volition means “the ability of using one’s will”. Volitional is sometimes interchanged with the word “accidental”.

Stative Verb	Volitional	Nonvolitional
naligò `	took a bath	is/was taking a bath
nalibáng	defecated	is/was defecating
natulog	slept	is/was sleeping
nahibulong	∅	is/was perplexed or in awe
natingala	∅	is/was wondering
nakurát	∅	is/was shocked or surprised
nasukô	∅	is/was mad or angry
nalipay	∅	is/was happy
nasubô	∅	is/was sad
nahadlok	∅	is/was afraid
nalisang	∅	is/was frightened

POTENTIAL (mu- Compatible)

Potential verbs talk about how the action has “the potential to be verbed”. It is divided into two - the abilitative (able to be verbed) and accidental/unintentional (verbed without one’s will). The following are the agent voice potential verbs in the mu- set.

Potential Verb	Abilitative	Accidental
nakaligô `	is/was able to take a bath	accidentally took a bath
nakalibáng	is/was able to defecate	accidentally defecated
nakatulóg	is/was able to sleep	accidentally slept
nakakaón	is/was able to eat	accidentally ate
nakainóm	is/was able to drink	accidentally drank
nakasulód	is/was able to enter	accidentally entered
nakagawás	is/was able to go out	accidentally went out

theptwelve

POTENTIAL (mag- Compatible)

Parallel to the mu- set are the potential verbs above. Similarly, parallel to the mag- set are the potential verbs below. They usually indicate transitive verbs. In modern Cebuano, the makag- forms are no longer used. Everything is now maka- in whatever kind of speech be it casual or formal.

Potential Verb	Abilitative	Accidental
nakapalít	is/was able to buy	accidentally bought
nakalutò	is/was able to cook	accidentally cooked
nakabutár	is/was able to vote	accidentally voted
nakaandam	is/was able to prepare	accidentally prepared
nakahatag	is/was able to give	accidentally gave
nakasulti	is/was able to speak	accidentally spoke
nakasugò	is/was able to instruct	accidentally instructed to do s.t.
nakahulát	is/was able to wait	accidentally waited
nakahipos	is/was able to tidy up	accidentally tidied up
nakasumbag	is/was able to punch	accidentally punched
nakabayad	is/was able to pay	accidentally paid
nakabutáng	is/was able to put s.t.	accidentally put s.t.
nakasinggit	is/was able to shout	accidentally shouted

VERBAL SUBSTITUTION (ma-)

This kind of “ma-” is derived from “magin-” in old Cebuano which has the same meaning as “mahimo” in modern Cebuano which means “to become”.

mahimong datò	madatò	become rich
mahimong pubre	mapubre	become poor
mahimong brāyt	mabrāyt	become smart
mahimong bugò	mabugò	become dumb
mahimong putî	maputî	become white-skinned
mahimong itóm	maitóm	become black-skinned
mahimong maistro	mamaistro	become a (male) teacher
mahimong artista	maartista	become an artist
mahimong pinóy	mapinóy	become Filipino
mahimong bisayâ	mabisayâ	become Visayan
mahimong irô	mairô	become a dog
mahimong sundalo	masundalo	become a soldier
mahimong artista	maartista	become an artist
mahimong presidente	mapresidente	become a president
mahimong buang	mabuang	become crazy

VERBAL SUBSTITUTION (maka- or makag-)

Makasayaw og kuratsa.	(Will/To) be able to dance curacha.
Makakuratsa.	(Will/To) be able to curacha.
Makatan-aw og siní.	(Will/To) be able to watch cinema.
Makasiní.	(Will/To) be able to cinema.
Makadulà og ML.	(Will/To) be able to play Mobile Legends.
MakaML.	(Will/To) be able to ML.
Makabasa-basa sa Facebook.	(Will/To) be able to scroll through Facebook.
MakaFacebook.	(Will/To) be able to Facebook.
Makalutò og pansit.	(Will/To) be cooking pansit.
Makapansit.	(Will/To) be having pansit.
Makasul-ob og putî.	(Will/To) be wearing white.
Makaputî.	(Will/To) be in white.
Makapanakóp og isdà.	(Will/To) be catching fish.
Makapangisdà.	(Will/To) be fishing.
Makapangalot og kamuti.	(Will/To) be digging sweet potato.
Makapangamuti.	(Will/To) be sweet potato-gathering.
Makapanulong og pista.	(Will/To) be “invading” a feast celebration.
Makapamista.	(Will/To) be going to a feast celebration.
Makapanguhà og butóng.	(Will/To) be able to get young coconut fruits.
Makapamutóng.	(Will/To) be able to have young coconut fruits.
Makapanghidhid og pulbo.	(Will/To) be able to apply face powder.
Makapamulbo.	(Will/To) be able to wear face powder.

Conversation: Meeting Someone on the Street

gihapon – still (the same)
paingón – heading towards
lutoonon – things to cook
untà – supposed to be
nanggilaray – lined up in a row
sayó – early
taód-taód – in a little while
libot-libot – go about, around
matimô – snack, s.t. to eat
pamahaw – breakfast
kilíd-kilíd – around here
tuyò – purpose
suroy-suroy – stroll around
magpinuyò – be idle
daghan-daghan – somewhat plenty
palaliton – things to buy

A: (Name)! Nia man diáy ka.
B: Uy, ikáw man diáy 'na.

A: (Name)! You're here.
B: Hey, it's you.

A: Kumusta na man?
B: Dia. Maó ra man **gihapon**. Ikáw?

A: How have you been?
B: Here. **Still** the same. How about you?

A: Aw maayo ra man.
B: Asa man diáy ka?
A: **Paingon** untà ko sa mirkado arón mamalít og **lutoonon**.
B: Nganong '**untà**' man?

A: Well, I'm doing well.
B: Where are you going?
A: I'm supposed to be **heading** to the market to buy **some things to cook**.
B: Why '**supposed to be**'?

A: Pag-adto nakò walâ pa man kaayoy **nanggilaray**.
B: Aw maó. **Sayó** pa man pod.

A: When I got there there were not yet many **stalls in line**.
B: Oh, right. Well it's still **early**.

A: Lagí. Mubalik ra ko unyang **taód-taód**.
B: Maó. **Paglibot-libot** lang usà.

A: Certainly. I'll go back **in a little while**.
B: Yeah. Just **wander around** for now.

A: Nangità lagí ko'g **matimô** kay gikulangan ko sa akong **pamahaw**.
B: Na maó ra. Pagpalít og tinapay.

A: I am looking for some **snacks** 'cause I wasn't satisfied with my **breakfast**.
B: That's unfortunate. Buy some bread.

A: Oo, tuay panaderya didto sa unhan.
A: Unyà ikáw, asa man pod diáy ka?
B: Aw dinhi ra sa **kilíd-kilíd**, nagsuroy-suroy lang.

A: Yeah, there's a bakery ahead.
A: How about you? Where're you heading to?
B: Just **around here**, just strolling.

A: Aw iníg mahumán ko sa akong **tuyò**, **magsuroy-suroy** ra pod ko.
B: Maó lagí. Kanindot sa panahón unyà **magpinuyò** ra ta sa atong baláy?

A: When I finish my **errand**, I will also **stroll around**.
B: Certainly. What fine weather for one to just **stay indoors**.

thepotwelve

A: Maó gayód.
B: Na halá, muuná ko.

A: Sigé, akó pod kay **daghan-daghan** pa rabá 'ring akong mga **palaliton**.
B: Sigé.

A: Definitely.
B: Well, I'm gonna go ahead.

A: OK, me too 'cause I still have **quite a lot** of **things to buy**.
B: OK.

Vocabulary: Seeing & Knowing

kità – see
pakità – appear

LESSON 12: Genitive Pronouns & Demonstratives

PRONOUNS

Preposed	Postposed	Gloss	
akò	nakò, ko	of/by me, my, mine	1st person singular
amò	namò	of/by us, our(s)	1st person plural exclusive
atò	natò, ta	of/by us, our(s)	1st person plural inclusive
ímo	nímo, mo	of/by you, your(s)	2nd person singular
ínyo	nínyo	of/by you, your(s)	2nd person plural
íya	níya	of/by him/her, his/hers	3rd person singular
íla	níla	of/by them, their(s)	3rd person plural

1. **akò**, **nakò**, **ko** (1st person singular)

Possessive:		Ergative:	
Akong kalò.	My hat.	Akong gisul-ot.	I wore (it).
Kalò nakò.		Gisul-ot nakò.	
Kalò ko.		Gisul-ot ko.	

2. **amò**, **namò** (1st person plural exclusive)

Possessive:		Ergative:	
Among lugár.	Our place.	Among giadto.	We went to (it).
Lugár namò.		Giadto namò.	

3. **atò**, **natò**, **ta** (1st person plural inclusive)

Possessive:		Ergative:	
Atong baláy.	Our house.	Atong gibaligyà.	We sold (it).
Baláy natò.		Gibaligyà natò.	
Baláy ta.		Gibaligyà ta.	

4. **imo**, **nimo**, **mo** (2nd person singular)

Possessive:		Ergative:	
Imong payong.	Your umbrella.	Imong gipalít.	You bought (it).
Payong nimo.		Gipalít nimo.	
Payong mo.		Gipalít mo.	

theptwelve

5. **inyo**, **ninyo** (2nd person plural)

Possessive:		Ergative:	
Inyong sakyanán.	Your car.	Inyong gigamit.	You used (it).
Sakyanán ninyo.		Gigamit ninyo.	

6. **iya**, **niya** (3rd person singular)

Possessive:		Ergative:	
Iyang Papa.	His/Her Dad.	Iyang gipangutana.	She asked (s.o.)
Papa niya.		Gipangutana niya.	

7. **ila**, **nila** (3rd person plural)

Possessive:		Ergative:	
Ilang anák.	Their car.	Ilang gisuroy.	They strolled (s.o.)
Anák nila.		Gisuroy nila.	

DEMONSTRATIVES

niáron ~ ‘áron	presential (this now)
niíri/niári ~ ‘íri/’ári	proximal (this nearest to speaker)
niíni/niáni ~ ‘íni/’áni	medial (this near both speaker & addressee)
nianà ~ ‘anà	mesioproximal (that near addressee)
niádto ~ ‘ádto	distal (that far from both)

The genitive demonstratives are postposed in nature. There is no preposed counterpart which means they always go after the noun or the verb.

1. **niaron** ~ **aron** (of/by this now)

Ang ting-ulán niarong tuiga.	The wet season of this year.
Gibalità niarong nagasulti.	Broadcasted by this one speaking now.
Kang kinsang kalò?	Whose hat?
Kalò niarong tawhana.	Hat of this man now.

2. **niari/niiri** ~ **ari/iri** (of/by this - nearest to speaker)

Ang mga dahon niaring tanoma.	The leaves of this plant.
Gipaak niaring iroa.	Bitten by this dog.
Gisumbag ni kinsa?	Punched by whom?
Gisumbag niaring bayota.	Punched by this gay man.

thepotwelve

3. **niani/niini ~ ani/ini** (of/by that - near both speaker & addressee)

Ang mga haligi niining balaya.	The pillars of this house.
Gipatáy niining tawhana.	Killed by this man.
Anák ni kinsa?	Child of whom?

LESSON 13: Oblique Pronouns & Allatives

PRONOUNS

Traditional	Modern	Gloss	
kanakò	‘nakò, sa akò	to/for/on me	1st person singular
kanamò	‘namò, sa amò	to/for/on us	1st person plural exclusive
kanatò	‘natò, sa atò	to/for/on us	1st person plural inclusive
kanímo	‘nímo, sa imo	to/for/on you	2nd person singular
kanínyo	‘nínyo, sa inyo	to/for/on you	2nd person plural
kaníya	‘níya, sa iya	to/for/on him/her	3rd person singular
kaníla	‘níla, sa ila	to/for/on them	3rd person plural

Notice the apostrophes on the modern forms that start with ni-. They indicate that those forms are shortenings of the traditional forms that start with kan-.

1. kanakò, ‘nakò, sa akò (1st person singular)

   Gihatag niya kanakò. — He/She gave it to me.

2. kanamò, ‘namò, sa amò (1st person plural exclusive)

   Gitug-an niya kanamò. — He/She admitted it to us.

3. kanatò, natò, sa atò (1st person plural inclusive)

   Gibilin niya kanatò. — He/She left it to us.

4. kanimo, ‘nimo, sa imo (2nd person singular)

   Gipadalá niya kanimo. — He/She sent it to you.

5. kaninyo, ‘ninyo, sa inyo (2nd person plural)

   Gibalik niya kaninyo. — He/She returned it to you.

6. kaniya, ‘niya, sa iya (3rd person singular)

   Gipasa niya kaniya. — He/She passed it on to him/her.

7. kanila, ‘nila, sa ila (3rd person plural)

   Gilabay niya kanila. — He/She threw it to them.

thetwelve

ALLATIVES

niáron ~ ‘áron	presential (this now)
niíri/niári ~ ‘íri/’ári	proximal (this nearest to speaker)
niíni/niáni ~ ‘íni/’áni	medial (this near both speaker & addressee)
nianà ~ ‘anà	mesioproximal (that near addressee)
niádto ~ ‘ádto	distal (that far from both)

The allatives or oblique demonstratives, like the genitive demonstratives, are postposed in nature. There is no preposed counterpart which means they always go after the noun or the verb. In fact the same words are used for both functions in modern Cebuano. In old Cebuano, it was ni- for the genitives and kan- for the obliques/allatives.

1. **niaron ~ aron** (to/for/on/about this now)

Mga plano alang niarong bulana.	Plans for this month.
Giganahan ko niaron.	I like this one (now).
Kang kinsa ko mangutana?	Whom will I ask?
Pangutana niarong tawhana.	Ask this man.

2. **niari/niiri ~ ari/iri** (to/for/on/about this - nearest to speaker)

Mga kinasulti niaring basahona.	Opinions about this book.
Walâ ko makailá niaring bataa.	I don't know this kid.
Unsay akong hulatón?	What will I wait for?
Paghulát niaring tingoga.	Wait for this sound.

3. **niani/niini ~ ani/ini** (to/for/on/about that - near both speaker & addressee)

Mga padalá alang niining lungsora.	Deliveries for this town.
Way solusyon niining problemaha.	There’s no solution to this problem.
Asa ibutáng?	Where should it be put?
Ibutáng niining lamisaha.	Put it on this table.

4. **nianà ~ anà** (to/for/on/about that - near addressee)

Nagalipay niadtong nangasub-an.	Comforting those who are sad.
Dilì ko muuyon nianà.	I will not agree to that.
Kang kinsa ko manundog?	Who should I copy/follow?
Panundog nianang bayhana.	Copy/Follow that woman.

thepotwelve

5. **niadto ~ adto/ato** (to/for/on/about that - near addressee)

Nagalipay niadtong nangasub-an.	Comforting those who are sad.
Gipasul-ob ko niadtong sininaa.	I was told to wear that dress.
Ilabay kang kinsa?	Whom will I throw it?
Ilabay niadtong tigulang.	Throw it to that old man/woman.

Conversation: Ordering Food

tagpila – how much each	isdà – fish
kan-on – cooked rice	baka – cow, beef
usá'g tungâ – one and a half	sinsilyo – small change
libre – free	singkwinta – fifty
sabáw – soup	ambi – “hand it to me” particle

K: **Tagpila** inyong adobong manók, te?	K: **How much** is your chicken adobo, te?
T: Tagtraynta ang usá.	T: Thirty pesos each.
K: Sigé, usá akò te. Ang inyong **kan-on** tagpila?	K: Okay, I’ll have one. How about your **rice**?
T: Tagdyīs.	T: Ten pesos each.
K: **Usá'g tungâ** akò. Naa moy **libreng sabáw**?	K: I’ll have **one and a half**. Do you have **free soup**?
T: Naa. Diay sabáw sa **isdà** ug **baka**.	T: We do. We have **fish** and **cow** soup.
K: Kanáng sabáw sa baka akò te. Pilá tanán te?	K: I’ll have cow soup, te. How much in total?
T: Kwarintay utso.	T: Forty eight pesos.
K: Dia te o. Walâ rabá koy **sinsilyo**.	K: Here, te. But I don’t have **coins** with me.
T: Walâ ra kay **singkwinta** dihâ?	T: Don’t you have some **fifty**?
K: Walâ gyod te.	K: I really don’t.
T: Aw sigé, **ambi** ang 100.	T: It’s okay, **hand me** the hundred.
T: Dia ra o, singkwintay dōs. Salamat.	T: Here, fifty two pesos. Thank you.

theptwelve

LESSON 14: Patient Voice (Punctual & Durative)

PUNCTUAL	DURATIVE	MERGED	
Traditional	Traditional	Modern	
-in-	gi-	gi-	past/completive
	gina-	gina-	present/progressive
a–on	paga–on	-on	future/contemplative, habitual
-on	pag–on	-on	infinitive, instructive, adverbial

PUNCTUAL VS. DURATIVE

alutoon (will be cooked)	pagalutoon (will be being cooked)
asunogon (will be burned)	pagasunogon (will be being burnt)
papatyon (will be killed)	pagapatyon (will be being killed)
bubuhaton (will be done)	pagabuhaton (will be being done)

The main prevailing difference between the two is their durativity. The punctual set is seen as a one-time single event while the durative as a series of continuous or repeated events. They are best translated to English as simple tense and continuous aspect.

Although they are originally distinct, in modern Cebuano the a–on and paga–on forms are now only dialectal; the former being common among Bol-anon varieties while paga–on is more common in formal or literary speech.

In old Cebuano, CV–on with the syllabic reduplication was the one attested over a–on. It is like Tagalog's CV–in but it fell out of use as Cebuano evolved.

NOMINALIZED **-in-**

Since the punctual and durative sets got merged in the non-agent voices, the past/completive -in- forms are no longer productive as true verbs. They are now commonly used as nominalizers, meaning a verb turned into a noun.

pinalít (something bought)	gipalít (was bought)
sinulát (something written)	gisulát (was written)
linutò (something cooked)	gilutò (was cooked)
kinawat (something stolen)	gikawat (was stolen)

MODERN MERGED SET

1. **gi-** (past/completive)

Gilabay ni Papa ang kalò.	Dad threw the hat.
Gilabay niya ang kalò.	He threw the hat.
Gilabay sa tawo ang kalò.	The man threw the hat.
Gilabay niining tawhana ang kalò.	He (who this is) threw the hat.

2. **gina-** (present/progressive)

Ginabasa ni Nilda ug Delia ang Bibliyá.	Nilda and Delia are reading the Bible.
Ginabasa nila ang Bibliyá.	They are reading the Bible.
Ginabasa sa mga babaye ang Bibliyá.	The women are reading the Bible.
Ginabasa niining mga bayhana ang Bibliyá.	They (who these are) are reading the Bible.

3. **-on** (future/contemplative, habitual)

Hulatón ni Kulás si Sali.	Kulas will wait for Sali.
Hulatón nimo si Sali.	You will wait for Sali.
Hulatón sa sakyanán si Sali.	The vehicle will wait for Sali.
Hulatón niadtong sakyanana si Sali.	It will wait for Sali.

4. **-on** (infinitive, instructive, conditional, adverbial)

Gusto nila Brenda ug Asa kan-on ang pagkaon.	Brenda and Asa wants to eat the food.
Kan-on ninyo ang pagkaon.	You eat the food.
Kung kan-on ang pagkaon…	If the food would be eaten..
Talagsa ra kan-on.	Seldom eaten.

PROGRESSIVE VS. HABITUAL

Like the other sets of affixes, instead of having one form for both the progressive and habitual, some dialects use the future/contemplative as the habitual.

- Dialect A

	Progressive/Habitual
Ginainóm niya ang duláw.	He drinks turmeric.
Ginakuhà niya ang bulíng.	He removes the dirt.
Walâ niya ginainóm.	He doesn't drink (it).
Walâ niya ginakuhà.	He doesn't remove (it).

- Dialect B

	Habitual	Future/Contemplative
Imnon niya ang duláw.	He drinks turmeric.	He will drink turmeric.
Kuhaon niya ang bulíng.	He removes the dirt.	He will remove the dirt.
Dilì niya imnon.	He doesn't drink (it).	He will not drink (it).
Dilì niya kuhaon.	He doesn't remove (it).	He will not remove (it).

threetwelve

AGENT VS. PATIENT

Misunód si Papa.	Dad followed.
Misunód si Papa kang Mama.	Dad followed Mom.
Gisunód ni Papa.	Dad followed (someone/something).
Gisunód ni Papa si Mama.	Dad followed Mom.
Naghulát si Lolo.	Grandpa was waiting.
Naghulát si Lolo kang Lola.	Grandpa was waiting for Grandma.
Gihulát ni Lolo.	Grandpa was waiting (for someone/something).
Gihulát ni Lolo si Lola.	Grandpa was waiting for Grandma.

ADVERBIAL INTERROGATIVE: “HOW”

“How” in Cebuano is aspect dependent because it verbifies the word “unsa” (what) and is linked to another verb with a prefix pag-. In English, it’s intuitive for it to be translated as “In what way it was/is/will be verbed.”

giunsa	was being whated	giunsa pagkaon	how it was eaten
ginaunsa	is being whated	ginaunsa paghatag	how it is given
unsaon	will be whated	unsaon pagtudlò	how it will be taught

Conversation: Asking Permission From Parents

manuroy – stroll, roam around	hapon – afternoon
kauban – companion	mangulì – go home (plural)
siní – cinema	panihapon – supper, dinner
sininà – clothes	pakagabií – allow to be overtaken by night

A: Ma, **manuroy** mi unyà sa S.M.	A: Mom, we’ll **go for a stroll** later at S.M.
B: Kinsay imong **kauban**?	B: Who are you **going with**?
A: Silá Intoy ug Manong.	A: Intoy and Manong.
B: Mag-unsa man mo didto?	B: What are you gonna do there?
A: Manuroy lang.	A: We’ll just wander around.
B: Unsa mang suroya?	B: What stroll?
A: Manan-aw mi’g **siní**. Mamalít pod mi’g **sininà**. Didto na lang pod mi manihapon.	A: We’ll go to the **cinema**. We’ll also buy some **clothes**. We’ll also have our dinner there.
B: Unsa man mong urasa manglakaw?	B: What time are you gonna go?

theptwelve

A: Unyang alás 3 sa **hapon**.

A: Later at 3 in the **afternoon**.

B: Unyà unsa man pod mong urasa **mangulì**?

B: And what time are you gonna come back home?

A: Kahumán og **panihapon**. Mga alás 8.

A: After **dinner**. Around 8.

B: Sigé. Basta ayáw mo **pagpakagabií**.

B: OK. Just make sure you'll be home before it's dark.

A: Sige, Ma.

A: OK, Mom.

Vocabulary: House Chores

Manghinlò, Manglimpyo - clean things
Manarapo - wipe things dry
Manghipos - declutter things
Mamunak, Manglabá - wash clothes
Manghalay, Manghayhay - hang clothes to dry
Mamilô - fold clothes
Manglampaso - polish floor w/ coconut husk
Manilhig - sweep the floor
Mamintura, Mamintal - paint
Mananóm - plant
Mamisbis - water plants
Manghabok - fertilize plants w/ compost
Mangguná - weed with a bolo
Mangharás - bend over tall weeds
Mangibót - uproot weeds
Manindahan - entertain customers at the store
Mangabohan - do work at the fireplace
Mangusinà - do kitchen work
Mangahoy - gather firewood
Manghagpat - deleaf moringa leaves
Manggurót - chop into bits
Manghimbis - remove fish scales
Mamasiyo - set the table
Mamul-ong - prune branches
Mamû-pò - pick fruits
Mangutlò - pick leaves
Manughit - poke fruits or cobwebs
Manghugas - wash the dishes
Manglinô - rinse the dishes
Manguskos - scrape dirt from objects
Mangalóg - fetch water
Manalod - catch falling water with a vessel
Mamunda - put on pillow cases
Mamaníg - woven straw sleeping mat
Manglukot - roll up the banig
Manlalog - feed pets, animals

LESSON 15: Patient Voice (Distributive & Potential)

DISTRIB. Traditional	DISTRIB. Modern	DISTRIB. Merged	POTENTIAL Modern	
pinaN-	gipaN-	gipaN-	na-	past/completive
	ginapaN-	ginapaN-	na-	present/progressive
apaN–on	pagapaN–on	paN–on	ma-	future/contemplative, habitual
paN--on	pagpaN–on	paN–on	ma-	infinitive, instructive, adverbial

DISTRIBUTIVE TRADITIONAL VS. MODERN

Among Philippine languages, the original affix indicating completion of action in the passive is -in-. And this was also attested in Cebuano. However, when gi- became the go-to affix between the punctual and durative, it was carried through the other sets including the distributive.

NOMINALIZED **-in-**

Traditionally, pinaN- was a true verbalizer until it became a nominalizer turning verbs into nouns since the durative gi- took over.

pinamalít (something bought)	gipamalít (was/were ought)
pinangayò (something asked)	gipangayò (was/were asked)
pinangawat (something stolen)	gipangawat (was/were stolen)
pinangità (something sought after)	gipangità (was/were sought)

And what used to be a- was being replaced with paga- from the same durative set. In modern Cebuano, they are still remnants of them but the former is dialectal and the latter is formal.

apanglutoon (will be cooked)	pagapanglutoon (will be being cooked)
apanunogon (will be burned)	pagapanunogon (will be being burnt)
apamatyon (will be killed)	pagapamatyon (will be being killed)
apamuhaton (will be done)	pagapamuhaton (will be being done)

MODERN MERGED SET

1. **gipaN-** (past/completive)

Gipangasawa ni Manoy ang dalaga.	Manoy married the maiden.
Gipangasawa niya ang dalaga.	He married the maiden.
Gipangasawa sa ulitawo ang dalaga.	The bachelor married the maiden.
Gipangasawa niining ulitawha ang dalaga.	This bachelor married the maiden.

2. **ginapaN-** (present/progressive)

Ginapangumusta ni Nilda ug Delia ang ilang inahán.	Nilda and Delia are asking their mother how she's doing.
Ginapangumusta nila ang ilang inahán.	They are asking their mother how she's doing.
Ginapangumusta sa mga babaye ang ilang inahán.	The women are asking their mother how she's doing.
Ginapangumusta niining mga bayhana ang ilang inahán.	These women are asking their mother how she's doing.

3. **paN–on** (future/contemplative, habitual)

Pangutan-on ni Kulás si Sali.	Kulas will ask Sali.
Pangutan-on nimo si Sali.	You will wait for Sali.
Pangutan-on sa pulís si Sali.	The vehicle will wait for Sali.
Pangutan-on niadtong pulisa si Sali.	It will wait for Sali.

4. **paN–on** (infinitive, instructive, conditional, adverbial)

Gusto ni Brenda pangitaon si Asa.	Brenda wants to look for Asa.
Pangitaon ninyo ang bata.	You look for the kid.
Kung pangitaon ang bata…	If the kid is to be searched for…
Talagsa ra pangitaon.	Rarely sought.

POTENTIAL

The "potential" is called this way because it can both indicate that the action was able to be carried out or was accidentally done. The potential sets in all voices have no attested distinction between past and present as well as future and infinitive in Cebuano. The distributive paN- is also stackable here as shown below.

naasawa (able to be taken as a wife)	napangasawa (able to be taken as a wife)
nabana (able to be taken as a husband)	napamana (able to be taken as a husband)
nakawat (able to be stolen)	napangawat (able to be stolen)
nakità (able to be seen)	napangità (able to be found)

1. **na-** (past/completive)

Naasawa ni Manoy ang dalaga.	Manoy was able to marry the maiden.
Naasawa niya ang dalaga.	He was able to marry the maiden.
Napangasawa sa ulitawo ang dalaga.	The bachelor was able to marry the maiden.
Napangasawa niining ulitawha ang dalaga.	This bachelor was able to marry the maiden.

Inceptive

2. **na-** (present/progressive)

Nabana ni Nilda ang among pastor.	Nilda is able to marry our pastor.
Nabana niya ang among pastor.	She is able to marry our pastor.
Napamana sa babaye ang pastor.	The woman is able to marry the pastor.
Napamana niining bayhana ang pastor.	This women is able to marry the pastor.

3. **ma-** (future/contemplative, habitual)

Pangutan-on ni Kulás si Sali.	Kulas will ask Sali.
Pangutan-on nimo si Sali.	You will wait for Sali.
Pangutan-on sa pulís si Sali.	The police will wait for Sali.
Pangutan-on niadtong pulisa si Sali.	That police will wait for Sali.

4. **ma-** (infinitive, instructive, conditional, adverbial)

Gusto ni Brenda pangitaon si Asa.	Brenda wants to look for Asa.
Pangitaon ninyo ang bata.	You look for the kid.
Kung pangitaon ang bata…	If the kid is to be searched for…
Talagsa ra pangitaon.	Rarely sought.

AGENT VS. PATIENT

Nangità si Kuya.	Kuya was looking (for someone/something.)
Nangità si Kuya kang Ate.	Kuya was looking for Ate.
Gipangità ni Kuya.	Kuya was looking (for someone/something).
Gipangità ni Kuya si Ate.	Kuya was looking for Ate.
Nakadungóg si Papa.	Papa was able to hear (something).
Nakadungóg si Papa sa balità.	Papa was able to hear the news.
Nadungóg ni Papa.	Papa was able to hear (the thing).
Nadungóg ni Papa ang balità.	Papa was able to hear the news.

Conversation: Asking for Directions

katuód – know the way	sakyanán – vehicle
hunong – stop by	lumbay – be in line
sakayan – terminal	ipakità – show

A: Ya, maayong buntag.	A: Bro, good morning.
B: Maayong buntag pod.	B: Good morning too.
A: **Katuód** ka ya kung asa agion ang Tops? Ug unsa poy sakyan?	A: Do you **know the way** to Tops? And what vehicle should I ride on?

theptwelve

B: Adto ka sa IT Park. Kun hasolan ka magjīp, pagtaksi lang. Ingna ang drayber nga adto ka **hunong** sa **sakayan** padulong sa Tops.

B: You go to IT Park. If you find riding a jeepney troublesome, just go with a taxi. Tell the driver that you will **stop** at the **terminal** for Tops.

A: Aw OK ya. Pagpaulì na, asa man mi maghulát sa **sakyanán**?

A: OK, *ya.* Going home, where will we wait for **vehicle**?

B: Didto ra sa intrada sa Tops. **Maglumbay** man ‘nâ silá. **Ipakità** lang ang imong tikit arón mahibal-an nga nakabayád ka na.

B: Just by the entrance of Tops. They **go in line**. Just **show** your ticket so they’ll know that you already paid.

A: Daghan kaayong salamat ya.

A: Thank you so much, ya.

B: Walay sapayán.

B: You’re welcome.

Vocabulary:

• House Chores

Magdaob (set an open fire)
Maghaling (build a fire)
Magpabukal (boil water)
Magtimpla (make a concoction)
Maglutò (cook)
Magkilís (wash rice)
Magdung-ag (cook rice)
Mag-init (heat something)
Maghukad (serve food from pot)
Magpakaon (feed)

• Group Activities

Mangaligò (go swimming)
Manugba (broil s.t. over hot coals)
Mamayabas (go guava gathering)
Mamutóng (go young coconut gathering)
Mangamuti (go sweet potato gathering)
Manulô (go hunting/fishing with a torchlight)
Managka (go hiking or trekking)
Mangayam (go hunting with a dog)
Mangisdà (go fishing)
Mamanà (go spear fishing)
Mamasól (go fishing with a hook & line)
Manglimós (go begging for alms)
Mamalót (go balot eating)
Manaygon (go carolling)
Mamista (attend a feast day celebration)
Manayaw (go dancing)
Manisko (go dancing disco)
Manuroy (go strolling)

LESSON 16: Referent Voice (Punctual & Durative)

PUNCTUAL	DURATIVE	MERGED	
Traditional	Traditional	Modern	
-in–an	gi–an	gi–an	past/completive
	gina–an	gina–an	present/progressive
a–an	paga–an	-an	future/contemplative, habitual
-an	pag–an	-an	infinitive, instructive, adverbial

The Referent Voice is called this way because it uses the noun in focus as its reference, either as the goal, reference, location or benefactee which the action is conveyed to, on, for or from. There are many subsets under this voice which we will go into detail in future lessons. For now, we're prioritizing familarity with the conjugation and how the forms differ from the Patient Voice.

PUNCTUAL VS. DURATIVE

alutoan (will be cooked on/for)	pagalutoan (will be being cooked on/for)
atabangan (will be helped)	pagatabangan (will be being helped)
babayran (will be paid)	pagabayran (will be being paid)
susulayán (will be tried, tested)	pagasulayán (will be being tried, tested)

Once again, the main prevailing difference between the two is their durativity. The punctual set is seen as a one-time single event while the durative as a series of continuous or repeated events. They are best translated to English as simple tense and continuous aspect.

NOMINALIZED **-in–an**

Since the punctual and durative sets got merged in the non-agent voices, the past/completive -in–an forms are no longer productive as true verbs. They are now commonly used as nominalizers, meaning a verb turned into a noun.

kinan-an (something eaten on)	gikan-an (was eaten on)
sinulatán (something written on/for)	gisulatán (was written on/for)
binayran (something paid)	gibayran (was paid)
sinaligan (something trusted)	gisaligan (was trusted)

MODERN MERGED SET

1. **gi–an** (past/completive)

Gilabhan ni Mama ang unlan.	Mom washed the pillow.
Gilabhan niya ang unlan.	She washed the pillow.
Gilabhan sa babaye ang unlan.	The woman washed the pillow.
Gilabhan niining bayhana ang unlan.	This woman washed the pillow.

2. **gina–an** (present/progressive)

Ginasilhigan nila Nilda ug Delia ang salóg.	Nilda and Delia are sweeping the floor.
Ginasilhigan nila ang salóg.	They are sweeping the floor.
Ginasilhigan sa mga babaye ang salóg.	The women are sweeping the floor.
Ginasilhigan nianang mga bayhana ang salóg.	These women are sweeping the floor.

3. **-an** (future/contemplative, habitual)

Tawagan ni Kulás si Sali.	Kulas will call Sali (on the phone).
Tawagan nimo si Sali.	You will call Sali (on the phone).
Tawagan sa maistra si Sali.	The teacher will call Sali (on the phone).
Tawagan niadtong maistraha si Sali.	That teacher will call Sali (on the phone).

4. **-an** (infinitive, instructive, conditional, adverbial)

Gusto ni Brenda dad-an si Asa og pagkaon.	Brenda wants to bring food for Asa.
Dad-an ninyo inyong inahán.	You bring food for your mother.
Kung dad-an si Lolita…	If Lolita is brought food for...
Talagsa ra dad-an.	Seldom brought for.

PROGRESSIVE VS. HABITUAL

Like the other sets of affixes, instead of having one form for both the progressive and habitual, some dialects use the future/contemplative as the habitual.

- Dialect A

	Progressive/Habitual
Ginaasinán niya ang sabáw.	She puts salt on the soup.
Ginatuohan niya si Nanay.	She believes Grandma.
Walâ niya ginaasinán.	She doesn’t salt the soup.
Walâ niya ginatuohan.	She doesn’t believe Grandma.

- Dialect B

	Habitual	Future/Contemplative
Asinán niya ang lugaw.	She puts salt on the soup.	She will salt the soup.
Tuohan niya si Nanay.	She believes Grandma.	She will believe Grandma.
Dilì niya asinán.	She doesn’t salt the soup.	She won’t salt the soup.
Dilì niya tuohan.	She doesn’t believe Grandma.	She won’t believe Grandma.

AGENT VS. PATIENT

Mibalos si Papa.	Dad took revenge.
Mibalos si Papa kang Mama.	Dad took revenge on Mom.
Gibaslan ni Papa.	Dad took revenge (on someone/something).
Gibaslan ni Papa si Mama.	Dad took revenge on Mom.
Nag-iban si Lolo.	Grandpa deducted (something).
Nag-iban si Lolo sa tinigom.	Grandpa deducted the savings.
Giibanan ni Lolo.	Grandpa deducted (something).
Giibanan ni Lolo ang tinigom.	Grandpa deducted the savings.

Conversation: Inviting a Friend for Dinner

bakanti – vacant, free	maulaw – to be shy
ugmà – tomorrow	hugot-hugot – tight financial situation
kamanghoran – youngest	atò-atò – exclusively ours, informal, not grand
idád – age	tingpanihapon – dinner time
dalagahay – girl close to maturity	dapit – invite

A: **Bakanti** ka ugmà sa gabii?	A: Are you **free** tomorrow night?
B: Oo, walâ ra koy himoon. Ngano diáy?	B: Yeah, I have nothing to do. Why do you ask?
A: Aw adto ta sa amò manihapon **ugmà**.	A: Let's have dinner at our place **tomorrow**.
B: Sigé ba. Unsa diáy naa?	B: Sure. What's the occassion?
A: Birthday sa akong **kamanghoran**.	A: It's my **youngest** child's birthday.
B: Aw maayo. Pilá nay iyang **idád**?	B: Oh, great. How old is he?
A: Trisi na intawon. Kaluoy sa Ginoo.	A: Thirteen. By God's grace.
B: Aw **dalagahay** na. Kadalî ra gyod mulabáy sa panahón.	B: She's now **reaching puberty**. How quick the time went by.
A: Maó lagí.	A: Indeed.
B: **Maulaw** man ko uy basi'g walâ koy ikahatag kay **hugot-hugot** mi karón.	B: I'm **shy** to go 'cause I'm afraid I don't have anything to give because we have a tight budget as of the moment.

theptwelve

A: Sigé lang gud. **Atò-atò** ra gud nga kaon-kaon.

B: Sigé, unsa man pong urasa ugmà?

A: **Tingpanihapon**. Mga alás 7 mangaon. Kinahanglan tua na mga alás 6 pa lang.

B: Sigé, muadto ra ko. Salamat sa **pagdapit**.

A: Walay sapayán.

A: Don't worry about it. It's just an **ordinary** celebration.

B: OK, what time tomorrow?

A: At **dinner time**. Around 7 o'clock. You should already be there at around 6.

B: OK, I will be there. Thanks for the **invite**.

A: You're welcome.

Vocabulary: Speech & Voice

amáng (mute)
búndak (to emphasize, emphasis)
hamúham (to talk fast as if eating)
hiluwás (to utter, articulate)
ingón (to say, tell)
kangâ-kangâ (stammering)
litók (to pronounce)
lúming (soft, tender)
ngângà (stuttering)
nguhô (nasal)
samuál (mouthful unintelligible talk)
sapíd-sapíd (to be inarticulate)
súlti (to speak)
tín-aw (clear speech)

LESSON 17: Referent Voice (Distributive & Potential)

DISTRIBUTIVE

Traditional	Modern	Merged	
pinaN–an	gipaN–an	gipaN–an	past/completive
	ginapaN–an	ginapaN–an	present/progressive
apaN–an	pagapaN–an	paN–an	future/contemplative, habitual
paN--an	pagpaN–an	paN–an	infinitive, instructive, adverbial

TRADITIONAL VS. MODERN

Among Philippine languages, the original affix indicating completion of action in the passive is -in-. And this was also attested in Cebuano. However, when gi- became the go-to affix between the punctual and durative, it was carried through the other sets including the distributive.

NOMINALIZED **-in-**

Traditionally, pinaN- was a true verbalizer until it became a nominalizer turning verbs into nouns since the durative gi- took over.

pinamalít (something bought)	gipamalít (was/were ought)
pinangayò (something asked)	gipangayò (was/were asked)
pinangawat (something stolen)	gipangawat (was/were stolen)
pinangità (something sought after)	gipangità (was/were sought)

And what used to be a- was being replaced with paga- from the same durative set. In modern Cebuano, they are still remnants of them but the former is dialectal and the latter is formal.

apanglutoon (will be cooked)	pagapanglutoon (will be being cooked)
apanunogon (will be burned)	pagapanunogon (will be being burnt)
apamatyon (will be killed)	pagapamatyon (will be being killed)
apamuhaton (will be done)	pagapamuhaton (will be being done)

MODERN MERGED SET

1. **gipaN–an** (past/completive)

Gipanalipdan si Dodong sa daotán.	Dodong was shielded from evil.
Gipanalipdan siyá sa daotán.	He was shielded from evil.
Gipanalipdan ang tawo sa daotán.	The man was shielded from evil.
Gipanalidan kiníng tawhana sa daotán.	This man was shielded from evil.

2. **ginapaN–an** (present/progressive)

Ginapanalanginan si Inday sa Ginoo.	Inday is blessed by God.
Gipanalanginan siyá sa Ginoo.	She is blessed by God.
Gipanalanginan sa Ginoo ang batà.	The child is blessed by God.
Ginapanalanginan sa Ginoo kiníng bataa.	This child is blessed by God.

3. **paN–an** (future/contemplative, habitual)

Panagan-an sa mga Garzon ang bagyo.	The Garzons will prepare for the typhoon.
Panagan-an natò ang bagyo.	We will prepare for the typhoon.
Panagan-an sa mga Sugboanon ang bagyo.	The Cebuanos will prepare for the typhoon.
Panagan-an niining mga Sugboanon ang bagyo.	These Cebuanos will prepare for the typhoon.

4. **paN--an** (infinitive, instructive, conditional, adverbial)

Gusto ni Brenda paninglan si Asa.	Brenda wants to ask payment from Asa.
Paninglan ninyo ang nangutang.	You ask payment from the debtor.
Kung pangitaon ang nangutang…	If you ask payment from the debtor…
Talagsa ra paninglan.	Rarely asked for payment of one's debt.

POTENTIAL

Traditional	Modern	Merged	Alternative	
kina–an	gika–an	gika–an	na–an	past/completive
	ginaka–an	ginaka–an	na–an	present/progressive
aka–an	pagaka–an	ka–an	ma–an	future/contemplative, habitual
ka–an	pagka–an	ka–an	ma–an	infinitive, instructive, adverbial

The "alternative" set was an innovation derived from the original set with the ka-. Over time, the alternative set became the default preference for the potential while the original set for reason.

REASON

Aside from their potential use, the forms with ka- also function as reason triggers. It means that the thing in focus is the reason for the action, particularly for stative verbs.

1. **gika–an** (past/completive)

Gikauyonan ni Manoy ang dalaga.	Manoy was able to like the maiden.
Gikauyonan niya ang dalaga.	He was able to like the maiden.
Gikauyonan sa ulitawo ang dalaga.	The bachelor was able to marry the maiden.
Gikauyonan niining ulitawha ang dalaga.	This bachelor was able to marry the maiden.

2. **ginaka–an** (present/progressive)

Ginakahadlokan ni Nilda ang among pastor.	Nilda is afraid of our pastor.
Ginakahadlokan niya ang among pastor.	She is afraid of our pastor.
Ginakahadlokan sa babaye ang pastor.	The woman is afraid of the pastor.
Ginakahadlokan niining bayhana ang pastor.	This woman is afraid of the pastor.

3. **ka–an** (future/contemplative, habitual)

Kapungtan ni Kulás ang panahón.	Kulas will get annoyed at the weather.
Kapungtan nimo ang panahón.	You will get annoyed at the weather.
Kapungtan sa pulís ang panahón.	The police will get annoyed at the weather.
Kapungtan niadtong pulisa ang panahón.	That police will get annoyed at the weather.

4. **ka–an** (infinitive, instructive, conditional, adverbial)

Gusto ni Brenda kasuk-an si Asa.	Brenda wants to be mad at Asa.
Kasuk-an ninyo ang bata.	You will be mad at the kid.
Kung kasuk-an ang bata…	If someone were to get mad at the kid…
Talagsa ra kasuk-an.	Rarely gotten mad at.

The second or alternative potential set in all voices have no attested distinction between past and present as well as future and infinitive in Cebuano. The distributive paN- is also stackable here as shown below.

napalitan (able to be bought)	napangasaw-an (able to be taken as a wife)
nasabtan (able to be understood)	napamisitahan (able to be visited)
nasugdan (able to be started)	napangisdaan (able to be fished on/at)
nakit-an (able to be seen)	napangitaan (able to be found)

1. **na–an** (past/completive)

Nabuhián ni Manáng ang pitaka.	Manáng accidentally dropped the wallet.
Nabuhián niya ang pitaka.	She accidentally dropped the wallet.
Napamayabsan sa batà ang umá.	The child was able to gather guavas at the farm.
Napamayabsan niining bataa ang umá.	This child was able to gather guavas at the farm.

2. **na--an** (present/progressive)

Nahulamán ni Nilda si Lita.	Nilda was able to borrow from Lita
Nahulamán niya si Lita.	She was able to borrow from Lita.
Napamayloan sa babaye si Kapitana.	The woman was able to borrow money from *Kapitana.*
Napamayloan niining bayhana si Kapitana.	This woman was able to borrow many from *Kapitana.*

3. **ma–an** (future/contemplative, habitual)

Makit-an ni Kulás si Sali.	Kulas will see Sali.
Makit-an nimo si Sali.	You will see Sali.
Makit-an sa pulís si Sali.	The police will see Sali.
Makit-an niadtong pulisa si Sali.	That police will see Sali.

4. **ma–an** (infinitive, instructive, conditional, adverbial)

Gusto ni Brenda madunggan si Asa.	Brenda wants to hear Asa.
Madunggan ninyo ang bata.	(You) hear the kid.
Kung madunggan ang bata…	If the kid is audible…
Talagsa ra madunggan.	Rarely heard.

AGENT VS. PATIENT

Nangayò si Kuya.	Kuya was asking (for something.)
Nangayò si Kuya kang Ate.	Kuya was asking for something from Ate.
Gipangayoan ni Kuya.	Kuya was asking (for something from someone).
Gipangayoan ni Kuya si Ate.	Kuya was asking for something from Ate.
Nakapangò si Kuya.	Kuya was able to ask (for something).
Nakapangò si Kuya kang Ate.	Kuya was able to ask something from Ate.
Gikapangayoan ni Kuya.	Kuya was able to ask (for something) from s.o.
Gikapangayoan ni Kuya si Ate.	Kuya was able to ask (for something) from Ate.
Napangayoan ni Kuya.	Kuya was able to ask (for something) from s.o.
Napangayoan ni Kuya si Ate.	Kuya was able to ask (for something) from Ate.

Conversation: Commuting by Jeepney

palihog – please	dapít – near, by, vicinity of
sakáy – ride on	pliti – fare
naog – get off	lugár – to pull over in a spot or place

A: **Palihog**! *(hands over fare to seatmate)*	A: Could you hand this over **please**?
B: Kang kinsa ring singkwinta?	B: Whose fifty is this?
A: Akò ya. Usá lang. Istudyante.	A: Mine ya. Only one. Student.
B: Diín **sakáy**?	B: From where did you **ride**?
A: Kapitulyo.	A: At the Capitol.
B: Asa **naog**?	B: Where will you **get off**?

unedited

A: Colón.	A: Colon.
B: Hain **dapít** sa Colón?	B: Where **particularly** in Colon?
A: Sa Metro lang.	A: Just at Metro.
A: Piláy **pliti** ya?	B: How much is the **fare**?
B: Unsi.	A: Eleven pesos.
A: **Lugár** lang ya.	A: Just **over here**.

Vocabulary: Hygiene & Grooming

Maligò	wash body, take a bath
Manghunáw	wash hands
Manghilam-os	wash face
Manghimasà	wash feet
Manghinguko	cut nails
Manghimungot	shave beard
Manghingatulí	remove earwax
Manghimutà	remove eye pus
Manghingugmo	pick nose
Manghinguto	remove lice
Manglimugmog	gargle
Manutbras	brush teeth
Mamubho	wash hair
Manudlay	comb hair
Manglugod	rub oneself w/ stone
Mangilo	wash butt after pooping
Mamulbo	put on face powder
Mamahumot	put on perfume
Manghidhid	apply oil
Manglipstik	wear lipstick
Manghapnig	arrange things neatly

threetwelve

LESSON 18: Assistant Voice (Punctual & Durative)

PUNCTUAL	DURATIVE	MERGED	
Traditional	Traditional	Modern	
-in-	igi-	gi-	past/completive
	(i)gina-	gina-	present/progressive
i-	iga-	i-	future/contemplative, habitual
i-	ig-	i-	infinitive, instructive, adverbial

The Assistant Voice is called this way because it either focuses on the instrument used for assistance in carrying out an action or on the beneficiary/benefactee being assisted with.

NOMINALIZED **-in-**

Since the punctual and durative sets got merged in the non-agent voices, the past/completive -in- forms are no longer productive as true verbs. They are now commonly used as nominalizers, meaning a verb turned into a noun.

hinatag - something given	(i)gihatag - was given
sinulát - something written	(i)gisulát - was written
binaligyà - something sold	(i)gibaligyà - was sold
hinayhay - something hung	(i)gihayhay - was hung

MODERN MERGED SET

1. **gi-** (past/completive)

Gihatód ni Mama ang unlan.	Mom delivered the pillow.
Gilhatód niya ang unlan.	She delivered the pillow.
Gihatód sa babaye ang unlan.	The woman delivered the pillow.
Gihatód niining bayhana ang unlan.	This woman delivered the pillow.

2. **gina-** (present/progressive)

Ginalubóng nila Nilda ang bahandì.	Nilda (and company) are burying the treasure.
Ginalubóng nila ang bahandì.	They are burying the treasure.
Ginalubóng sa mga babaye ang bahandì.	The women are burying the treasure.
Ginalubóng nianang mga bayhana ang bahandì.	These women are burying the treasure.

3. **i-** (future/contemplative, habitual)

Iulì ni Kulás ang silhig.	Kulas will return the broom.
Iulì nimo ang silhig.	You will return the broom.

Iulì sa bata ang silhig.	The child will return the broom.
Iulì niadtong bataa ang silhig.	That child will return the broom.

4. **i-** (infinitive, instructive, conditional, adverbial)

Gusto ni Brenda itulód si Asa.	Brenda wants to push Asa.
Itulód ninyo si Asa.	You (plural) push Asa.
Kung itulód si Lolita…	If Lolita is to be pushed…
Hapit ra itulód.	Almost pushed.

AGENT VS. PATIENT

Musulti si Lolo.	Grandpa will speak.
Musulti si Lolo sa tinuod.	Grandpa will tell the truth.
Isulti ni Lolo.	Grandpa will say (the thing).
Isulti ni Lolo ang tinuod.	Grandpa will tell the truth.
Maglabay si Papa.	Dad will throw away (something).
Maglabay si Papa sa basura.	Dad will throw away the garbage.
Ilabay ni Papa.	Dad will throw away (the thing).
Ilabay ni Papa ang basura.	Dad will throw away the garbage.
Mangutana si Kuya.	Kuya will ask (something).
Mangutana si Kuya sa imong ngalan.	Kuya will ask your name.
Ipangutana ni Kuya.	Kuya will ask (the thing).
Ipangutana ni Kuya ang imong ngalan.	Kuya will ask your name.

PROGRESSIVE VS. HABITUAL

Like the other sets of affixes, instead of having one form for both the progressive and habitual, some dialects use the future/contemplative as the habitual.

- Dialect A

	Progressive/Habitual
Ginapadayon nila ang sayaw.	They are continuing the dance.
Ginabulád nila ang isdà.	They are drying the fish.
Walâ nila ginapadayon.	They are not continuing (it).
Walâ nila ginabulád.	They are not drying (it).

- Dialect B

	Habitual	Future/Contemplative
Ipadayon nila ang sayaw.	They are continuing the dance.	They'll continue the dance.
Ibulád nila ang isdà.	They are drying the fish.	They'll dry the fish.
Dilì nila ipadayon.	They are not continuing (it).	They won't continue (it).
Dilì nila ibulád.	They are not drying (it).	They won't dry (it).

Conversation: Looking for an Apartment

paabangan – unit for rent
higdaan – bed
baktas – walk (noun)
kurinti – electricity, power
aparadór – cabinet, closet
palibot – surroundings
hilom – quiet, silent
risirba – reserve

A: Maayong buntag. Nangità ko og *apartment*. Naa moy nahibal-an nga duól dinhi?

A: Good morning. I'm looking for an apartment. Do you know if there are any available nearby?

B: Maayong buntag! Oo, duna koy usá ka yunit nga **paabangan**. Unsa nga *apartment* ang imong ginapangità?

B: Good morning! Yes, I actually have one **unit for rent**. What kind of apartment are you looking for?

A: Gusto nako'g kanáng usá ka kwartong may **higdaan**, mas maayo'g duól sa mirkado kay walâ man koy sakyanán.

A: I need a one-**bed**room apartment, preferably near the market because I don't have a car.

B: Aw sakto! Kiníng akong yunit usay kwarto, ug mga singko minutos ra nga **baktas** ngadto sa mirkado. Duól ra pod sa sakayan og jīp.

B: Perfect! This unit is one bedroom, and it's just a five-minute **walk** to the market. It's also close to the jeepney stop.

A: Aw maayo nâ. Pilá man poy bulan?

A: That sounds good. How much is the monthly rent?

B: Utso mil ang abang kada bulan. Apíl na 'anà ang tubig, pero bayranán pa ang **kurinti** ug intirnit.

B: The rent is eight thousand per month. Water is already included, but you'll need to pay for **electricity** and internet.

A: Sigé. Naa pay depositó?

A: Okay. Is there any deposit?

B: Naa. Ang akong ginapangayò kay usá ka bulan nga unang bayad ug usá ka bulan nga depositó.

B: Yes, I usually ask for one month advance and one month deposit.

A: Aw maó. Naa nay mga gamit daan? O akó pay kinahanglan magdalá?

A: I see. Is the place furnished, or do I need to bring my own furniture?

B: Naa nay pilá ka mga gamit. Naa nay higdaan, lamisa, ug gamáy nga **aparadór**. Pero kinahanglán nga ikay magdalá og kaugalingon nimong mga gamit pangkusina.

B: It's semi-furnished. There's already a bed, a table, and a small **cabinet**. But you'll need to bring your own kitchen utensils and appliances.

A: Aw OK ra. Kumusta man pod ang **palibot**? Dilì sabà? Dilì dilikado?

A: That's fine. How about the **surroundings**? Is it not noisy? Is it not dangerous?

threetwelve

B: Oo **hilom** ra man. Kasagaran sa mga namuyô mga istudyante ra pod ug mga nanarbaho og upisina. Naa man poy *gate* nga ginasirado magabii.

B: Yes, it's a **quiet** area. Most of the tenants are students and office workers. We also have a gate that is locked at night.

A: Aw mura'g sipti ra. Puydi usà nakò matan-aw usà ko muhalá?

A: Sounds safe. Can I see the apartment first before deciding?

B: Puydi kaayo! Taná, akong ipakità karón. Kung ganahan ka, puydi na nimo ipa**risirba** karón.

B: Of course! I'll show you the unit now. If you like it, you can **reserve** it today.

A: Maayo! Sigé, akong tan-awon.

A: Great. Okay, I'll take a look.

Vocabulary: Personal Qualities

arrogant	arogante	ignorant	ignorante, luóg, ulát
boastful/braggart	hambog, andakán	imposer	buotbuotón
bothersome	samokán	inattentive	lingág, bangág, tangâ
boyish	tumboyón, lakin-on	introverted	buróng
brave	isog	lazy	tapol, tapolán, taspok
careless	danghag	liar	bakakon
cheapstake	tihík, inót	meddlesome	hilabtánon
cheater	limbongán	mischevious	sipát
contemptible	salawayon	monopolizer	akop-akopón
coward	talaw, talawán	nice, kind	buotan
crazy	buang, buáng	nitpicker	hinawáy, hinawayon
desperate	hangól	nuisance	siáw
diligent	kugi, kugihán	proud	mapahitas-on
doer of others' task	alig-aligón	reproacher	hinumboy, himuyboy
dull/dumb	bulók, bugò, buringóg	retarded	singkohan, kulangò
effeminate	bayotón, bayin-on	rude/vulgar	bastos
envious	suyaón	selfish	dalô, hakóg
fake	pikì, imít	shy	maulawon
favor-counter	isipán	smart	utokán, brayt
greedy	sirók, hukahók	stealer	kawatán
greedy (food)	ulít	stupid	talá/talatalá, tunto

LESSON 19: Assistant Voice (Distributive & Potential)

DISTRIBUTIVE

Traditional	Modern	Merged	
pinaN-	gipaN-	gipaN-	past/completive
	ginapaN-	ginapaN-	present/progressive
ipaN-	igapaN-	ipaN-	future/contemplative, habitual
ipaN-	igpaN-	ipaN-	infinitive, instructive, adverbial

TRADITIONAL VS. MODERN

Among Philippine languages, the original affix indicating completion of action in the passive is -in-. And this was also attested in Cebuano. However, when gi- became the go-to affix between the punctual and durative, it was carried through the other sets including the distributive.

NOMINALIZED **-in-**

Traditionally, pinaN- was a true verbalizer until it became a nominalizer turning verbs into nouns since the durative gi- took over.

pinamalít (something bought)	gipamalít (was/were ought)
pinanghatag (something given)	gipanghatag (was/were given)
pinamaligyà (something sold)	gipamaligyà (was/were sold)
pinanglabay (something thrown)	gipanglabay (was/were thrown)

MODERN MERGED SET

1. **gipaN-** (past/completive)

Gihatód ni Mama ang unlan.	Mom delivered the pillow.
Gilhatód niya ang unlan.	She delivered the pillow.
Gihatód sa babaye ang unlan.	The woman delivered the pillow.
Gihatód niining bayhana ang unlan.	This woman delivered the pillow.

2. **ginapaN-** (present/progressive)

Ginalubóng nila Nilda ang bahandì.	Nilda (and company) are burying the treasure.
Ginalubóng nila ang bahandì.	They are burying the treasure.
Ginalubóng sa mga babaye ang bahandì.	The women are burying the treasure.
Ginalubóng nianang mga bayhana ang bahandì.	These women are burying the treasure.

3. **ipaN-** (future/contemplative, habitual)

Iulì ni Kulás ang silhig.	Kulas will return the broom.
Iulì nimo ang silhig.	You will return the broom.
Iulì sa bata ang silhig.	The child will return the broom.
Iulì niadtong bataa ang silhig.	That child will return the broom.

4. **ipaN-** (infinitive, instructive, conditional, adverbial)

Gusto ni Brenda itulód si Asa.	Brenda wants to push Asa.
Itulód ninyo si Asa.	You (plural) push Asa.
Kung itulód si Lolita…	If Lolita is to be pushed…
Hapit ra itulód.	Almost pushed.

POTENTIAL

Traditional	Modern	Merged	Alternative	
kina-	gika-	gika-	na(hi)-	past/completive
	ginaka-	ginaka-	na(hi)-	present/progressive
ika-, ikag-	igaka-	ika-	ma(hi)-	future/contemplative, habitual
ika-, ikag-	igka-	ika-	ma(hi)-	infinitive, instructive, adverbial

The “alternative” set was an innovation derived from the original set with the ka-. Over time, the alternative set became the default preference for the potential while the original set for reason.

REASON

Aside from their potential use, the forms with ka- also function as reason triggers. It means that the thing in focus is the reason for the action, particularly for stative verbs.

1. **gika-** (past/completive)

Gikaulaw ni Dilya si Manoy.	Dilya was ashamed of Manoy.
Gikaulaw niya si Manoy.	She was ashamed of Manoy.
Gikaulaw sa dalaga ang ulitawo.	The maiden was ashamed of the bachelor.
Gikaulaw niining dalagaha ang ulitawo.	This maiden was ashamed of the bachelor.

2. **ginaka-** (present/progressive)

Ginakalipay ni Nilda ang lalaki.	Nilda is happy with the man.
Ginakalipay niya ang lalaki.	She is happy with the man.
Ginakalipay sa babaye ang lalaki.	The woman is happy with the man.
Ginakalipay nianang bayhana ang lalaki.	That woman is happy with the man.

3. **ika-** (future/contemplative, habitual)

Ikatingala ni Kulás ang paghilak ni Sali.	Kulas will wonder about Sali's crying.
Ikatingala nimo ang paghilak ni Sali.	You will wonder about Sali's crying.
Ikatingala sa tanán ang paghilak ni Sali.	Everyone will wonder about Sali's crying.
Ikatingala nilang tanán ang iyang paghilak.	All of them will wonder about her crying.

4. **ika-** (infinitive, instructive, conditional, adverbial)

Gusto ni Brenda ikasubô ang balità.	Brend wants to be sad about the news.
Ikasubô ninyo ang balità.	You will be sad about the news.
Kung ikasubô ang balità…	If the news is to be sad about…
Halos ikasubô.	Almost the reason for someone's sadness.

The alternative potential set in all voices have no attested distinction between past and present as well as future and infinitive in Cebuano. The hi- is no longer common and is dropped in modern speech. And if it is used, the more common usage for it is nonvolitional or in other words "accidental."

1. **na(hi)-** (past/completive)

Nasul-ot ni Dayday ang sininà.	Manáng was able to marry the maiden.
Nasul-ot niya ang sininà.	He was able to marry the maiden.
Nasul-ot sa batà ang sininà.	The bachelor was able to marry the maiden.
Nasul-ot niining bataa ang sininà.	This bachelor was able to marry the maiden.

2. **na(hi)-** (present/progressive)

Nalubóng ni Daríng ang iyang itóy.	Daríng was able to bury his puppy.
Nalubóng niya ang iyang itóy.	He was able to bury his puppy.
Nalubóng sa tag-iya ang iyang itóy.	The pet owner was able to bury his puppy.
Nalubóng nianang tag-iyaha ang iyang itóy.	That pet owner was able to bury his puppy.

3. **ma(hi)-** (future/contemplative, habitual)

Masulát nila Kulás ang ilang ngalan.	Kulas *(et. al.)* will be able to write their names.
Masulát ninyo ang inyong ngalan.	You will be able to write your names.
Masulát sa mga batà ang ilang ngalan.	The kids will be able to write their names.
Masulát niadtong mga bataa ilang ngalan.	Those kids will be able to write their names.

4. **ma(hi)-** (infinitive, instructive, conditional, adverbial)

Gusto ni Brenda mabutáng ang lamisa.	Brenda wants the table to be able to be placed.
Mabutáng ninyo ang lamisa.	You will be able to place the table.
Kung mabutang ang lamisa…	If the table is able to be placed…
Hapit na mabutang.	Almost placed/put.

AGENT VS. PATIENT

Mangutana si Kuya.	Kuya will ask (something).
Mangutana si Kuya sa imong ngalan.	Kuya will ask your name.
Ipangutana ni Kuya.	Kuya will ask (the thing).
Ipangutana ni Kuya ang imong ngalan.	Kuya will ask your name.
Makapalít si Papa.	Papa will be able to buy.
Makapalít si Papa og sapatos.	Papa will be able to buy shoes.
Ikapalít ni Papa.	Papa will be able to use s.t. to buy s.t.
Ikapalít ni Papa ang kwarta og sapatos.	Papa will be able to use the money to buy shoes.
Mapalít ni Papa.	Papa will be able to use s.t. to buy s.t.
Mapalít ni Papa ang kwarta og sapatos.	Papa will be able to use the money to buy shoes

Conversation: Going to the Doctor

ipatan-aw – to have s.o. look, check
ngipon – tooth
kalibangà – diarrhea
ngangá – to open the mouth
bangág – vehicle
gipatumár – let s.o. take medicine
gipabukalan – boiled the water
tambal – medicine, cure

A: Maayong buntag, Dok. Naa lang untà koy **ipatan-aw** sa akong anák.

A: Good morning, Doc. I just have something for you to **check up** on my child.

B: Unsa may problema sa imong anák?

B: What's the problem with your son?

A: Nagsinakit iyang **ngipon**. Ganinang kaadlawon, nakamatá mi sa iyang kusóg nga paghinilak kay nagsuká siyá ug **nagkalibangà**.

A: His tooth has been aching. This morning, we were awoken by his loud crying because he's been vomiting and **having diarrhea**.

B: Dalî daw, tan-awon natò ang iyang ngipon. **Ngangá** daw, gâ. Uy! Naa diáy dakong **bangág** sa iyang ubós nga bag-ang. Giulod pa gyod. Unsa may imong **gipatumár** 'niya?

B: Come here, let's see his teeth. **Open your mouth**, son. Oh! There's a big **hole** in his lower molar. And it has worms in it. What did you make him **take**?

A: Kinilkig ra Dok kay mao ra may among makaya. **Gipabukalan** ra namo'g tubig unyà gipainóm 'niya arón intawon muundang ang pagsinakit sa iyang ngipon.

A: Just a concoction of the roots of herbal plants Doc because that's what we can only afford. We **boiled** them with water and let him take it in order for the aching to stop.

B: Sigé tagaan ta mo'g **tambal** sa sakít sa ngipon. Kon magsinuka ug magkalibangà pa ganì siyá, balik dayon mo ngarí.

B: OK, I'll give you **medicine** for the toothache. If he'd still suffer from vomitting and diarrhea, get back here immediately.

A: Sigé, Dok. Daghang salamat.

A: OK, Doc. Thank you so much.

Vocabulary: Nature & Topography

bay	luok
beach, seashore	baybay, baybayon

LESSON 20: Experiential Verbs

The experiential verbs take the punctual and durative sets of the patient and referent voices. They are called “experiential” because they describe the experience of the thing in focus. It could be driven by emotion or health condition or when partnered with noun roots, they mean being affected by, full of, or swarmed with the noun in the root word.

1. **gi-** (Patient Durative)

Gisapot si Lito kay walâ pay swildo.	Lito was in a bad mood ‘cause he’s not yet paid.
Ginasapot si Lito kay walâ pay swildo.	Lito is in a bad mood ‘cause he’s not yet paid.
Sapoton si Lito kay walâ pay swildo.	Lito will be in a bad mood ‘cause he’s not yet paid.
Basin sapoton si Lito kay walâ pay swildo.	Lito might have a bad mood ‘cause he’s not yet paid.

2. **gipaN-** (Patient Distributive)

Gipaningót ko ganina.	I was sweating profusely earlier.
Ginapaningót ko karón.	I am sweating profusely right now.
Panington ko unyà.	I will be sweating profusely later.
Basin panington ko.	I might sweat profusely.

3. **gi–an** (Referent Durative)

Gikulbaán silá sa irô.	They were frightened of the dog.
Ginakulbaán silá sa irô.	They are frightened of the dog.
Kulbaán silá sa irô.	They will be frightened of the dog.
Basin kulbaán silá sa irô.	They might be frightened of the dog.

4. **gipaN–an** (Referent Distributive)

Gipangyawaán si Mia.	Mia was possessed by an evil spirit.
Ginapangyawaán si Mia.	Mia was possessed by an evil spirit.
Pangyawaán si Mia.	Mia will be possessed by an evil spirit.
Basin pangyawaán si Mia.	Mia might be possessed by an evil spirit.

Other experiential verbs take the potential set of the patient and referent voices.

1. **na-** (Patient Potential)

Nalipay siyá kang Jomar.	He was happy for Jomar.
Nalipay siyá kang Jomar.	He is happy for Jomar.
Malipay siyá kang Jomar.	He will be happy for Jomar.
Basin malipay siyá kang Jomar.	He might be happy for Jomar.

2. **na–an** (Referent Potential)

Nakuratán ka sa mga pabutó.	You were startled by the explosives.
Nakuratán ka sa mga pabutó.	You were startled by the explosives.
Makuratán ka sa mga pabutó.	You will be startled by the explosives.
Basin makuratán ka sa mga pabutó.	You might be startled by the explosives.

MORE EXPERIENTIAL VERB EXAMPLES

Here are more examples from the gi- set. Meanings vary depending on the root word. It could be being affected with a condition, by a feeling, or being covered, swarmed or infested with insects and the like, or suffering from a kind of sickness or disease.

Giahak	being affected with insanity
Giatay	being affected with chicken cholera
Gibagyo	being affected by a typhoon
Gibayuok	being affected with mumps
Gibun-i	being affected with ringworm
Gidukâ	being affected by drowsiness

A: Ayo!

B: Unsay atò?

A: Maayong buntag. Maó ni ang baláy nila Andrew?

B: Oo maó ni. Akó iyang **inahán**.

A: Naa si Andrew, Tiyâ?

B: Dia man. Unsa diáy untà imong **tuyò**?

A: Aw mag**tuón** untà mi sa among exam ugmà.

B: Aw sigé **dayón**. Akò lang usà siyáng tawagon.

A: Sigé Tiyâ, salamat.

B: Sigé, dayón lang dirí sa sulód. Lingkod lang usà.

B: Andrew, dia imong classmate. Magtuón man **kunó** mo sa inyong exam.

C: OK, Ma. Ingna nga naligò pa ko.

A: Hulat-hulat lang usà **kadiyót** Dong kay tua pa si Andrew, naligò pa.

B: Sigé, Tiyâ.

C: O, **sayó** man lagí ka miabót?

A: Hello! Is anybody there?

B: What can we help you with?

A: Good morning. Is this Andrew's house?

B: Yes, this is. I'm his **mother**.

A: Is Andrew there, Auntie?

B: He is here. What do you **want with him**?

A: We're gonna **study** for our exam tomorrow.

B: **Come in**. Let me just call him.

A: OK Auntie, thanks.

B: Come here inside. You just sit there (while waiting).

B: Andrew, your classmate's here. **He said** you two are gonna study for your exams.

C: OK, Mom. Tell him I'm still taking a bath.

A: Just wait for a **little while** Dong cause Andrew is still taking a bath.

B: OK, Auntie.

C: Oh, you were able to come here **early**?

thepotwelve

A: Naka**pananghid** man ko daan og sayó kang Mama.

A: I was able to **ask permission** from Mom a little bit earlier.

C: Aw maayo. Sigé, akò lang usang kuhaon akong mga gamit.

C: Awesome. OK, let me just get my stuff.

B: Dong, diay inyong **matimô**. Ayáw la'g kaulaw. Diay tinapay ug jūs o. Muinóm ra man kaha ka'g jūs? O basin ganahan ka'g softdrinks?

B: Dong, here's some **snacks**. Don't be shy. Here's some bread and juice. Do you drink some juice? Or do you want sofrdrinks?

A: Aw ok ra kaayo Tiyâ. Kanâ rang jūs. Salamat.

A: Oh it's no big deal Auntie. Just that juice. Thank you.

C: Taná, magsugod ta kay daghan pa ko'g apasonon nga liksyon kay naabsent rabá ko'g pilá ka adlaw tungód sa akong **hilanat**.

C: Let's go, let's start cause we still have a lot of lessons to catch up on cause I've been absent for a couple of days because of my **fever**.

A: Maó lagí.

A: Indeed.

A: *(After study session)* Unsa na ba rong urasa?

A: *(After study session)* What time is it now?

C: Mag-alás singko na.

C: It's almost five.

A: Aw halá, muulî na ko kay arón dî ko magabhián pag-abót sa baláy. Layô-layô pa rabá tong amò.

A: Oh no, I have to go so that I won't be overtaken by night when I get home. My place is quite far.

C: Anhi na lang kahâ katulog. Ugmà na lang ulî sayó sa buntag.

C: Why don't you just sleep here? You go home tomorrow early in the morning.

A: Na, dilì ko. Karóng adlawa ra bayâ akong pananghid kang Mama. **Nagadahóm** to siyá nga makaulî ko.

A: No, I won't. I only asked permission for today. She's **expecting** me to be home.

C: Aw na halá, sigé.

C: Okay.

A: Sigé, muuná 'sâ ko. Tiyâ, daghan kaayong salamat.

A: OK, I will have to go now. Auntie, thank you so much.

C: Sigé, Dong. Balik na lang pod ngarí **puhón**.

C: OK, Dong. Just come back here **anytime**.
